Outsourcing has been seen as a phenomenon allowing competitive advantages for organizations, but some studies do not include the causes and consequences of this particular strategy. Consequently, the objective of this book is to fill this gap by combining several studies from different perspectives. The various chapters presented here follow several approaches, which researchers explore in different contexts. This book intends, therefore, to add to the body of knowledge about outsourcing. Furthermore, it shows how the outsourcing strategy can stimulate organizations' development in various countries and regions worldwide.

The International Brigades (Spanish: Brigadas Internacionales) were military units made up of volunteers from different countries, who traveled to Spain to fight for the Second Spanish Republic in the Spanish Civil War between 1936 and 1939. The number of combatant volunteers has been estimated at between 32,000–35,000, though with no more than about 20,000 active at any one time. A further 10,000 people probably participated in non-combatant roles and about 3,000–5,000 foreigners were members of CNT or POUM.[1] They came from a claimed "53 nations" to fight against the Spanish Falangist forces led by General Francisco Franco who was assisted by German and Italian forces.

In 1984 the first edition of the British Army Guide was published and in May 2011 the 12th edition will be on sale. This invaluable information resource which deals with all aspects of British Army organization, recruitment and training, has been extremely popular with service personnel, the defense industry, military libraries and other groups who are interested in the British Army worldwide. Copies can be seen on desks throughout the UK Ministry of Defense and it would be fair to say that almost every foreign defense attaché in London has a copy in his briefcase. Chapters include a Defense Overview; Army Organization; International Commitments; Armor, Infantry, Artillery, Army Aviation, Engineers, Communications and Combat Service Support; Units of the Army; Recruiting and Training; Reserve Forces plus a final Miscellaneous Chapter which deals with a number of items essential to understanding How the British Army functions on a daily basis. Humanitarian logistics has received increasing interest both from logistics academics and practitioners as a result of the dramatic increase in both natural and man-made disasters. The impact on affected populations can be all the more limited as much as the logistics operations in response to emergencies are effective and efficient. Collaboration with various relevant actors involving in the emergency resolution can help to reduce costs, increase speed, and improve the leanness/agility level in the humanitarian supply chain, and viceversa, poor coordination among them is cited as an explanation for performance gaps. As disasters become increasingly complex better collaboration not only with government agencies, military units, humanitarian organizations, but also through partnerships with private business becomes more and more important. However, such partnerships are not easy as organizations in the two sectors are extremely different. The main aim of this study is exploring more in depth the partnership between profit and non-profit in emergency relief operations, with a specific attention to the cross-learning potential for both the logistics service provider (profit) and the humanitarian organization (non-profit).

Training is about learning new skills and certifying the ability to perform them to a given standard. Section 1 begins with a one-year outline for training officers. Section 2 follows with a table of listings for each outline given in the book, indicating whether the drill is inside or outside and the preparation time needed for it. Section 3 consists of general guidelines for the training officer on how to conduct drills in a safe but effective manner. Section 4 contains the outlines of the various drills that should be conducted. They can be customized and altered, but the basic concept will provide you with a solid place to start. The safety of the members is paramount. Follow all safety precautions and conduct the drills in accordance with standards and company policies.
