How to Choose and Buy an RV

A dead man's secrets. A girl's forgotten past. The key to both mysteries is buried within three pages torn from a Civil War diary, raising questions that will pit Sandi Beck against a small-town Southern dynasty, a billionaire developer, and her own conflicting desires. As she untangles 150 years of lies, Sandi is faced with a choice - will she pursue the truth at any cost, even if the price is her own life? In a story that could be ripped from today's headlines, this sequel to Kind Lies

exposes the dark influence of greed and bitterness on the human heart.

This down-to-earth book shows how to make solar work reliably, consistently and economically. It explains what can realistically be run from solar: and what cannot. "From the publishers of a popular series of building books comes Small Homes, which is highly relevant for these times. Getting smaller, rather than larger. Some 75 builders share their knowledge of building and design, with artistic, practical, and/or economical homes in the United States, Canada, England, Scotland, France, Germany, Spain, New Zealand and Lithuania. This is the seventh in a series of highly-graphic books on homemade building, all of which are interrelated. The series, "The Shelter Library Of Building Books," include Shelter, Shelter II (1978), Home Work (2004), Builders of the Pacific Coast (2008), Tiny Homes (2012), and Tiny Homes on the Move (2014). Each of these books has over 1,000 photos, and each 2-page spread is carefully laid out with respect to balance of graphics and clarity of

information. A running theme with them is that people have been inspired by one book to build their own home, and this will be included in a subsequent book. For example, many of the homes in Home Work were inspired by Shelter. And so on. The underlying theme with Shelter's books, which has continued for over 40 years, is that it's possible for you to create your own home with your own hands, using natural materials. Some of these homes are in the country, some in small towns, and some in large cities"--

The Caravan & Motorhome Book

A wealth of information on the wildlife, stories and

history of the islands. For those wishing to visit in small boats or kayaks there are details of: Landings? Camping? Drinking water? Tidal information. Oileain is a detailed guide to almost every Irish offshore island. The guide is comprehensive, describing over 300 islands, big and small, far out to sea and close in by the shore, inhabited and uninhabited. Oileain tells it as it is, rock by rock, good and bad, pleasant and otherwise. It concentrates on landings and access generally, then adds information on camping, drinking water, tides, history, climbing, birds, whales, dolphins, legends or anything else of interest. Oileain will, I hope, appeal to all who go to sea in small boats, divers and yachtsmen as well as kayakers. The sheer level of detail contained in Oileain must surely throw new light on places they thought they knew well. It is not a book about kayaking. It so happens that a practical way of getting to islands is by kayak, and that is how the author gets about. Scuba divers and RIBs get in close too. Yachtsmen get about better than most, and they too enjoy exploring intensively from a dinghy. With the increasing availability of ferries, boatless people will also enjoy Oileain. Offshore islands are the last wilderness in Ireland. Hillwalking is now so popular that there are few untrampled mainland hills. Ninety per cent of offshore islands are uninhabited outside of the first fortnight in August, and eighty per cent even then. You won't meet many other people, if any at all, out beyond an Irish surf line. It is a time of change though, and holiday homes are very much the coming thing in some offshore areas. Sea going will never stop being a great adventure. Therefore, offshore islands are still the preserve of the very few. Now is a golden era for

exploration.

Caravan & Motorhome Electrics

“A lighthearted, entertaining trip down Memory Lane” (Kirkus Reviews), *Don’t Make Me Pull Over!* offers a nostalgic look at the golden age of family road trips—before portable DVD players, smartphones, and Google Maps. The birth of America’s first interstate highways in the 1950s hit the gas pedal on the road trip phenomenon and families were soon streaming—sans seatbelts!—to a range of sometimes stirring, sometimes wacky locations. In the days before cheap air travel, families didn’t so much take vacations as survive them. Between home and destination lay thousands of miles and dozens of

annoyances, and with his family Richard Ratay experienced all of them—from being crowded into the backseat with noogie-happy older brothers, to picking out a souvenir only to find that a better one might have been had at the next attraction, to dealing with a dad who didn't believe in bathroom breaks. Now, decades later, Ratay offers “an amiable guide...fun and informative” (New York Newsday) that “goes down like a cold lemonade on a hot summer's day” (The Wall Street Journal). In hundreds of amusing ways, he reminds us of what once made the Great American Family Road Trip so great, including twenty-foot “land yachts,” oasis-like Holiday Inn “Holidomes,” “Smokey”-spotting Fuzzbusters, twenty-eight glorious flavors of Howard Johnson's ice cream, and the thrill of finding a “good buddy” on the CB radio. An “informative, often hilarious family narrative [that] perfectly captures the love-hate relationship many have with road trips” (Publishers Weekly), *Don't Make Me Pull Over!* reveals how the family road trip came to be, how its evolution mirrored the country's, and why those magical journeys that once brought families together—for better and worse—have largely disappeared.

Kind Lies

Psychological and medical perspectives on sadomasochism have historically been concerned with understanding it as a form of psychopathology. In the past (but still often today) studies of S/M have been concerned with extreme and most often non-consensual acts. However, more recently there has

been growing interest in exploring the meaning of S/M in non-pathological ways. This book directly addresses this development, presenting some of the most recent cutting edge work on S/M by leading international scholars who all seek to understand rather than pathologise. This includes the latest thinking on theory and practice, academic-community pieces, as well as the presentation of new empirical findings across the range of identities and practices that constitute S/M.

Epic Bike Rides of the World

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in *Nikkei Sangyo Shimbun* (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the *Topeka Capital-Journal* and the September 13, 1983 issue of the *Asian Wall Street*

Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst.

The Camper Trailer Book 2/e

In 2004, Lloyd Kahn discovered a group of unique carpenters along the Pacific Coast of North America. Over a two-year period, he made four trips north from his home in the San Francisco Bay Area, up the coast, shooting the photos that appear in this book. To preserve homeowners' privacy, specific locations are not given, but suffice to say this book focuses on the Pacific Coast north from San Francisco up to and around Vancouver Island, British Columbia, latitudes 37 to 49 degrees. There's been a vortex of creative carpentry energy in this part of the world over the last 30 years. Many of the builders shown here got started in the countercultural era of the '60s and '70s, and their work has never been shown in books or magazine articles.

The Autocar

This stylish and inspiring book contains all the information campers need to make the most of the wonderful waterside locations throughout the UK and Ireland. Covering all kinds of camping (caravan, campsite and wild), the book starts by showing how to plan your trip, what gear to take and how to get stuck into all the fantastic water-based activities on offer, such as sailing, kayaking, angling, surfing and wild swimming. Tip boxes, top 10 features and gorgeous photos combine to give readers all the knowledge and

inspiration they need to get out there, whether they're on their own, part of a family or with a group of friends. The main part of the guide is organised by region, but also searchable by activity. Each region has an overview, and within it the best sites to visit, with useful information (best times of year to go, activities on offer, facilities, cost), advice on most attractive pitches, contact details and photos. There is a huge variety of sites here, all with something unique to offer, and helpful maps plot each one clearly. With a Foreword by One Man and his Campervan's Martin Dorey, this is the essential guidebook for all campers, showing how it really is possible to pitch up in paradise.
