Legal Environment of Business in the Information Age

Written by a leading expert in the field, The Oxford Introductions to U.S. Law: Contracts provides students with ready access to the basic doctrines of contract law, the story behind their evolution, and the rationales for their continued existence. An engaging book that allows students to grasp the "big picture" of contract law, it is organized around the principle that lies at the heart of contracts: consent. Beginning with the premise of "consent," the book provides a cohesive framework in which to understand the various aspects of contract law.

Challenging Private Law

Remedies in Australian Private Law offers a detailed introduction to remedies and their functions under Australian law. With a strong black-letter law focus, the text provides a complete treatment of remedies in common law, equity and statute and develops a framework for understanding the principles of private law remedies and their application.

This book is a collection of essays examining the remedy of contract damages in the common law and under the international contract law instruments such as the Vienna Convention on Contracts for the International Sales of Goods and the UNIDROIT Principles of International Commercial Contracts. The essays, written by leading experts in the area, raise important and topical issues relating to the law of contract damages from both theoretical and practical perspectives. The book aims to inform readers of current developments, problems, trends and debates surrounding contract damages and reflects an ongoing dialogue on damages among representatives of common law, civil law, mixed and trans-national legal systems. The general issues addressed in the collection include the purpose and scope of damages, the measures of damages, recoverability of losses, methods of limiting damages and the assessment of damages. A special emphasis is placed on the examination of the role of gain-based damages, the meaning and definition of loss, the recoverability of

damages for injury to business reputation, the recoverability of legal fees, the rules of mitigation and foreseeability, the dilemma between the 'abstract' and 'concrete' approaches to the calculation of damages and the relationship between changes in monetary value and the assessment of damages.

Baumer and Poindexter's, *Legal Environment of Business in the Information Age*, 1e, is the legal environment text for the 21st century. In the next few years, many of the laws that comprise the legal environment of business will change, and the pace of the change is likely to be quick. Because of the growth of information technology, many legal issues have emerged and are occupying center stage. Baumer/Poindexter targets future managers who will be dealing with information technology in some way, and reinforces the latest trends in business education by providing a similar experience with law. *Legal Environment of Business in the Information Age* places an emphasis on the manner in which regulatory law deals with changes in technology, and devotes significantly more attention to E-Commerce contract law and legal protection of intellectual property.

Lord Sumption has been one of the most influential judges of his generation. This book critically reflects on the important and controversial issues raised by his jurisprudence. Using Lord Sumption's judgments and extra-judicial lectures as a starting point, the book contains a selection of essays that consider 'where next' in relation to topics such as: - contract variation, damages and penalties; - economic loss and personal injury in tort law; - knowing receipt and proprietary restitution; - illegality in private law; - agency and attribution; - piercing the corporate veil; - foreign law in the English courts. The book covers a broad range of areas in private law including contract, tort, unjust enrichment, equity, company and commercial law, as well as private international law and civil procedure.

Promises and Contract Law is the first modern work to explore the significance of promise to contract law from a comparative legal perspective. Part I explores the component elements of promise, its role in Greek thought and Roman law, the importance of the moral duty to keep promises and the development of promissory ideas in medieval legal scholarship. Part II considers the modern contract law of a number of legal systems from a promissory perspective. The focus is on the law of England, Germany and three mixed legal systems (Scotland, South Africa and Louisiana), though other legal systems are also mentioned. Major topics subjected to a promissory analysis include formation of contract, third

party rights, contractual remedies and the renunciation of contractual rights. Part III analyses the future role which promise might play in contract law, especially within a harmonised European contract law.

Studies in the Contract Laws of Asia provides an authoritative account of the contract law regimes of selected Asian jurisdictions, including the major centres of commerce where until now, limited critical commentaries have been available in the English language. In this new six part series of scholarly essays from leading scholars and commentators, each volume will offer an insider's perspective into specific areas of contract law, including: remedies, formation, parties, contents, vitiating factors, change of circumstances, illegality, and public policy, and will explore how these diverse jurisdictions address common problems encountered in contractual disputes. Concluding each volume will be a closing discussion of the convergences and divergences across the jurisdictions. Volume I of this series examines the remedies for breach of contract in the laws of China, India, Japan, Korea, Taiwan, Singapore, Malaysia, Hong Kong, Korea, and Thailand. Specifically, it addresses the readiness of each legal system in their action to insist that parties perform their obligations; the methods of enforcing the parties' agreed remedies for breach; and the ways in which monetary compensation are awarded. Each jurisdiction is discussed over two chapters; the first chapter will examine the performance remedies and agreed remedies, while the second explores the monetary remedies. A concluding chapter offers a comparative overview.

