Managing Human Resource And Industrial Relations

Scandals and failures in some of the best known international Japanese-owned companies have shown that there is sometimes a considerable difference between the public and internal narratives of Japanese firms. This book explores the extent to which Japanese firms' public claims reflect wider reality. Exploring how and why corporate narrative-management is 'accepted' or 'rejected' by external and internal audiences in Japan, the book clarifies what narrative-management means for Japanese organizations. It argues that the role of narrative-management has become much more prevalent in Japan in recent years, but that it does not serve quite the same role as it does in the Western environments where the theory and practice first emerged. The author presents interview-based case studies within four very different large Japanese organisations, all of which have deployed and loudly announced new restructuring plans based largely on Western models of corporate 'best practice'. The book aims to describe and account for these Japanese corporate narratives, and asks what

they are, why they are deployed and who believes in them. As the first narrative-related work in the Japanese context, this volume provides an insight into the development of Japanese narrative-management. It will appeal to students and scholars of Japanese Business, International Business and Organizational Studies.

Annual report

Our love affair with the digital interface is out of control. We've embraced it in the boardroom, the bedroom, and the bathroom. Screens have taken over our lives. Most people spend over eight hours a day staring at a screen, and some "technological innovators" are hoping to grab even more of your eyeball time. You have screens in your pocket, in your car, on your appliances, and maybe even on your face. Average smartphone users check their phones 150 times a day, responding to the addictive buzz of Facebook or emails or Twitter. Are you sick? There's an app for that! Need to pray?

There's an app for that! Dead? Well, there's an app for that, too! And most apps are intentionally addictive distractions that end up taking our attention away from things like family, friends, sleep, and oncoming traffic. There's a better way. In this book, innovator Golden Krishna challenges our world of nagging, screen-based bondage, and shows how we can build a technologically advanced world without digital interfaces. In his insightful, raw, and often hilarious criticism, Golden reveals fascinating ways to think beyond screens using three principles that lead to more meaningful innovation. Whether you're working in technology, or just wary of a gadget-filled future, you'll be enlightened and entertained while discovering that the best interface is no interface.

In this new book, Rabbi Finkelman draws on the Chofetz Chaim's writings of honesty, integrity, and faith. He leavens his daily selections with stories and comments, so that no page is ever dry. Each day's selection crackles with meaning and challenge. This is a book that should be savored day by day. It should be read aloud to children, family, and study groups.
