The Vinegar Anniversary Book

A proposal to radically change the legal concept of the "reasonable man standard" in order to better protect women from violence and other injustices.

Fins Are Forever

Brand new information on Mother Nature's Secret Weapon - apple cider vinegar! Completely updated with the latest research and brand new remedies and uses for apple cider vinegar. Handsome coffee table collector's edition.

Advanced Level Accounting

The Love of a King

Intensional logic is the technical study of such intensional phenomena in human reasoning as modality, knowledge, or flow of time. These all require a richer semantic picture than standard truth values in one static environment. Such a picture is provided by so-called possible worlds semantics, a paradigm which is surveyed in this book, both as to its external sources of motivation and as to the internal dynamics of the resulting program. In particular, Manual of Intensional Logic presents the major classical topics, including modal logic, tense logic, and conditional logic, all of which illustrate motivations coming from philosophy and linguistics. The Book also discusses recent computational applications in computer science and AI. Finally, Manual of Intensional Logic takes up recent developments in the study of language and information making themselves felt in the area. The Book examines the role of partial information--with illustrations drawn from different branches of Intensional Logic--and various influences stemming from current theories of the semantics of natural language, involving generalized quantifiers and theories of types.

Designing and Drafting for Handweavers

Do you wonder how movies – sequences of static frames – appear to move, or why 3-D films look different from traditional movies? Why does ventriloquism work, and why can airliner flights make you feel disoriented? The answers to these and other questions about the human senses can be found within the pages of Foundations of Sensation and Perception. This third edition maintains the standard for clarity and accessibility combined with rigor which was set in previous editions, making it suitable for a wide range of students. As in the previous editions, the early chapters allow students to grasp fundamental principles in relation to the relatively simple sensory systems (smell, taste, touch and balance) before moving on to more complex material in hearing and vision. The text has been extensively updated, and this new edition includes: a new chapter devoted to attention and perception over 200 new references over 30 new figures and improved, more colorful, visual presentation a new companion website with a range of resources for students and lecturers The book contains a range of pedagogical features, including tutorial sections at the end of each chapter. This distinctive feature introduces areas of the subject which are rarely included in student texts, but are crucial for establishing a firm foundation of knowledge. Some tutorials are devoted to more advanced and technical topics (optics, light measurement, Bayesian inference), but treated in an accessible manner, while others cover topics a little outside of the mainstream (music perception, consciousness, visual art).

Foundations of Sensation and Perception will enable the reader to achieve a firm grasp of current knowledge concerning the processes that underlie our perception of the world and will be an invaluable resource for those studying psychology, neuroscience, and related disciplines.

Public Relations

A former member of the American Stock Exchange introduces trading and financial markets to upper-division undergraduates and graduate students who are planning to work in the finance industry. Unlike standard investment texts that cover trading as one of many subjects, Financial Trading and Investing gives primary attention to trading, trading institutions, markets, and the institutions that facilitate and regulate trading activities—what economists call "market microstructure." The text will be accompanied by a website that can be used in conjunction with TraderEx, Markit, StocklinkU, Virtual Trade, Vecon Lab Experiment, Tradingsim, IB Student Trading Lab, Brenexa, Stock Trak and How the Market Works. Introduces the financial markets and the quantitative tools used in them so students learn how the markets operate and gain experience with their principal tools Helps students develop their skills with the most popular trading simulation programs so they can reuse the book to solve day-to-day problems Stretches from investor behavior to hedging strategies and noise trading, capturing recent advances in an up-to-date reference source

Air Quality Sampling Manual

An introduction to Public Relations that focuses on ethical, productive relationships with strategic constituencies REVEL™ for Public Relations: A Values-Driven Approach introduces students to public relations, defined as the management of relationships between an organization and the publics important to its success. Authors David Guth and Charles Marsh outline the profession's common issues, trends, and techniques, and help students to place the profession within the context of its role in the conduct of a civil society. In order to help students understand the contemporary state of the field, REVEL for the Sixth Edition offers the most up-to-date statistics, the latest research, and the most current examples of public relations practice. REVEL is Pearson's newest way of delivering our respected content. Fully digital and highly engaging, REVEL replaces the textbook and gives students everything they need for the course. Informed by extensive research on how people read, think, and learn, REVEL is an interactive learning environment that enables students to read, practice, and study in one continuous experience — for less than the cost of a traditional textbook. NOTE: REVEL is a fully digital delivery of Pearson content. This ISBN is for the standalone REVEL access card. In addition to this access card, you will need a course invite link, provided by your instructor, to register for and use REVEL.

