### **Contemporary Issues in Curriculum**

This volume presents the results of a comprehensive study of educational leadership faculty and the departments and programs in which they work. It reports the characteristics, activities, and attitudes of educational leadership faculty members involved in universitybased educational leadership preparation programs in 2008 and provides longitudinal comparisons with data from studies conducted since 1972. The findings are compared by type of institution and with respondents grouped by sex, race, administrative experience, type of appointment (tenureline or clinical), length of time in the professoriate, and affiliation with the University Council for Educational Administration and the National Council of Professors of Educational Administration. Findings indicate that while the number of universitybased leadership preparation programs continues to grow, the average faculty size has declined. Among major trends are an increase in female faculty members from 2% of the faculty in 1972 to 45% in 2008 and the reduction in gender differences in activities and attitudes since the mid1980s. Also, over the past few decades, there has been a significant increase in faculty occupying nontenureline positions, having administrative experience, and focusing on leadership in general in contrast to a content specialization. These and other

developments have significant implications for leadership preparation programs and for knowledge production in our field.

incorporated. Coverage of school law has been completely updated reflecting the most recent and most important court decisions and their impact. New and comprehensive information on standards-based leadership and the current controversy about administrative preparation has been added. New Chapter 7, Students Today, examines the evolving nature of today's students and evaluates contemporary research on this subject. "I have found no textbooks on the topic to be superior to this one. The authors have distilled the essence of public school governance and administration and provided it to the reader in a manner that demands his/her reflection. The content is well researched and well presented. I plan on using the text in our program next fall and look forward to the new edition." --Larry W. Brooks, Shenandoah University "This book and its earlier editions are all classic texts for use in intro courses in our field. I'm glad to see a new edition on the horizon. The addition of a recent practitioner on the writing team has vastly improved the focus of the book." --John Daresh, University of Texas, El Paso "I think that the Sergiovanni text continues to offer the best overview of how schools are governed." --Judith Zimmerman, Bowling Green State University

### **The Basic Guide to Supervision and Instructional Leadership**

Over the past two decades, efforts to improve schools have significantly modified role expectations for principals. Today, school-level administrators are expected to

## Where To Download New Myedleadershiplab With Pearson Etext Standalone Access Card For School Law And The Public Schools A

be both visionary leaders and competent managers. Based on the conviction that administration is an amalgam of leadership and management, *The School Principal* emphasizes the need for practitioners to apply conceptual skills to make "what to do" decisions, to apply technical skills to make "how to do" decisions, and to apply relational skills to engage in democratic decision making. Kowalski frames the book with a discussion of the nature of schools, the roles of principals, and their need to improve schools. The book then provides a balanced treatment of leadership and management, covering issues of personal behavior, instructional leadership, relationship building issues, finances, facilities, personnel management, pupil services, and maintaining safe schools. The text closes with discussion of the vital aspects of practice for contemporary principals, addressing problem solving, collaborative change strategies, and personal commitment to being a principal. Special Features: Vignettes introduce the subject matter in the context of common challenges faced by practitioners. Knowledge-Based Questions and Skill-Based Activities prompt readers to engage with and reflect on the chapter content. *The School Principal* aligns with the Educational Leadership Consortium Council (ELCC) Standards. Treating principals as concurrently visionary leaders and competent managers, this excellent text addresses the needs of aspiring and practicing principals, providing the tools to build effective and efficient schools.

Wealth vs. Work: How 1% Victimize 99% is about the vanishing American dream, growing inequality in America, shrinking and struggling middle class, plight of labor and unions, economic decline of the nation, and a broken and unstable world surrounding the U.S. Education is no longer the great equalizer. We are heading toward a world where inherited privilege trumps excellence and meritocracy. Carried far enough, it means the end of striving and the American dream. Few Americans realize or want to admit it. Since recorded history, workers have been victimized by the rich and super rich, treated as fungible and disposable. The early warlords and monarchs have been replaced by the “titans” of industry and “masters of the universe” on Wall Street. The slaves, peasants and serfs have been replaced by miners, factory workers, and service-sector workers. The GM model of the 1950s and 1960s (that permitted labor to become middle class) has been replaced by the Wal-Mart model—characterized by low pay and minimal benefits. By 2025, the economic output of China and India may likely each exceed the U.S. Moreover, the U.S. work force is being increasingly displaced by technology and outsourcing. But we are supposed to be the lucky ones! By historical and geographical accident, the U.S. has been spared most of the world’s poverty and misery. Today, however, the U.S. is heading towards a financial oligarchy—much worse than the aristocratic old world that our Founding Fathers feared and tried to avoid. Yes, the U.S. had a revolution, but in fact it has a new and more powerful elite because the economic pie has expanded several thousand fold since the yeoman farmers’ status was compared to the plantation owner. This book provides a bridge from learning the theory of school administration to the practical problem solving in which school principals and other leaders engage. This book continues to be based on the research indicating linkages between educational leadership and productive schools, especially in terms of outcomes for children. commentary are provided to develop a basic understanding of school law issues and the legal rationale underpinning such law. The case method of studying school law is emphasized. Selected cases present legal concepts in a real world context, assisting students in making the essential connection between more abstract general principles of law and their operational application in schools. This text is revised every three years to present the most current available information. But because the law changes rapidly, this text also provides students with essential skills and tools necessary for basic legal research, case citation, analyzing judicial decisions, and understanding the operations of state and federal systems of government. Lastly, but most importantly, the text is written in a clear, understandable, and interesting manner, to actively engage students in lively discussion, and debate concerning the application of the law in schools. The author provides notes and questions throughout the book to facilitate better understanding of the law and enable instructors to enrich learning through stimulating class discussions."
