HVAC Load Calculator - Estimate the Size of Your Heating

$M_j/L < S_j$ Where, S_j is the muscle strength moment at joint, j , and M_j/L is the external moment at the joint, j , due to load, L and the body segments preceding the joint in the top-down analysis. Top-down analysis is the method of calculating the reactive moments and forces at each joint starting at the hand, all the way till the ankle and foot.

Bing: Manual J Load Calculation Method

This HVAC Load Calculator quickly estimates the size of your heating and cooling system in BTU's. The heat load estimate is based on your climate region, total square footage, number of rooms or zones you want, ceiling height, insulation type, number of windows and doors. This HVAC calculator is the closest estimate to the actual Manual J calculation done by HVAC pros.