The Everest Story

Written for the A Level accounting syllabus, this text is on the reading lists of the AEB and the Oxford and Cambridge GCE Advanced Level examining boards. It has been updated in line with syllabus requirements and includes material on sensitivity analysis. It also includes multi-choice questions.

Elementary English Grammar & Composition

Hecht brings to bear the perspective of both historical concepts and contemporary physics. While the text covers the standard range of material from kinematics to quantum physics, Hecht has carefully limited the math required to basic calculus and very basic vector analysis. He omits obscure, high-level topics while focusing on helping students understand the fundamental concepts of modern-day physics. Calculus and vector analysis are both painstakingly developed as tools, and then used only insofar as they illuminate the physics. Hecht deliberately paces comfortably, justifies where each topic is going, stops to take stock of where the students have been, and points out the marvelous unity of the discourse. Informed by a 20th century perspective and a commitment to providing a conceptual overview of the discipline, Hecht's CALCULUS 2/e keeps students involved and focused.

Management Principles

The six carefully graded levles of this popular series take adult and young adult ESL Students from a zero-level knowledge of English to basic facility in the four language skills.

Physics

"It is beautiful to look at, hard to reach, and terribly difficult to climb. Winds of 200 kilometres per hour or more scream across it day and night, while the temperature falls to -20°C or lower. Every year, some who try to climb the highest mountain in the world do not return. But for a century people have been coming to climb Everest - some alone, some in groups, but all with a dream of going to the highest place in the world. This is their story"--Back cover.

Financial Trading and Investing

Foundations of Sensation and Perception

Air Quality Sampling Manual.

Lado English Series

The challenges presented by the fast-changing business environment require that organisations find new and innovative ways to respond in order to improve performance. The contemporary manager has to integrate new information technology, manage diversity, accommodate stakeholders' often conflicting claims, deal with the threat that HIV/AIDS poses to the workforce and comply with charters such as the Mining Charter. The list of challenges has become almost endless. As well as exposing the reader to the traditional management functions, namely planning, organising, leading and controlling, this edition also deals with the most recent challenges that managers have to face. As a response to the increasing complexity of the business environment, this book deals with ethical issues in management, corporate governance, strategy maps, the resource-based view of an organisation as well as mentorship, and coaching. Key lectures include: Relevant examples taken from South African and African organisations; Numerous illustrations with informative graphics, diagrams and charts; A logical structure to aid accessibility; Case studies, discussion questions MCQs at the end of each chapter; Multimedia support materials for prescribing institutions. This book is widely prescribed by institutions and will be the preferred book of many major businesses for use in their management and leadership training programmes.

California Business Law and Legal Environment

High interest, low vocab for Adult Literacy and English as a second language learners.

A Manual of Intensional Logic

Here is the latest revised series of ELEMENTARY ENGLISH GRAMMAR AND COMPOSITION intended for children just beginning to learn English. Its aim is to teach them the first Principles of Functional Grammar, Correct Usage and Basics of Composition, with the help of attractive illustrations and examples having a close bearing on the daily life and environment of a child.

A Law of Her Own

Just when things seem to be going swimmingly, Lily Sanderson's human-hating cousin Dosinia is exiled from the mer kingdom of Thalassinia and sent to land, leaving Lily with the huge task of keeping her on the straight and narrow. But why was Dosinia exiled in the first place? And why, why, why is she batting her eyelashes at Brody, Lily's former crush? As if her bratty cousin weren't enough to handle, the reappearance of a merboy from Lily's past makes her question her

decision to renounce her kingdom and stay on land with her boyfriend, Quince.
