Pennsylvania Angler & Boater

This densely illustrated, hands-on guide to diesel engine maintenance, troubleshooting, and repair renders its subject more user-friendly than ever before. Finally, boatowners who grew up with gas engines can set aside their fears about tinkering with diesels, which are safer and increasingly more prevalent. As in other volumes in the International Marine Sailboat Library, every step of every procedure is illustrated, so that users can work from the illustrations alone. The troubleshooting charts in the second chapter--probably the most comprehensive ever published--are followed by system-specific chapters, allowing readers to quickly

Handbook of Biomass Downdraft Gasifier Engine Systems

On the surface, choosing the correct propeller for a particular boat seems simple. But one factor affects another, which then affects another factor, leading many boaters to believe that propeller selection depends more on black magic than logic. All the questions are answered in this complete reference, the first of its kind. This clear, easy-to-use handbook for all small boats is written not for Ph.D.s seeking the latest wrinkle in high-tech propeller design, but as a practical aid for the average mechanic, engineer, boatbuilder, fleet operator, serious yachtsman, or naval architect.

from in the summer, and where do they go in winter? Where do swans come from when they arrive in the region in November? Why do fishermen and sailors consistently see monarch butterflies out over the open bay in late summer? Chesapeake Almanac: Following the Bay through the Seasons answers those questions and more. The fascinating natural history sketches in this book will enable those who love the Chesapeake to tune in to the bay's creatures and seasonal events. The fishing enthusiast will discover things that help him or her catch more bluefish or white perch; the bird watcher and the hiker will learn when to look for the appearance of the ospreys in the spring and the geese in the fall. The cruising sailor drinking morning coffee while anchored in a quiet cove will learn why a great blue heron stalks the shallows in summer; the canoeist will discover when to look for wild marsh flowers.
