"Classroom Cheats Turn to Computers." "Student Essays on Internet Offer Challenge to Teachers." "Faking the Grade." Headlines such as these have been blaring the alarming news of an epidemic of plagiarism and cheating in American colleges: more than 75 percent of students admit to having cheated; 68 percent admit to cutting and pasting material from the Internet without citation. Professors are reminded almost daily that many of today's college students operate under an entirely new set of assumptions about originality and ethics. Practices that even a decade ago would have been regarded almost universally as academically dishonest are now commonplace. Is this development an indication of dramatic shifts in education and the larger culture? In a book that dismisses hand-wringing in favor of a rich account of how students actually think and act, Susan D. Blum discovers two cultures that exist, often uneasily, side by side in the classroom. Relying extensively on interviews conducted by students with students, My Word! presents the voices of today's young adults as they muse about their daily activities, their challenges, and the meanings of their college lives. Outcomes-based secondary education, the steeply rising cost of college tuition, and an economic climate in which higher education is valued for its effect on future earnings above all else: These factors each have a role to play in explaining why students might pursue good grades by any means necessary. These incentives have arisen in the same era as easily accessible ways to cheat electronically and with almost intolerable pressures that result in many students being diagnosed as clinically depressed during their transition from childhood to adulthood. However, Blum suggests, the real problem of academic dishonesty arises primarily from a

lack of communication between two distinct cultures within the university setting. On one hand, professors and administrators regard plagiarism as a serious academic crime, an ethical transgression, even a sin against an ethos of individualism and originality. Students, on the other hand, revel in sharing, in multiplicity, in accomplishment at any cost. Although this book is unlikely to reassure readers who hope that increasing rates of plagiarism can be reversed with strongly worded warnings on the first day of class, *My Word!* opens a dialogue between professors and their students that may lead to true mutual comprehension and serve as the basis for an alignment between student practices and their professors' expectations.

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even

profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science.”

The Legend of Chris-Craft

Grayson is Lynne Cox’s first book since *Swimming to Antarctica* (“Riveting”—*Sports Illustrated*; “Pitch-perfect”—*Outside*). In it she tells the story of a miraculous ocean encounter that happened to her when she was seventeen and in training for a big swim (she had already swum the English Channel, twice, and the Catalina Channel). It was the dark of early morning; Lynne was in 55-degree water as smooth as black ice, two hundred yards offshore, outside the wave break. She was swimming her last half-mile back to the pier before heading home for breakfast when she became aware that something was swimming with her. The ocean was charged with energy as if a squall was moving in; thousands of baby anchovy darted through the water like lit sparklers, trying to evade something larger. Whatever it was, it felt large enough to be a white shark coursing beneath her body. It wasn’t a shark. It became clear that it was a baby gray whale—following alongside Lynne for a mile or so. Lynne had been swimming for more than an hour; she needed to get out of the water to rest, but she realized that if she did, the young calf would follow her onto shore and die from collapsed lungs. The baby whale—eighteen feet long!—was migrating on a three-month trek to its feeding grounds in the Bering Sea, an eight-thousand-mile journey. It would have to be carried on its mother’s back for much of that distance, and was dependent on its mother’s milk for food—baby whales drink up to fifty gallons of milk a day. If Lynne didn’t find the mother whale, the baby would suffer from dehydration and starve to death. Something so enormous—the mother whale was fifty feet long—suddenly seemed very small in the vast Pacific Ocean. How could Lynne possibly find her? This is the story—part mystery, part magical tale—of what happened . . .

The Span Cookbook: A Practical Guide to Accessing Span

Bestselling author Pat Conroy acknowledges the books that have shaped him and celebrates the profound effect reading has had on his life. Pat Conroy, the beloved American storyteller, is a voracious reader. Starting as a childhood passion that bloomed into a life-long companion, reading has been Conroy’s portal to the world, both to the farthest corners of the globe and to the deepest chambers of the

human soul. His interests range widely, from Milton to Tolkien, Philip Roth to Thucydides, encompassing poetry, history, philosophy, and any mesmerizing tale of his native South. He has for years kept notebooks in which he records words and expressions, over time creating a vast reservoir of playful turns of phrase, dazzling flashes of description, and snippets of delightful sound, all just for his love of language. But for Conroy reading is not simply a pleasure to be enjoyed in off-hours or a source of inspiration for his own writing. It would hardly be an exaggeration to claim that reading has saved his life, and if not his life then surely his sanity. In *My Reading Life*, Conroy revisits a life of reading through an array of wonderful and often surprising anecdotes: sharing the pleasures of the local library's vast cache with his mother when he was a boy, recounting his decades-long relationship with the English teacher who pointed him onto the path of letters, and describing a profoundly influential period he spent in Paris, as well as reflecting on other pivotal people, places, and experiences. His story is a moving and personal one, girded by wisdom and an undeniable honesty. Anyone who not only enjoys the pleasures of reading but also believes in the power of books to shape a life will find here the greatest defense of that credo. **BONUS:** This ebook edition includes an excerpt from Pat Conroy's *The Death of Santini*.