The Oxford Introductions to U.S. Law

Edited by eminent banking law scholar Ross Cranston, this is a collection of essays written in honor of Roy Goode, the Norton Rose Professor of English Law at Oxford and highly esteemed commercial law scholar. The contributors, an international group of distinguished commercial lawyers, address topics including international contracts and sales, credit and security, and commercial arbitration. Making Commercial Law is a truly international collection that will be of great interest to scholars of commercial law worldwide, and to practitioners working in the areas of finance and international banking.

Recent leading cases have demonstrated the urgent need to modernize the learning on breach of trust, which has lagged behind the flourishing scholarship on the creation of trusts. Since breach of trust or fiduciary duty occupies the centre of the legal stage, it comes as a surprise that, although one or two novelists have chosen 'Breach of Trust' as the title to their book, no lawyer has so far thought it necessary to produce a specialized work on the subject. To fill the gap, this book, written by a team of leading trust lawyers from a number of common law jurisdictions, investigates all the principal aspects of the subject. The nature of the trustee's duties and of the liability for breach is closely examined, and all available defences and excuses are reviewed. Two substantial chapters consider the consequences of assisting a breach or receiving trust property from a trustee acting in breach. The book closes with a critical overview of the entire topic. CONTENTS: 1 Robert Chambers 'Liability for Breach'; 2 Joshua Getzler 'The Duty of Care'; 3 Edwin Simpson 'The Conflict of Interest'; 4 David Fox 'Overreaching'; 5 Lionel Smith 'Property Transferred in Breach'; 6 Charles Mitchell 'Assistance'; 7 Peter Birks 'Receipt'; 8 James Penner 'Exemption clauses'; 9 John Lowry and Rod Edmunds 'Honest and Reasonable Breach' ; 10 Jennifer Payne 'Consent'; 11 William Swadling 'Limitation'; 12 Gary Watt 'Laches, Estoppel and Election'; 13 David Hayton 'An Overview'.

The Law Reports of British India

In this book, leading scholars from Australia, Canada, Hong Kong, New Zealand, Singapore, the United Kingdom and the United States deal with important theoretical and practical issues in the law of contract and closely-related areas of private law. The articles analyse developments in the law of estoppel, mistake, undue influence, the interpretation of contracts, assignment, exclusion clauses and damages. The articles also address more theoretical issues such as discerning the limits of contract law, the role of principle in the development of contract doctrine and the morality of promising. With its rich scope of contributors and topics, Exploring Contract Law will be highly useful to lawyers, judges and academics across the common law world. The Law of Contract Damages

Studies in the Contract Laws of Asia

The quantification of contractual money awards is a topic of both significant theoretical interest and immense practical importance. Recent debates have ranged from the availability of gain-based relief to the basis for principles of remoteness and mitigation. While these and other important issues, such as the recovery of damages for non-pecuniary loss, are touched upon, the book's principal objective is to challenge the conventional interpretation of the principle generally acknowledged to govern this area of the law, which Parke B famously laid down in *Robinson v Harman*. According to this conventional interpretation, the objective of all money awards given in accordance with the *Robinson v Harman* principle is simply to 'compensate' the promisee for the 'loss' that can be attributed to the promisor's failure to perform as promised. After challenging this orthodoxy, Dr Winterton proposes a new understanding of the *Robinson v Harman* principle, which draws an important distinction between money awards that substitute for the performance promised and money awards that aim to make good certain detrimental factual consequences that can be attributed to a promisor's breach. In exploring the significance of this distinction, the different principles underpinning the quantification and restriction of each kind of award are explored in addition to some important theoretical issues such as the effect that the occurrence of a breach has on the rights generated by contract formation. The book's unifying objective is to outline a coherent picture of the law of contractual money awards. It will be of interest to judges, practitioners and academics alike. Callaghan's Illinois Statutes Annotated

