James Stirling is one of the few postwar architects to whom the word genius can be applied. Formidable, ebullient, self-centred, at times outrageous, he pursued architecture and the creation of buildings with a single-minded intensity, evoking hero-worship and sometimes hatred in the process. Mark Girouard traces Stirling's life from his tough boyhood in Liverpool to the revolutionary buildings of the 1960s - the Engineering Building for Leicester University, the History Faculty Building at Cambridge and the Florey Building at Oxford - and the acclaimed Stuttgart Art Gallery in 1980. Celebrated abroad, in Britain

Stirling's association with Palumbo's plan for a new building in the centre of the City of London divided the architectural world into furious camps, creating fiery debates which lasted until his early death in 1992. The arguments, and the passions, still reverberate today. Mark Girouard's perceptive, entertainign account combines an intimate picture of the man - his personality, his relationships, his life-styl his mania for collecting, his constant doodling with an informed

The poems of architect John Hejduk are almost nonpoetic--still lives of memory, sites of possessed places. They give a physical existence to the words themselves and an autobiographical dimension to the architect. This is the first comprehensive collection of Hejduk's poems to be published outside an architectural setting.

McMorran & Whitby are arguably one of the most unsung practices of post-war British architecture. Led from the late 1950s by Donald McMorran and George Whitby, two indisputable architectural heavyweights of the post-war era, the practice willingly rejected the experimentalism and fleeting faddishness that characterised the dominant paradigm of the age and from which so many of Britain's towns and cities are still blighted. The practice can be seen as part of an evolution in British classical tradition with direct linkages through other eminent figures such as Sir Edwin Lutyens and E. Vincent Harris. Their work found notable favour with public institutions, such as the police, county and city councils, and universities. These include Devon County Hall in Exeter, various buildings at Nottingham University, West Suffolk County Council buildings in Bury St Edmunds, but, above all, numerous significant commissions for the City Corporation such as Wood Street Police Station and the extension to the Central Criminal Courts, commonly known as the New Bailey. This book is the first major

publication on McMorran & Whitby's work, and therefore contains an inspiring combination of contemporary photography and previously unpublished archival material. It is an essential read for architects, students, and historians, not least because it highlights the importance in the arts of seeking longer perspectives than those which, all too often, our own ephemeral epoch permits. This book has been commissioned as part of a series of books on 20th Century Architects by RIBA Publishing, English Heritage and The Twentieth Century Society.
