Builders of the Pacific Coast

How does a suburban pizza joint end up profiled on national magazine covers and network TV news? (Hint: The secret is not in the sauce.) When Nick Sarillo decided to open a family-friendly pizza restaurant in the suburbs of Chicago, people thought he was nuts. Having worked as a carpenter for much of his adult life, he lacked any formal experience in restaurants or in managing a small business. Everyone told him no one else would ever care about his place the way he did. They warned he'd have to work 20-hour-days and monitor every employee just to stay in business. But Sarillo saw things differently, and set out to run his business in a radically different way. Today Nick's Pizza & Pub is one of the top ten busiest independent pizza restaurants in the country, with two locations that gross about six times the revenue of the typical pizza restaurant. And in an industry where most employees leave within less than a year, Nick's annual turnover rate is less than 20 percent. How did he do it? The secret lies in Nick's purpose-driven culture, in which every employee—from the waiters to the chefs to the managers—is equipped with the tools necessary to do

their jobs while also advancing the company's overall mission. The result is higher sales, a dedicated team, and a big little business that is beloved by the entire community. In *A Slice of the Pie* Sarillo tells the story of how he built his extraordinary culture and shows how anyone can follow his methods. For instance, Nick's managers engage the staff by tracking and rewarding unusual metrics, such as how many guests request a particular server or the average check amount of each carryout host. Likewise, team members of all ages and levels of experience are encouraged to express themselves, acquire new skills, and suggest ideas to help the business grow. *A Slice of the Pie* will help transform even the smallest, simplest, and most ordinary business into a successful, high-performance organization.

This edited collection analyses the unexplored concept of the family business group, evaluating the opportunities and advantages that it creates for entrepreneurs. Raising a number of important questions, the authors construct a new research agenda for the complex topic of the family business group, which will ultimately assess its contribution towards the economy and society in general. The chapters provide a core understanding of the phenomenon and cover its formation, nature and complexities, as well as offering a holistic perspective and exploring factors such as scale, size and regional contexts. A useful tool for those researching small businesses, organisation, and business strategy, this book highlights the key advantages of family business group structures in both developed and developing countries, and local and national contexts.

Mind Body Baby: Chakras

Offroading New Zealand

Scotland Yard Detective Joe Sandilands is caught off guard one night in 1933 by a phone call from a distressed boy named Jackie Drummond, who just might be the illegitimate son Joe never knew he had. Jackie is in trouble at his Sussex boarding school, where a teacher has been murdered. When Joe gets himself assigned to the investigation, he learns the boarding school case is more complicated than it appears: A frightening number of boys, all from wealthy families, have gone missing over the school's history, and by some coincidence none of the families have followed up on their sons' whereabouts.

The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the

200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

A trace element (TE) is a chemical element presented below ~ 0.1 wt. % and required in minute quantities to maintain proper physical functioning. TE analysis in clinical samples (plasma, urine, cerebro-spinal fluid, full-term placenta, hair, nails, buccal mucosa, semen, biopsy specimens) has received increasing attention. Based on 62 sources, current effort presents comparative knowledge about the attempts to accurately trace TE in clinical samples through Vis/NIR, PIXE, TXRF, GFAAS, ICP-MS. It informs the need for further research adjustments to reveal the reciprocal states of certain TE (Cu/Zn, Ca/Mg, Fe/ Pb) in correlation with their real-time counts in both maternal and neonatal umbilical cord plasma, and in relation to augmented oxidative stress. This would help to achieve consistency in interpreting obstetrical complications (preeclampsia, prematurity, or gestational diabetes). Generated hypotheses should target plausible mechanisms behind TE alterations and their stage-sensitive measures in gynecological cancer. New prospects are discussed in management and prognosis of endometriosis and premature ovarian failure (POF).

In 2004, Lloyd Kahn discovered a group of unique carpenters along the Pacific Coast of North America. Over a two-year period, he made four trips north from his home in the San Francisco Bay Area, up the coast, shooting the photos that appear in this book. To preserve homeowners' privacy, specific locations are not given, but suffice to say this book focuses on the Pacific Coast north from San Francisco up to and around Vancouver Island, British Columbia, latitudes 37 to 49 degrees. There's been a vortex of creative carpentry energy in this part of the world over the last 30 years. Many of the builders shown here got started in the countercultural era of the '60s and '70s, and their work has never been shown in books or magazine articles.

"From the publishers of a popular series of building books comes Small Homes, which is highly relevant for these times. Getting smaller, rather than larger. Some 75 builders share their knowledge of building and design, with artistic, practical, and/or economical homes in the United States, Canada, England, Scotland, France, Germany, Spain, New Zealand and Lithuania. This is the seventh in a series of highly-

graphic books on homemade building, all of which are interrelated. The series, "The Shelter Library Of Building Books," include Shelter, Shelter II (1978), Home Work (2004), Builders of the Pacific Coast (2008), Tiny Homes (2012), and Tiny Homes on the Move (2014). Each of these books has over 1,000 photos, and each 2-page spread is carefully laid out with respect to balance of graphics and clarity of information. A running theme with them is that people have been inspired by one book to build their own home, and this will be included in a subsequent book. For example, many of the homes in Home Work were inspired by Shelter. And so on. The underlying theme with Shelter's books, which has continued for over 40 years, is that it's possible for you to create your own home with your own hands, using natural materials. Some of these homes are in the country, some in small towns, and some in large cities"--

Idiot's Guides: Bike Repair and Maintenance

'Beautifully illustrated with photos of retro vans and their owners, this collection is from the creator of the hashtag #vanlife, and is as much about exploring nature as it is about what 'rig' you drive' The Pool More and more people are taking a break from conventional life for the freedom and adventure of being on the road and living in a converted vintage truck, camper, or van. One of these vandwellers, Foster Huntington, created the #vanlife hashtag as he chronicled his adventures living in a van while driving across country. He tapped into a community of like-

mindful individuals looking to explore nature at their own pace. VAN LIFE showcases the best crowd-sourced photographs of stunning beaches, misty forests, and rocky mountains from Foster's tumblr account, many of which have never been posted.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated. Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and

alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
