A WALL STREET JOURNAL BESTSELLER “Five gritty leaders whose extraordinary passion and perseverance changed history...a gripping read on a timeless and timely topic” —Angela Duckworth, #1 bestselling author of *Grit* An enthralling historical narrative filled with critical leadership insights, *Forged in Crisis*, by celebrated Harvard Business School historian Nancy Koehn, spotlights five masters of crisis: polar explorer Ernest Shackleton; President Abraham Lincoln; legendary abolitionist Frederick Douglass; Nazi-resisting clergyman Dietrich Bonhoeffer; and environmental crusader Rachel Carson. What do such disparate figures have in common? Why do their extraordinary stories continue to amaze and inspire? In delivering the answers to those questions, Nancy Koehn offers a remarkable template by which to judge those in our own time to whom the public has given its trust. She begins each of the book's five sections by showing her protagonist on the precipice of a great crisis: Shackleton marooned on an Antarctic ice floe; Lincoln on the verge of seeing the Union collapse; escaped slave Douglass facing possible capture; Bonhoeffer agonizing over how to counter absolute evil with faith; Carson racing against the cancer ravaging her in a bid to save the planet. The narrative then reaches back to each person's childhood and shows the individual growing—step by step—into the person he or she will ultimately become. Significantly, as we follow each leader's against-all-odds journey, we begin to glean an essential truth: leaders are not born but made. In a

book dense with epiphanies, the most galvanizing one may be that the power to lead courageously resides in each of us. Whether it's read as a repository of great insight or as exceptionally rendered human drama, *Forged in Crisis* stands as a towering achievement.

significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

"Forever Young" is an autobiographical novel dedicated to author's son. The book is a powerful witness of the sorrowful mother, who goes through the mental torture, because of the probate codes of the USA health care, which give absolute decision making power to a legal spouse, disregarding the adult child's parents' will, and by these laws the health care facilities have unlimited rights to hide the unconscious patients and treat them according their 'good faith, ' even if it is an unprofessional mistreatment, as long as it is in 'accordance with generally accepted health care decisions.' (Section 4740, CA Probates Codes). The book addresses the

It is about the most inhuman treatment toward the authority of a mother, parents, in situations when the moral and the divine establishment of the family is being ruined on a 'legal' ground. These health care regulations also secure a free hand to murder the patients in strong confidentiality- disguised as 'a course of treatment' - never scrutinized and disclosed. With Foreword written by Chris Van Gorder (President & CEO, Scripps Health). Healthcare has been undergoing significant changes in recent years with more expected well into the foreseeable future. Now, more than ever, we need leaders who are well-versed in all aspects of leadership. Unfortunately, the skills that made healthcare leaders successful in the past may not be enough to be successful in the future. Managing change requires a very special set of skills. Project management, lean six sigma and other change processes all identify leadership as a key critical success factor. In fact, a recent study by the Healthcare Center for Excellence revealed that lack of leadership was the greatest challenge to implementing healthcare analytics. More alarming was the fact that those in leadership positions did not recognize their role in the change management process. Added to this is the confusing advice on what is needed to be a good leader, when, in actuality, all

that is needed is for the leader to be them self. Leadership is a process that must be prescribed and practiced every day. It is the same way professional athletes worldwide have followed their prescribed training regimen to improve their already exceptional abilities. "Prescribing Leadership in Healthcare" is based on the proprietary 5-step Professional Leadership Process which creates a personalized leadership development program built on an individual's innate qualities and strengths. It is designed as a continually improving process to help leaders at any level of the organization develop and adapt a personalized leadership vision and philosophy for utilization in their daily leadership routine. The program creates better leaders by incorporating the most often overlooked steps that research indicates are essential to better leadership development. Additionally, the book includes the leadership perspectives from interviews with top healthcare executives such as Dr. Toby Cosgrove (President & CEO, Cleveland Clinic), Dr. Laura Forese (Executive VP & COO, New York-Presbyterian), Dr. Michael Hunt (President & CEO, St. Vincent's Health Partners), Nancy Schlichting (Retired CEO, Henry Ford Health Systems) and others. REVIEW HIGHLIGHTS: "The lessons and practices [in the book] will make all of us better leaders and most importantly, will directly benefit those patients and families we serve." -- David Feinberg, President & CEO, Geisinger Health "This is one of the best and most powerful leadership books I have read. One of the greatest examples of a truly successful life we have in Scripture is Joshua. Throughout Exodus, Numbers, and Deuteronomy, Joshua is described as Moses' minister. He was always following the example and leadership of Moses, the man God appointed to lead the children of Israel out of Egypt and into Canaan. Joshua was then chosen to succeed Moses as the new leader of Israel and bring them into the Promised Land. Joshua was not chosen because of a royal lineage or his status in nobility. He had neither of these. He was chosen, I believe because of some very key character qualities that he had. And these characteristics brought God's blessing and success in his life - and in the lives of those around him. As we look at his life, there is an awesome statement said about him in the middle of the book of Joshua. This

statement is the basis of this book: "As the Lord commanded Moses his servant, so did Moses command Joshua, and so did Joshua; he left nothing undone of all that the Lord commanded Moses." (Joshua 11:15) Notice that part I put in bold: "he left nothing undone." This was not his assessment. Neither was it the assessment of his peers. This is the observation that God made and recorded for us. Joshua's testimony was that of accomplishing everything that he was supposed to do. As we look at this thought of "leaving nothing undone," I am not suggesting that you can do everything that you want to do or everything that others want you to do. I am saying that when you find what God wants you to do, develop the right character, and work in God's strength; you can do everything that God wants you to do.