In this brash and audacious debunking of the myths and manipulation that brought the world to oil addiction, alt fuel expert Marc J. Rauch brilliantly lays out how ethanol can change the planet for the better--and along the way helps us navigate the noise of petroleum advocates. *The Ethanol Papers* is a rough-and-tumble, no holds-barred crystallization of the ethanol vs. gasoline conflict. Written in plain jargon, non-scientists, non-academics, and politicians alike will find it compelling. Yet this is no "Idiots Guide to Biofuels" or "Alt Fuels for Dummies." Rather, *The Ethanol Papers* is the most in-depth and complete explanation of the ethanol-oil problem now available, targeted for smart people who demand facts.

The Boat Rocker is a poetry of life that both presents a philosophy of life and describes an art of living that has been learned the hard way-by actually living a life; by having tasted all the joys life offers and having suffered many of the tragedies and pains life inevitably brings as well. While The Boat Rocker will not help a person to avoid all tragedy and pain-those are a part of every life-it will help everyone who takes it's message to heart to avoid some needless suffering and to get through whatever vale of tears is encountered through a simple act of faith, for fidelity is everything in life-fidelity to self, fidelity to our loved ones, fidelity to our purpose in life, and fidelity to God. These are essential for a well-lived, rewarding life. But love is the heart and soul of faith, and faith is but love made real.

Deception Island

This book looks at the link between voters and political party systems in Asian democracies, focusing on India, Indonesia, Korea and the Philippines. It discusses this link in terms of three distinct elements: the formation of voters preferences, the translation of preferences into votes, and the translation of votes into seats. The book goes on to discuss how far the general rules of political party systems and their underlying causal mechanisms such as strategic voting are apparent in these Asian democracies. In particular, it explores the extent to which electoral rules and social structural variables affect the process of transforming preferences

into a political party system within the context of Asian politics. The extensive areas covered by the book overcome the traditional sub-regional division of Asia, namely, East, Southeast and South Asia.

"It is generally recognized that the adoption of a new technology plays a fundamental role in the development process. However, the benefits from the introduction of the technology may be unevenly distributed among the population, especially if the markets do not function properly. While the microeconomic literature on technology adopted and diffusion focuses on "who" and "when," the macroeconomic literature has focused on the overall impact of globalization on inequality. In this paper the authors bring these two strands of the literature together by studying the diffusion of plastic reinforced fiber boats in a fishing village in Tamil Nadu and by analyzing the dynamics of income inequality during this process. Laboratory Activities for Therapeutic Modalities

The string of business scandals that recently engulfed America painted a picture of corporate chieftains lining their pockets by cutting corners, cooking the books, and duping gullible investors. In doing so, greedy CEOs have hijacked what could be one of the most important business innovations in decades: stock options for all employees. Joseph Blasi, Douglas Kruse, and Aaron Bernstein—all leading experts on employee ownership—show how American companies would perform much better if they followed the lead of many high-tech firms and granted options to their entire workforce, rather than to just a tiny corporate elite. Using SEC data in a way never done before, they document the vast wealth executives have accumulated for

themselves. It shows how the abuse of options has taken place not just at scandal-ridden companies such as Enron and WorldCom, but across the entire reach of corporate America. In the Company of Owners argues that there's a better way. Broad-employee ownership through stock options offers a new model for U.S. corporations and American capitalism. The authors explain how employees and shareholders alike would benefit if most large companies adopted what they call the partnership capitalism approach—using options to encourage employees to think and act like owners. A searing critique of business as usual in America's executive suites, this book offers a comprehensive vision for how stock options can enrich companies, employees, investors, and the U.S. economy as a whole. With its remarkable new evidence and astute synthesis, In the Company of Owners will change the way America thinks about stock options. Joseph R. Blasi, a sociologist, and Douglas L. Kruse, an economist, are professors at Rutgers University's School of Management and Labor Relations. Aaron Bernstein is a senior writer at Business Week magazine.
