Clinical Reasoning Cases in Nursing

Case Studies in Nursing Fundamentals

Written by authors who are hospitalists and clinician-educators, Cases in Hospital Medicine uses practical case studies and current medical evidence to guide you expertly through the types of cases seen most often by practicing hospital-based clinicians. This engaging handbook covers the wide range of both broad and specific knowledge required in the hospital environment, while focusing on highly relevant questions and today's best practices. You'll find real-world guidance on essential topics, including commentary on research studies and clinical guidelines.)

Case Studies in Public Health Nursing

Nurse prescribers are now practising within every discipline of nursing and midwifery, both in the community and the hospital setting. This much-needed book is aimed particularly at students on a non-medical prescribing (NMP) course as well as those nurses who are studying for their community practitioner non-medical prescribing qualification as part of the specialist practice programme. The book is also a useful resource for nursing students and registered nurses who administer and/or prescribe medicines. The authors offer a basic introduction to

pharmacological concepts, embedded in specific.

100 Cases in Clinical Medicine, Second Edition

The ultimate, case-based guide for learning and teaching the art of diagnostic reasoning for acute and critical care nurse practitioners. Written by experienced nurse practitioners working in acute and critical care settings, and endorsed by the American Association of Critical-Care Nurses (AACN), *Acute & Critical Care Nurse Practitioner: Cases in Diagnostic Reasoning* presents a wide range of acute and critical care patient cases focusing on diagnosis and management. This authoritative book is designed to help nurse practitioners and students learn how to proceed from a broad differential diagnosis to a specific management plan through expert analysis of patient data. While reconstructing the course of real-life clinical cases, the authors "think out loud" and reveal how they identify pertinent positives and significant negatives to support or refute items on their differential diagnoses list, and further incorporate laboratory and diagnostic testing results to establish a medical diagnosis. Each case includes a description of the management for the identified diagnosis. INCLUDES:

- 71 cases based on real-life clinical scenarios
- Analysis questions and case discussions to enable learners to actively participate in inductive and deductive reasoning
- Cases that can be used to support course work, certification review, and job training

The first of its kind, *Acute & Critical Care Nurse Practitioner: Cases in Diagnostic Reasoning* is an essential learning and teaching resource for students, clinicians, and clinical faculty to master the art of diagnostic reasoning.

Case Studies in Psychiatric Nursing

Awarded first place in the 2019 AJN Book of the Year Awards in the Gerontologic Nursing category second place in the Advanced Practice Nursing category. Gain expert primary care of older adults with a case-based approach to geriatric primary care and multimorbidity management. Written by two leading academic and clinical experts in geriatric primary care, *Case Studies in Geriatric Primary Care and Multimorbidity Management, 1st Edition* uses detailed Exemplar Case Studies and Practice case studies to teach you how to think like an expert geriatric clinician. Because most older adults have more than one condition when seeking care, both Exemplar and Practice Case Studies place a strong emphasis on "multimorbidity" management, (the management of patients with a host of complex, interacting conditions). To provide extensive practice in learning how to think like an expert, case studies reflect the reality that care does not necessarily begin or end in the primary care setting, cases move fluidly from primary care to acute care to inpatient rehabilitation to assisted living to long-term care. Building on foundational introductory chapters, cases also call on you to develop interprofessional collaboration skills and reflect the diversity of today's older adults, in terms of age (young-old to old-old), gender, culture, ethnicity, sexuality, socioeconomic status, and more! As you work through both basic-level and advanced Practice Case Studies, you can make extensive notes in the printed book and then go online to submit answers for grading and receive expert feedback for self-reflection. NEW! Introductory unit on the core principles of caring for older adults gives you a strong foundation in the principles of geriatric primary care and multimorbidity management. NEW! and UNIQUE! Exceptionally detailed, unfolding

