Water Hunting

Ron Kamrowski has written this book to share the experiences of using a metal detector. Most writings of this nature deal with the workings of a metal detector, this work contains actual events to explain that there are literally millions of places to search. Untouched areas abound in the United States where history, although only dating a few centuries, can be discovered in your own backyard.

The Metal Detecting Bible

"This best-selling book is both aimed at the beginner and someone who is perhaps considering taking up metal detecting. However it also contains information that the more experienced detectorist may find very useful. After a combined 70 years metal detecting Dave Stuckey and I decided that we had a large amount of research information that allowed us in most cases to quickly assess the potential of areas to search. Why should everyone else have to wait that long to get the same benefits as we had? We simply had to share it all. Who would guess that a flock of birds might just reveal the site of a Roman villa or a cluster of molehills be the site of a Georgian manor house? Those pieces of twisted metal you have just found might actually pin point the site of a crashed wartime aeroplane. Just like a forensic examination every investigative factor is covered here, what might it reveal for you? Written in an "easy read" style with high quality colour illustrations it is perhaps that ideal Christmas or birthday present, or indeed anytime gift for that person in your life you know is or could well become very interested in metal detecting. "

Metal Detecting for Beginners and Beyond

In December 2010, J.P. Ripple made a handshake agreement with an eighty-seven-year-old man named Red to hunt for treasure on Stigley Ridge in northern Oklahoma. Red didn't balk when Ripple, who bought his first metal detector as a senior in high school, told him it would take about six winters to cover the 200-acre ridge. While Red never gave one reason why he wanted the ridge searched, he claimed his friends had lost coins, tax tokens, toys, and jewelry under a red cedar on the ridge. The Stigley kids were classmates during parts of the Great Depression, and they had a great time playing under the tree with Red once a month. In sharing his story about searching for treasure on the ridge, Ripple reveals the methods he used, what worked, what didn't, and how he dealt with an elderly man who wanted to tag along and help dig. He also shares the best places to search for valuable items, how to sell coins and bottles, and federal regulations that every treasure hunter must keep top of mind as well as what he found on Stigley Ridge.
