Many scholars, practitioners, and policy-makers in the cultural sector argue that Canadian cultural policy is at a crossroads: that the environment for cultural policy-making has evolved substantially and that traditional rationales for state intervention no longer apply. The concept of cultural citizenship is a relative newcomer to the cultural policy landscape, and offers a potentially compelling alternative rationale for government intervention in the cultural sector. Likewise, the articulation and use of cultural indicators and of governance concepts are also new arrivals, emerging as potentially powerful tools for policy and program development. Accounting for Culture is a unique collection of essays from leading Canadian and international scholars that critically examines cultural citizenship, cultural indicators, and governance in the context of evolving cultural practices and cultural policy-making. It will be of great interest to scholars of cultural policy, communications, cultural studies, and public administration alike.

## **Through the Brazilian Wilderness**

For three years the GAL ('Anti-terrorist Liberation Groups'), created mayhem in the French Basque Country, where ETA had its 'sanctuary'. In 1986 the French government began to hand over ETA suspects to the Spanish police in large numbers and the GAL campaign stopped. But this dirty war had already created widespread support for ETA in the first generation of Spanish Basques to grow up under post-Franco democracy, and its consequences reverberate to this day. The GAL's links to the Spanish security forces, and finally to Gonzalez's own cabinet, have been revealed by controversial magistrates like Baltasar Garzon, despite all the resources of 'state secrecy'. The investigations continue and Garzon is still attempting to

establish the full extent of the relationship between the former Spanish Government and the GAL's death squads.

## **Nietzsche Briefwechsel**

Credit rating agencies face a difficult trade-off between delivering both accurate and stable ratings. In particular, its users have consistently expressed a preference for rating stability, driven by the transactions costs induced by trading when ratings change frequently. Rating agencies generally assign ratings on a through-the-cycle basis whereas banks' internal valuations are often based on a point-in-time performance, that is they are related to the current value of the rated entity's or instrument's underlying assets. This paper compares the two approaches and assesses their impact on rating stability and accuracy. We find that while through-the-cycle ratings are initially more stable, they are prone to rating cliff effects and also suffer from inferior performance in predicting future defaults. This is because they are typically smooth and delay rating changes. Using a through-the-crisis methodology that uses a more stringent stress test goes halfway toward mitigating cliff effects, but is still prone to discretionary rating change delays.

Part Four talks about the different factors which influence the human psyche. Part Five discusses the various aspects of clinical psychology and their implications for the physical well-being of people. ## **Accounting for Culture**

Everyone working in and with organizations will, from time to time, experience frustrations and problems when trying to accomplish tasks that are a required part of their role. This is an unusual routine - a recurrent interaction pattern in which someone encounters a problem when trying to accomplish normal activities by following standard organizational procedures and then becomes enmeshed in wasteful and even harmful subroutines while trying to resolve the initial problem. They are unusual because they are not intended or beneficial, and because they are generally pervasive but

individually infrequent. They are routines because they become systematic as well as embedded in ordinary functions. Using a wide range of case studies and interdisciplinary research, this book provides researchers and practitioners with a new vocabulary for identifying, understanding, and dealing with this pervasive organizational phenomenon, in order to improve worker and customer satisfaction as well as organizational performance.

### **The Reform Movement in China, 1898-1912**

The problem with being the family do-gooder? Sometimes you need to be bad. Or selfish, or whatever it's called when I lock lips with Blanka Pavlo in a hospital hallway. I'm nuts about the sexy science goddess, but it's a dick move to ditch a lifetime of rescue work staying here instead of heading back out on the high seas. But it turns out donating an organ gets you grounded a while. A few months at my family's resort means more time with Blanka, and more chances she'll notice I suck at self-care. She has a point, and also a plan. That's how I end up tied to my headboard with balloon animals, adopting a homely cat, and joining Blanka for a bubble bath that's way steamier than any fully-clothed event ought to be. It's almost enough to make a guy forget why he's spent a lifetime struggling to cancel out the sins of dear ol' dad. Almost. Not quite.