Exemplar Case Studies demonstrate how an expert advanced practitioner "thinks clinically" to provide care to older adults with multiple conditions. NEW and UNIQUE! Exceptionally detailed, unfolding Practice Case Studies emphasize patient diversity and multimorbidity management across healthcare settings to help you develop advanced clinical reasoning skills for geriatric primary care. NEW and UNIQUE! Strong emphasis on multimorbidity management focuses on caring for older adults with multiple chronic conditions. NEW! Emphasis on the continuum of care across settings reflects the reality that care does not necessarily begin or end in the primary care setting but can move from primary care to acute care to inpatient rehabilitation to assisted living to long-term care, and so forth. NEW! Online answer submission for grading and expert feedback for self-reflection. NEW! Emphasis on patient diversity reflects the makeup of today's older adult, population in terms of age (young-old to old-old), gender, culture, ethnicity, sexuality, socioeconomic status, and more. NEW! Emphasis on interprofessional collaboration use Exemplar Case Studies and Practice Case Studies to allow you to demonstrate your interprofessional collaboration skills.

Fundamentals of Nursing Test Success

Tap into 150 unique case studies covering all four clinical practice areas: medical-surgical, pediatric, OB/maternity, and psychiatric nursing, all newly organized to facilitate a conceptual approach to teaching and learning. Each case covers a common patient problem, drawn from actual clinical experiences and written by nurses who are clinical experts. Cases include integrated content on pharmacology, nutrition, and diagnostic/laboratory tests to encourage you to think critically about all aspects of patient care. The 7th edition features a new concept-based organization, an enhanced focus on interprofessional collaboration and QSEN, 20 all-new case studies, and updated content throughout to reflect the most current standards of clinical practice.

Pharmacology Case Studies

Rev. ed. of: Pharmacology and the nursing process / Linda Lane Lilley [et al.]. 6th ed. c2011.

Pediatric Primary Care Case Studies

Perfect for: • Bachelor of Nursing Students. • Diploma of Nursing students. Apply theory to practice with the Clinical Cases textbook series! Janine Bothe's Clinical Cases: Medical-Surgical Nursing Case Studies is part of the Clinical Cases textbook series, which offers nursing students a collection of scenarios that are common in a variety of practical settings. Some of the topics covered in Medical-Surgical Nursing Case Studies include: Cardiovascular, Gastrointestinal, Musculoskeletal and Respiratory in relation to medical-surgical nursing. The Medical-Surgical Nursing Case Studies textbook is complete with multiple choice questions throughout the chapters so you can revise and test your knowledge as you progress through the text. Best of all, use Bothe's nursing textbook alongside Lewis' Medical-Surgical Nursing, 3rd Edition by Diane Brown and Helen Edwards to really excel at your Diploma and Bachelor of Nursing courses. Benefit from the logical structure of this

nursing textbook. Medical-Surgical Nursing Case Studies features a clear introduction that explores an existing condition and outlines its symptoms. Further details are then provided to help you form a more complete context, including: patient's conditions, tests, medications and other considerations. Each case study within this nursing textbook provides a thorough conclusion that examines patient outcomes and the case's key points. If you enjoy learning from real life cases, the Clinical Cases textbook series is the perfect educational suite to support your nursing education. Janine Bothe's Clinical Cases: Medical-Surgical Nursing Case Studies is perfect for use during exam preparation or as a study tool, providing an engaging approach to learning and revision. Browse other titles in this series to enhance your knowledge of core nursing skills and theories. Other titles in this series: • Clinical Cases: Fundamentals of Nursing Case Studies by Natasha Scully and Damian Wilson • Clinical Cases: Nursing Care Case Studies by Margaret Webb and Ellie Kirov Other Formats This book is also available as an App via the Apple App Store (<https://itunes.apple.com/au/app/clinical-cases-medical-surgical/id666477607?mt=8>) • Easy-to-understand, logical layout. • 22 case studies covering the body systems. • Multiple choice questions to test your knowledge throughout the textbook. • Rationales provided for all answers. • References for further reading and research. • Designed as an exam preparation and revision tool.