How to Cure Anxiety

Leadership Today is a useful, informative, profound and insightful book that clarifies and sums up various definitions and features of the personality of a true leader. It is of no secret that many people these days clamor for a competent leader. However, it is the author's contention that in order to obtain such dream to manifest into reality, the public must first be able to identify the categories of an efficient leader. Stavros Baroutas brilliantly enumerates certain qualities that separate a leader from a follower, not a very easy task considering how frustrating it may sound when people tend to cease searching for them when one does not seem to meet such expectations.

Whether an attending, a faculty member, or a another type of clinical instructor, believing this can hinder the learning process." Even though UMI published the first edition nearly two decades ago, Gary DePaul's research findings and implications are even more relevant today. From interviews with family-practice specialists from the Carle Clinic Association, Dr. DePaul discovered certain training techniques to be more effective at building specialty-interest area expertise while responsibly protecting patient safety and care. "Nothing tests a leader like a crisis. The highly charged, dramatic events surrounding a crisis profoundly affect the people in an organization and can even threaten the organization's survival. But there are actions a leader can take before, during, and after a crisis to effectively reduce the duration and impact of these extremely difficult situations. At its center, effective crisis leadership is comprised of three things - communication, clarity of vision and values, and caring relationships. Leaders who develop, pay attention to, and practice these qualities go a long way toward handling the human dimension of a crisis. In the end, it's all about the people."

different ways to drive employee engagement and reinforce a strong corporate culture. It's the second book in the goldfish trilogy. The first book was an Amazon Best Seller entitled, What's Your Purple Goldfish. Purple focused on customers, whereby Green focuses on employees. Both books are based on a revolutionary new approach called marketing g.l.u.e. (marketing by giving little unexpected extras). The book is based on the findings of the Green Goldfish Project, an effort which crowd sourced 1,001 examples of signature added value for employees. Key themes emerged from the Project. The book is filled with over 200 examples. PRAISE FOR WHAT'S YOUR GREEN GOLDFISH "Stan is the sherpa that guides executives along the journey between the heart and mind of business stakeholders. Stakeholders aren't always customers though. At a time when company vision and culture matters more than ever, it takes inspired and engaged employees to bring them to life." - Brian Solis, author of What's the Future of Business #WTF, The End of Business as Usual and Engage "So often overlooked, and so very vital to building company value empowering employees to support each other and the brand. Stan Phelps 'gets' it and Green Goldfish will walk you step-by-step though achieving this critical goal." - Ted Rubin, author of Return on Relationship "Great customer centric organizations only exist because of engaged and empowered employees. The Green Goldfish is packed with awesome examples of what world class companies are doing today to inspire and reward their employees. If you see value in truly building an "A Team," Green Goldfish will be, without question, your single best reference." - Chris Zane,

Pick this up, and start engaging your team and making more GREEN - Phil Gerbyshak, author of *The Naked Truth of Social Media* "Our large-scale research shows unequivocally that engaged employees are more likely to work longer, try harder, make more suggestions for improvement, recruit others to join their company, and go out of their way to help customers. They even take less sick time. Companies can tap into the enormous value of engaged employees by following the 15 ideas that Stan lays out in this book." - Bruce Temkin, author of *The Six Laws of Customer Experience* "Too often, the actual employment experience delivered on the job does not measure up to the version sold to job candidates during the interview process. In *What's Your Green Goldfish*, Stan Phelps offers 15 ways to close the gap." - Steve Curtin, author of *Delight Your Customers: 7 Simple Ways to Raise Your Customer Service from Ordinary to Extraordinary* (AMACOM, June 2013) "In *What's Your Green Goldfish*, Stan Phelps brilliantly applies the idea of 'doing a little something extra' for employees. From Management to Leadership

Social and behavioral science has for decades studied and recognized leadership as a social exchange between leaders and followers. But leadership is rather complex, and as such, it tends to lead to an increased interest within and across different disciplines. This book is an attempt to provide theoretical and empirical framework to better understand leadership challenges in various contexts. The authors cover an array of themes that span from an individual level to an organizational and societal level. In this volume, two sections are presented. The first section based on individual level focuses on different leadership styles and abilities, and the other section provides theories to understand leadership in public administration, in industrial settings and in nonprofit organizations.
