Fair winds and fine cruising is author Chris Doyle's wish for readers of this popular, newly updated guide to the 10 island nations of this enchanting Caribbean

chain. Doyle's background in research makes this volume rich in practical details; yet its tone is conversational. His is also an intimate knowledge, gathered from more than 20 years of live-aboard Caribbean cruising on his Carib 41 Helos, a former charterboat. The Leewards are a cultural and topographic mix, and Doyle addresses them by geographical grouping. The Renaissance Islands (St. Martin, St. Barts and Anguilla), an economically strong bareboating enclave, offer short cruising passages and a wide choice of anchorages. The Islands That Brush the Clouds - a volcanic chain strung between Saba and Montserrat - present cruisers with a variety of channels and terrain. Most broadly strewn are the Islands of Mountains and Mangroves, a patchwork chiefly of rugged rainforest and exotic fauna, guarded in spots by spectacular reefs. The southern Leewards in particular have cried for reliable charting. Doyle provides aid throughout, using GPS coordinates, a trove of charts and color maps. All are cross-referenced with the newly released Caribbean Yachting Charts, exactingly detailed and available through Cruising Guide Publications. Spectacular photographs add a visual feast. Onshore accommodations, transportation, communications, entertainment and provisioning are also addressed throughout the guide, and in an exhaustive directory by island and service type.

This very practical book begins by describing how the various parts of both marine diesel and gasoline engines work. It then goes on to show the basic service maintenance necessary for both the general running and winter layup, and pinpoints common faults and suggests remedies.

The fascinating story of fiberglass boats and the mavericks who dreamed them. Nine out of ten sailors today own sturdy, often beautiful fiberglass craft. Fiberglass brought boating to the non-rich, but the history of that revolution has never been told. Daniel Spurr rectifies this omission with his highly readable and affectionate account of the fiberglass boat, from its earliest incarnation in World War II to the present day. In the early days, when shoestring genius was unfettered by industrial efficiency, there were boats with tailfins, boats baked in ovens, and boats designed to be dropped from planes. The voyage from those first ugly ducklings to the graceful boats of the 1990s makes a riveting adventure of triumph and ruin. Along the way, Spurr profiles landmark designs that now set the standards in the used-boat market, and he portrays the revolution in human terms, introducing us to the vivid personalities who invented--often in their garages and rarely at a profit--the world of boating we know today.