Cases in Hospital Medicine

This exceptional text builds your knowledge of pharmacology by first providing an overview of pharmacologic principles and then teaching you how to apply those principles to clinical practice. Focusing on applying pharmacologic scientific knowledge to clinical practice, it explains diagnostic and treatment reasoning and rational drug selection, while providing useful clinical pearls from experienced practitioners.

Pharmacology

Quite simply, Clinical Decision Making shortens the distance between theory and nursing practice like no other educational tool."--BOOK JACKET.

Clinical Cases: Drug Calculations Case Studies - eBook

Gain a better understanding of the nurse's role in caring for populations and the community. The detailed scenarios in Case Studies in Public Nursing 1st Edition are real-life situations, designed to promote active learning, classroom discussions, and full comprehension of the material. Over 50 engaging scenarios are presented in a consistent format to help you quickly grasp topics such as community assessment, health promotion, and vulnerable populations. Featuring robust online content along with an accompanying user's guide, these case studies are ideal for use in conjunction with a community health textbook. Plus, suggested readings corresponding to Elsevier community health textbooks are included to help foster a rich learning experience! NEW! More than 50 case studies bring community/public health nursing to life helping you to understand how the role of the public health nurse fits into unique populations. NEW! Each case study is organized in a

consistent format featuring objectives, unfolding case scenarios, NCLEX-style review questions, and open-ended critical thinking questions. NEW! A list of relevant Giddens concepts is provided for each case study. NEW! Suggested readings from Elsevier community health textbooks (Nies, Stanhope, Edelman) are included so you can easily cross reference relevant content. NEW! An estimated completion time included for each case study, to help you plan ahead. NEW! Helpful printed User's Guide includes an overview of public health nursing, a full description of each case study, and instructions for using the product.

HESI Case Studies

Corresponding to the chapters in Kee's Pharmacology: A Patient-Centered Nursing Process Approach, 8th Edition, this study guide offers practical activities to help you review and remember essential nursing pharmacology. Hands-on exercises include study questions, case studies, and NCLEX® review questions, making it easier to apply your knowledge to clinical practice and develop clinical reasoning skills. NCLEX® review questions in each chapter include application-level questions and alternate-item format questions. Case studies enhance your understanding of nursing responsibilities in therapeutic pharmacology. Medications and Calculations chapter offers additional opportunities to test your knowledge and skill in drug dosage calculation. 75 sample drug labels familiarize you with the real labels you will see in clinical practice. Answers for all exercises are provided at the back of the book to make studying easier. Study questions are provided in formats including matching, completion, and crossword puzzles. NEW! Updated content reflects the changes to Kee's Pharmacology textbook. NEW! Case study questions focus on developing your clinical reasoning skills. NEW! Rationales are added to the answer key for selected application-level questions and case study questions. NEW safety icons emphasize the nurse's role in patient safety. NEW! Case studies now feature open-ended questions to promote development of clinical reasoning skills.

Clinical Cases: Medical-surgical nursing case studies

Clinical Case Studies for the Family Nurse Practitioner is a key resource for advanced practice nurses and graduate students seeking to test their skills in assessing, diagnosing, and managing cases in family and primary care. Composed of more than 70 cases ranging from common to unique, the book compiles years of experience from experts in the field. It is organized chronologically, presenting cases from neonatal to geriatric care in a standard approach built on the SOAP format. This includes differential diagnosis and a series of critical thinking questions ideal for self-assessment or classroom use.

Nurses and Disasters

This convenient, money-saving package is a must-have for students training for a career in nursing. It includes the Pharmacology and the Nursing Process - text with Study Guide. For further information on each individual product, please click on the link provided.

