Highly regarded by professors and students alike, *Engineering Economic Analysis*, Eighth Edition, introduces the fundamental concepts of engineering economics. Written for standard engineering economics courses, this bestselling volume by Donald G. Newnan, Jerome P. Lavelle, and Ted G. Eschenbach covers essential time value of money principles for engineering projects and isolates the problems and decisions engineers commonly face. It also examines the tools necessary to properly analyze and solve those problems. Revised in 2000, the eighth edition focuses on the use of spreadsheets, teaching students to use the enormous capabilities of modern software, rather than relying on spreadsheet templates. The majority of the chapters conclude with sections designed to help students create spreadsheets based on the material covered in each chapter. The book's organization gives professors the flexibility to omit spreadsheet instruction without loss of continuity (accommodating shorter courses) or to require that all computations be done with spreadsheets, thus preparing students to use this essential tool for real-life problems.

The thirteen qualities of Robin's Perfect Man range from the mildly important "Handsome" to the all-important "Great taste in music." After all, Westfield's best high school folk musician can't go out with some schmuck who only listens to top 40 crap. So when hot Carter Paulson walks in the door of Robin's diner, it looks like the list may have come to life after all until she realizes he's profoundly deaf. Carter isn't looking for a girlfriend. Especially not a hearing one. Not that he has anything against hearing girls, they just don't speak the same language. But when the cute waitress at Grape Country Dairy makes an effort to talk with him, he takes her out on his yellow Ducati motorcycle. Music, language, and culture all take a backseat as love drives the bike. But how long can this summer really last?

Maximum Boost

How do the rich get rich? An updated edition of the "remarkable" New York Times bestseller, based on two decades of research (The Washington Post). Most of the truly wealthy in the United States don't live in Beverly Hills or on Park Avenue. They live next door. America's wealthy seldom get that way through an inheritance or an advanced degree. They bargain-shop for used cars, raise children who don't realize how rich their families are, and reject a lifestyle of flashy exhibitionism and competitive spending. In fact, the glamorous people many of us think of as "rich" are actually a tiny minority of America's truly wealthy citizens—and behave quite differently than the majority. At the time of its first publication, *The Millionaire Next Door* was a groundbreaking examination of America's rich—exposing for the first time the seven common qualities that appear over and over among this exclusive demographic. This edition includes a new foreword by Dr. Thomas J. Stanley—updating the original content in the context of the financial crash and the twenty-first century. "Their surprising results reveal fundamental qualities of this group that are diametrically opposed to today's earn-and-consume culture." —Library Journal

Road & Track

The Complete Car Cost Guide, 1998

This guide is intended for professional mariners and for those studying for the US Coast Guard license examinations. The result of the author's experience teaching these subjects for many years, it addresses every major navigation problem with a short, accurate description, definitions of terms, and worked out examples. To help the reader the author has implemented real handouts from his classes, intended for students, as references, including worksheets for celestial and tide calculations. Vital information of all types is provided here, including a crash course in celestial and terrestrial navigation, magnetic deviation tables for calculating compass error, formulas for determining leeway, and tips for navigating close to home and across the oceans. Professor Palmiotti's expertise, earned through his vast experience as mate and captain, is now available, here, in compact form, for both veteran seamen and officers in training.
