Collaboration is interwoven in the writing process in both obvious and subtle ways--from a writer using the language that he or she inherited, to referring to the works of other writers both explicitly and implicitly, to writing together with a colleague. In this book, the author explains that collaborative writing can be a useful pedagogical tool professors can use to help students actively learn about the subject matter and about themselves.

The International Criminal Tribunal for the former Yugoslavia (ICTY) is one the pioneering experiments in international criminal justice. It has left a rich legal, institutional, and non-judicial legacy. This edited collection provides a broad perspective on the contribution of the tribunal to law, memory, and justice. It explores some of the accomplishments, challenges, and critiques of the ICTY, including its less visible legacies. The book analyses different sites of legacy: the expressive function of the tribunal, its contribution to the framing of facts, events, and narratives of the conflict in the former Yugoslavia, and investigative and experiential legacies. It also explores lesser known aspects of legal practice (such as defence investigative ethics, judgment drafting, contempt cases against journalists, interpretation and translation), outreach, approaches to punishment and sentencing, the tribunals' impact on domestic legal systems, and ongoing debates over impact and societal reception. The volume combines voices from inside the tribunal with external perspectives to elaborate the rich history of the ICTY, which continues to be written to this day.

This photographic journal chronicles the history and construction of the high Sierra check dams from the first one at Yellowhammer Lake in 1920 through the last one constructed at High Emigrant Lake in 1951, past the establishment of the Emigrant Wilderness in 1975, and through various stages of support and opposition which are on-going to this day. Each major period in either check dam construction or the period after is divided into separate chapters, with each check dam described in detail with historical and recent photographs, many that have never been published. In addition, available historical writings and records of Fred Leighton and others were utilized to provide a more in depth perspective on the check dams from those directly involved in construction and/or maintenance. Outdoor enthusiasts discovering the Emigrant Wilderness of the high Sierra for the first time might easily consider it a pristine wilderness, rich in wildlife, streams, lakes, and scenic views. And yet, this is one area where the hand of man has worked to enrich the natural landscape. One of the most notable changes man has made in this area is the construction of small rock dams at the outlet of selected lakes and meadows. These dams were called check dams by Fred W. Leighton, who developed the concept of raising the water level of natural lakes and meadows for fishery and riparian enhancement. These check dams provide an enhanced habitat for mountain fish by providing additional water flow in the late summer months when natural streams typically run very low or completely dry.

Combining intensive research with original interviews with surviving participants, Richard Kluger provides the fullest possible view of the human and legal drama in the years before 1954, the cumulative assaults on the white power structure that defended segregation, and the step-by-step establishment of a team of inspired black lawyers that could successfully challenge the law. Now, on the fiftieth anniversary of the unanimous Supreme Court decision that ended legal segregation, Kluger has updated his work with a new final chapter covering events and issues that have arisen since the book was first published, including developments in civil rights and recent cases involving affirmative action, which rose directly out of Brown v. Board of Education. From the Trade Paperback edition.