Pharmacology for Nurses

Case Studies in Pharmacology

Nurse prescribers are now practising within every discipline of nursing and midwifery, both in the community and the hospital setting. This much-needed book is aimed particularly at students on a non-medical prescribing (NMP) course as well as those nurses who are studying for their community practitioner non-medical prescribing qualification as part of the specialist practice programme. The book is also a useful resource for nursing students and registered nurses who administer and/or prescribe medicines. The authors offer a basic introduction to pharmacological concepts, embedded in specific conditions, through case studies and self-assessment questions. By utilising a case study approach, they enable the reader to link pharmacological concepts with clinical practice. Many of the conditions presented will be seen across all healthcare settings. In addition, the comprehensive glossary and list of abbreviations will enable students to understand some of the more technical terms used in the British National Formulary (BNF) and other prescribing sources. Reading this book, and carrying out the numerous self-assessment activities, will give the reader an appreciation of the value of having a sound pharmacological knowledge base in order to deliver safe practice, effective prescribing and improved patient care. Contents include: Introduction How the body affects drugs How drugs affect the body Types of adverse drug reactions and interactions Understanding and using the British National Formulary Adherence Children Stable angina Hypertension Heart failure Chronic obstructive pulmonary disease Neurological problems Gastrointestinal disorders Incontinence in adults Diabetes Mental health problems Eye problems Complex health needs and polypharmacy Palliative care The challenges of non-medical prescribing

Case Studies in Critical Care Nursing

Be ready to prescribe and administer drugs safely and effectively—and grasp all the vitals of pharmacology—with the fully updated *Pharmacotherapeutics for Advanced Practice*, 4th edition. Written by pharmacology nursing experts, this easy-to-read text offers proven frameworks for treating more than 50 common diseases and disorders. Learn how to identify disorders, review possible therapies, then prescribe and monitor drug treatment, accurately. Based on current evidence and real-life patient scenarios, this is the perfect pharmacology learning guide and on-the-spot clinical resource. Absorb the key principles and practical methods for accurate prescribing and monitoring, with . . . NEW chapter on Parkinson's disease,

osteoarthritis, and rheumatoid arthritis NEW and updated therapies, and updated and additional case studies, with sample questions NEW content on the impacts of the Affordable Care Act Updated chapters on complementary and alternative medicine (CAM) and pharmacogenomics Updated evidence-based algorithms and drug tables – Listing uses, mechanisms, adverse effects, drug interactions, contraindications, and monitoring parameters, organized by drug class; quick access to generic and trade names and dosages Quick-scan format organizes information by body system Chapter features include: Brief overview – Pathophysiology of each disorder, and relevant classes of drugs Monitoring Patient Response section – What to monitor, and when Patient Education section – Includes information on CAM for each disorder Drug Overview tables – Usual dose, contraindications and side effects, and special considerations Algorithms – Visual cues on how to approach treatment Updated Recommended Order of Treatment tables – First-, second- and third-line drug therapies for each disorder Answers to Case Study Questions for each disorder – Strengthens critical thinking skills Selecting the Most Appropriate Agent section – The thought process for choosing an initial drug therapy Principles of Therapeutics unit – Avoiding medication errors; pharmacokinetics and pharmacodynamics; impact of drug interactions and adverse events; principles of pharmacotherapy for pediatrics, pregnancy/lactation, and geriatrics Disorders units – Pharmacotherapy for disorders in various body systems Pharmacotherapy in Health Promotion unit – Smoking cessation, immunizations, weight management Women’s Health unit – Including contraception, menopause, and osteoporosis Integrative Approach to Patient Care unit – Issues to consider when presented with more than one diagnosis Standard pharmacotherapeutics text for nurse practitioners, students, and physician assistants Ancillaries – Case Study answers, multiple choice questions and answers for every chapter, PowerPoints, Acronyms List

