How to Build Ford Restomod Street Machines shows you how to modify your vintage Ford to accelerate, stop, corner, and ride as good as - if not better than - Detroit's best new high-performance cars. Don't subject your classic Ford to a life of garage time, trailer rides, outdated factory-original performance, and the occasional Sunday cruise - build it to run hard. Author Tony Huntimer uses over 300 photos to show you how to upgrade your engine, drivetrain, chassis, suspension, body, and interior to make your ride a stand-out performer using factory and aftermarket parts. He even covers many Ford-specific upgrades, including the Granada brake swap and the popular Shelby Mod.

The Boat Rocker is a poetry of life that both presents a philosophy of life and describes an art of living that has been learned the hard way-by actually living a life; by having tasted all the joys life offers and having suffered many of the tragedies and pains life inevitably brings as well. While The Boat Rocker will not help a person to avoid all tragedy and pain-those are a part of every life-it will help everyone who takes it's message to heart to avoid some needless suffering and to get through whatever vale of tears is encountered through a simple act of faith, for fidelity is everything in life-fidelity to self, fidelity to our loved ones, fidelity to our purpose in life, and fidelity to God. These are essential for a well-lived, rewarding life. But love is the heart and soul of faith, and faith is but love made real.