Inflation is an economic phenomenon that has profound implications for lawyers and jurists, because the great bulk of our laws and legal doctrines have been formulated on the assumption that the value of money remains relatively stable. Inasmuch as such an assumption is no longer tenable in much of the world, it threatens the operation of our most basic legal institutions. In this book, Keith Rosenn shows how inflation affects legal documents like contracts—how it distorts

credit transactions, suits for damages, and laws of taxation—and he tells how current economic practices can be adapted to reduce or eliminate the impact. He explores the possibility of using a comprehensive indexation scheme for coping with inflation. Although Rosenn recognizes the deficiencies of price indexes, he considers the practical and theoretical implications of indexation. His analysis is firmly grounded in a detailed examination of the experience of countries like Argentina, Brazil, Chile, Finland, France, Germany, Israel, and Italy in adapting their legal institutions to the fact of inflation.

Breach of Trust

This book defends the view that an award of an account of profits (or 'disgorgement damages') for breach of contract will sometimes be justifiable, and fits within the orthodox principles and cases in contract law. However there is some confusion as to when such an award should be made. The moral bases for disgorgement damages are deterrence and punishment, which shape the remedy in important ways. Courts are also concerned with vindication of the claimant's performance interest, and it is pivotal in these cases that the claimant cannot procure a substitute performance via an award of damages or specific relief. The book argues that disgorgement damages should be available in two categories of case: 'second sale' cases, where the defendant breaches his contract with the claimant to make a more profitable contract with a third party; and 'agency problem' cases, where the defendant promises the claimant he will not do a certain thing, and the claimant finds it difficult to supervise the performance. Moreover, disgorgement may be full or partial, and 'reasonable fee damages' for breach of contract are best understood as partial disgorgement rather than 'restitutionary damages'. Equitable bars to relief should also be adopted in relation to disgorgement damages, as should allowances for skill and effort. This book will be of interest to contract and commercial lawyers, and will be especially valuable to anyone with an interest in contract remedies and restitution. It draws on case law in a number of common law jurisdictions, primarily England and Wales, and Australia.

Basic Contract Law for Paralegals

Late night comedians and journalists eagerly seized upon the case of an elderly woman who sued McDonald's when she spilled hot coffee in her lap as a prime example of frivolous litigation. But as Rustad and Koenig argue, cases such as these are an incomplete and misleading characterization of tort law. Corporations have successfully waged a public relations battle to create the impression that most lawsuits are spurious, when in fact the opposite is true: tort law plays a crucial role in protecting consumers from dangerous and sometimes life-threatening hazards. Without legal remedies, corporations would suffer no penalty for choosing profits over public health and safety. In Defense of Tort Law is the first book to systematically examine the social, legal and policy dimensions of the tort reform debate. This insightful analysis of solid empirical data looks beyond popular myths about frivolous lawsuits, and tackles a variety of contentious issues: Should punitive damages be capped? Who is favored by tort law? Who loses, and why? Koenig and Rustad's detailed case study analysis also reveals disturbing gender inequities in a legal system that is largely dominated by men. Because women are disproportionately injured by medical products, impermissible HMO cost cutting, medical malpractice and sexual exploitation, restrictions on the rights to recovery in these fields inevitably creates gender injustice. Engaging and up to date, In Defense of Tort Law also identifies aspects of the current law that require further elaboration, including the need for measures to combat cybercrime against consumers.

Law and Inflation

This is the first work to concentrate solely on damages for breach of contract and provides the most comprehensive and detailed treatment of the subject to date. Written by a commercial barrister and academic for both practitioners and scholars, this text explores the familiar principles and the more recent developments of those principles. To assist understanding and practicality, much of the book is arranged by reference to the type of the complaint (such as the mis-provision of services, the non-payment of money, or the temporary loss of use of property), rather than by the more traditional subject-matter specialisms (eg sale of goods, charterparties, surveyor's negligence). Tort decisions are drawn on to the extent that the applicable principles are the same as or usefully similar to those in contract, and there is also detailed coverage of many practically important but often neglected areas, such as damages for lost management time and the proper evidential approach to proving lost profits.
