Finding Darwin's God

Reading Essentials for Biology

In this companion volume to his critically acclaimed first book, *The Tao of Muhammad Ali*, Davis Miller turns his attention to a second iconic figure of the twentieth century--and another of Miller's own seminal influences: film star and martial arts legend Bruce Lee. Just weeks after completing *Enter the Dragon*, his first vehicle for a worldwide audience, Bruce Lee--the self-proclaimed world's fittest man--died mysteriously at the age of thirty-two. The film has since grossed over \$500 million, making it one of the most profitable in the history of cinema, and Lee has acquired almost mythic status. Lee was a flawed, complex, yet singular talent. He revolutionized the martial arts and forever changed action moviemaking. But what has his legacy truly meant to the fans he left behind? To author Davis Miller, Lee was a profound mentor and a transformative inspiration. As a troubled young man in rural North Carolina, Miller was on a road to nowhere when he first saw *Enter the Dragon*, an encounter that would lead him on a physical, emotional, and spiritual journey and would change his life. As in *The Tao of Muhammad Ali*, Miller brilliantly combines biography--the fullest, most unflinching and revelatory to date--with

his own coming-of-age story. The result is a unique and compelling book. From the Hardcover edition.

Microbiology Fundamentals

"For the wrath of God is revealed from heaven against all the ungodliness and unrighteousness of men, who suppress the truth in unrighteousness who exchanged the truth of God for the lie, and worshiped and served the creature rather than the Creator." Romans 1:18-25 Evolution never happened. The best scientists in the history of the world didn't believe in it, so why should you? Men like Newton, Euler, Galileo, Kepler, Bacon, Kelvin and Faraday believed Scripture and science, God's word and His works, were completely compatible and should be studied together. Then Darwin came along and published On the Origin of Species for the purpose of showing that "species had not been separately created" (Descent of Man, p. 62), exchanging the truth of God for a lie and paving the way for a study of science apart from God. Evolutionary thinking has taken a tremendous toll on the lives and minds of many, but there is hope. In The Exchange of Truth, Dr. Shormann shows that with a little thought and a basic understanding of genetics and probability, anyone can liberate themselves from evolution's false worldview. Read the book and learn how.

Practical skills for healing the hidden wounds of childhood trauma We're all a product of our childhood, and if you're like most people, you have experienced some form of childhood trauma. Adverse childhood experiences (ACEs) are at the root of nearly all mental health disorders, including depression, anxiety, panic disorder, post-traumatic stress disorder (PTSD),

and attention-deficit/hyperactivity disorder (ADHD). Memories associated with ACEs imprint on a child's brain, and can manifest themselves mentally and physically throughout adulthood—even decades after the traumatic incident. So, how can you begin healing the deep wounds of ACEs and build strength and resilience? In this innovative workbook, trauma specialist Glenn Schiraldi presents practical, evidence-based skills to help you heal from ACEs. In addition to dealing with the symptoms, you'll learn to address the root cause of your suffering, change the way your brain responds to stress and the outside world, and soothe troubling memories. Using the trauma-informed and resilience-building practices in this book, you will:

- Understand how toxic childhood stress is affecting your health
- Rewire disturbing imprints in your brain using cutting-edge skills
- Learn how to regulate stress and emotional arousal
- Discover why traditional psychological approaches might not be helping
- Know when and how to find the right kind of therapy

Childhood trauma doesn't have to define you for the rest of your life. With this book as your guide, you will be able to make fundamental changes and replace needless suffering with self-care, security, and contentment.
