This book is written for use in the class room. It may, however, be studied just as easily by the field practitioner, and is not too technical in most of its parts to be readily grasped by the layman. It has grown, rather than having been written; it is the expansion of the notes which were tested in the class room for six years, and the writer believes that, with the constant arrangement and betterment to suit the requirements of the students of Chiropractic, this has created a real textbook, rendering easily understood a subject that students have always said was difficult.

Driver's Licensing (CDL) Medical Examination. Dr. Ziegler has examined hundreds of truck drivers, and started to see a common bond as to why many were not achieving the maximum two year certification. Obesity, poor eating habits, and lack of general nutritional knowledge became evident. As a service to the drivers who were struggling with their weight, Dr. Ziegler started to give tidbits and hints on proper eating. It was his hope the truckers would improve not only on their testing, but make lifestyle changes as well. Much to his amazement, several drivers showed immediate results. Dr. Ziegler started to set his advice on paper, and followed through with this book. Included in this book is the number one reason drivers are immediately disqualified; it is not the one most people would guess! Also, several diets are presented, and an interview with a long time, long haul driver who has consistently kept his weight off and maintained excellent health!

“This may be the last book on health that you’ll ever need. Loaded with scientific research to back up every word, the author gives you concise practical advice that is easy to understand and follow. This real bottom-line health information is well documented and referenced, and told in a way that feels like you’re sitting knee to knee in a conversation with an expert who is speaking directly to you. Not just another nutrition or fitness book, this book takes you by the hand and not only tells you WHAT to do, but WHY and HOW. EVERYTHING you need to get back on the road to health, and stay there. The chapter on stress alone could save your life!” “A great collection of scientific health information presented in everyday language. Great for athletes and non-athletes, moms and dads, and even health-conscious doctors who want to improve their treatment results. Anyone who wants to improve their health, no matter what your present condition, should read this book.”
