Junkers JU 87 Stuka Owners' Workshop Manual

This book is essential reading for every MGB enthusiast. The mechanical aspects and the restoration of the vehicle have been written about in numerous publications but the so often maligned electrical systems has never before been comprehensively covered. For those new to vehicle electrical systems the book provides a simple primer using mechanical analogies. Each system in the car has its own chapter, with simple and uncluttered circuit diagrams in which each wire can be seen in its real colours. More than a how-to-do guide, the book also explains the “why” of each system and procedure, aiding diagnostics when things don’t go quite as they should. The many fault finding guides help pin those elusive problems down. For those wishing to improve the car for reliability and safety.

Triumph Spitfire Gold Portfolio 1962-1980

As with most postwar British sports cars, a large portion of the Triumphs produced

in the 1950s and 1960s were exported to the United States. As a result, the demands of U.S. customers essentially defined what a Triumph sports car would be. This automotive history tells the colorful tale of Triumph's successes in the United States, how the marque was established, its dealer network, promotional and marketing efforts, racing ventures that starred legendary drivers like Stirling Moss and Bob Tullius, profiles of U.S.-exclusive models, and, finally, Triumph's sad defeat under the umbrella of British Leyland. A huge collection of black-and-white photography, much of it archival and not seen in print for decades, imparts a sense of this British marque's jolly good run in the United States.

With more than 300, 000 built, the Triumph Spitfire is the bestselling Triumph sports car model ever produced. As the values of these cars have risen significantly in recent years, interest in these affordable sports cars has also increased. This concise but comprehensive book is therefore the ideal guide for those who want to read about the history and development of these iconic sports cars. Introduced at the London Motor Show in 1962, the Triumph Spitfire was designed to compete in the small sports car market against models such as the Austin-Healey Sprite. Based on an adapted Triumph Herald chassis, the Triumph Spitfire's swooping lines were designed by Italian designer Giovanni Michelotti. In this highly readable book, John Nikas describes all the technical and design developments that took the Triumph Spitfire through five separate models, from the Triumph Spitfire 4 (Mark 1) to the Triumph Spitfire 1500. The book also covers the competition models.

With its cranked wing and vulture-like looks the Junkers Ju 87 Stuka dive-bomber

came to symbolise the terror of the German Blitzkrieg. In the early years of the Second World War the Ju 87 lived up to its fearsome reputation, but it eventually met its match when pitted against more modern adversaries. Supported by a comprehensive selection of photographs and technical drawings, Jonathan Falconer's Junkers JU 87 Stuka Manual describes the design, construction and operation of the feared Stuka, which saw frontline action wherever the German Army went – from Norway, western Europe and Russia, to North Africa.

The 8.8cm Flugzeugabwehrkanone 18/36/37/41 - more popularly known as the 'Flak 88' - was one of the most successful and influential artillery gun types in the German arsenal in the Second World War. Developed during the 1920s and 1930s, the gun combined accuracy, a high muzzle velocity and a rapid rate of fire (15–20rpm). Although at first developed as an anti-aircraft gun, it went on to achieve equal repute as an anti-tank weapon, imposing horrific casualties on Allied armor across all major European and North African theaters of war. In one clash in

Normandy, in June 1944, for example, a single Luftwaffe 8.8cm battery destroyed some 40 Allied tanks.

Volkswagen Rabbit/Scirocco/Jetta

The Spitfire remains one of the most iconic combat aircrafts of all time and to own an airworthy example of this classic fighter is the Holy Grail for many wealthy Warbird collectors. For an aircraft that first flew more than 70 years ago and which went out of production in the early 1950s, it may seem odd to discover that there is a flourishing industry centered on this aircraft in the 21st century. Scratch-building brand new Spitfires or restoring original examples to airworthy condition has become big business, with aircrafts changing hands for several million dollars apiece. Husband and wife author team Paul and Louise Blackah look into what is required to find a Spitfire that's suitable for restoration and then return it to the skies. With Paul's vast experience in restoring and maintaining the RAF BBMF's Spitfires, and both Paul and Louise's contacts in the aircraft restoration community, this promises to be a unique look inside the world of Spitfire building and restoration in the 21st century.
