Institutions, Transaction Costs, and Environmental Policy

Declaring the conventional economic analysis of property rights in natural resources to be too narrow and restrictive to allow for effective comparisons between alternative institutional structures, Challen (agricultural and resource economics, U. of Western Australia) develops a conceptual framework for analyzing these structures, and illustrates them with applications to the allocation of water resources. His model analyzes the problems involved in institutional choice, taking into account constraints in institutional change imposed by history and the value of maintaining options in an uncertain future. It shifts the emphasis from assessing the benefits of particular property rights regimes in isolation to the distribution of property rights between levels of governments, communities, and individuals in an institutional hierarchy. Inspired by the New Fiscal History, this book represents the first global survey of taxation in the premodern world. What emerges is a rich variety of institutions, including experiments with sophisticated instruments such as sovereign debt and fiduciary money, challenging the notion of a typical premodern stage of fiscal development. The studies also reveal patterns and correlations across widely dispersed societies that shed light on the basic factors driving the intensification, abatement, and innovation of fiscal regimes. Twenty scholars have contributed perspectives from a wide range of fields besides history, including anthropology, economics, political science and sociology. The volume's coverage extends beyond Europe, the Mediterranean, and the Near East to East Asia and the Americas, thereby transcending the Eurocentric approach of most scholarship on fiscal history.

Effective implementation of two 2008 laws by the IRS could increase taxpayers' voluntary compliance. Those laws require reporting to IRS and taxpayers of cost basis for sales of certain securities and of transaction settlement information (i.e., merchants' income from payment cards or third party networks). This report: (1) assesses IRS's implementation plans for the laws; (2) determines the extent to which IRS issued timely regulations and guidance and did outreach; (3) examines how IRS will use the new data to improve compliance; and (4) analyzes IRS's plans to assess implementation and measure performance and outcomes. Includes recommendations. Charts and tables. This is a print on demand report.