Nursing Case Management

A Revolutionary New Undergraduate Pharmacology Text for Nursing Students Add the 2014 Nursing Drug Handbook Mobile App Now Available on iTunes and Google Play Pharmacology for Nurses is a groundbreaking new text that teaches the basic concepts of pharmacology to undergraduate nursing students. The text focuses on critical need-to-know information and draws on the experience of fourteen contributing authors in the field of nursing. It takes a new approach to teaching the complex topic of pharmacology through its concise, digestible coverage of material, reader friendly design, and use of images and tables to reinforce content. This text is also intended as a reference for other nursing courses and as part of the nursing professional’s permanent reference library. Designed to reflect real-life clinical applications, Pharmacology for Nurses also provides a fundamental introduction to pharmacology for nursing students. The basics of pharmacokinetics and pharmacodynamics explained in rel

Pharmacy Case Studies

Pediatric Primary Care Case Studies is a collection of pediatric case studies of common health problems of well, acutely ill, and chronically ill children. This text provides students with the opportunity to assess the scenario, differential diagnoses, treatment and educational plans. The cases include history and

physical examination data and provide suggested case solutions. The cases include developmental, behavioral, and disease problems written to include family, cultural, and other contextual issues which must be considered to provide optimal care. Current guidelines and evidence-based research are used to support the care recommendations. Pediatric Primary Care Case Studies provides realistic ambulatory care cases that allows students to develop their critical thinking skills as they work through common situations faced by health care providers.

Pharmacology and the Nursing Process

This timely volume describes and analyzes the nursing response to a variety of historic and recent global disasters that occurred between 1885 and 2012, including Hurricane Sandy. The book is unique in its discussion of cooperation and conflict in the disaster responses regarding the mobilization of individuals across national borders and continents. It examines how partnerships developed, their implications for policy, and how we can use lessons learned to improve care in the future. The book addresses such questions as: How did local, regional, and national communities mobilize for emergency care? What was the role of local nurses in emergency care after disasters? What was the role of the national or international Red Cross, local and federal governments, physicians, nurses, and other first responders? What was the impact of social attitudes and issues of race, class, and gender on the ways nurses and other health care professionals reacted to the disasters? How did unpreparedness for the type or scope of the disaster affect the response? The book will be of value to a wide variety of undergraduate and graduate students in nursing, social work, history, health policy, women's studies, public health, and urban studies. **KEY FEATURES:** Addresses the role of nurses in disaster response Highlights nurses' roles in disasters that occurred in the context of World War II—heretofore unaddressed in the interest of political correctness Discusses policy implications of the different disasters

Understanding Anatomy and Physiology in Nursing

This unique resource contains 40 psychiatric nursing case studies and questions, based on real-life client situations. Organized by difficulty level, the cases in this book and questions about each case history help to keep the focus on the client and the nursing process. Questions and answers are designed to address the need for empathy, attitude adjustment, opened-mindedness, trust building, maintaining confidentiality, limit setting, delegating appropriately, collaborating with other professionals and making decisions. Each scenario is practical and realistic. Critical problems arising in psychiatric nursing are addressed throughout the book, including those both common and rare. The user has an opportunity to decide appropriate nursing action if encountering each of the problems presented, to reflect on whether the nursing staff in the scenario made the best decision, and to provide a rationale for his or her answer. The user can then consult the suggested answer/rationale for remediation, and find what a reasonable and prudent psychiatric nurse would do in that particular situation. Legal and ethical concerns are addressed throughout the cases, which simulate concerns arising in similar real-life situations that nurses find while practicing. Clients with psychiatric problems are encountered in a variety of settings -such as medical or community- so nurses not specializing in psychiatric nursing are represented in some of the cases.

ACUTE & CRITICAL CARE NURSE PRACTITIONER: CASES IN DIAGNOSTIC REASONING

Detailed and up-to-date, this new second edition offers practical case studies covering a wide variety of critical care problems. Each features questions and answers to help readers sharpen their critical-thinking skills and prepare for the CCRN exam. It features new chapters on blunt abdominal trauma and abdominal aortic aneurysm, and updated case studies reflect new treatment modalities and current critical care pharmacology.

Pharmacotherapeutics for Advanced Practice

In this unique book, Dr. Bertorini guides you through more than 100 cases that demonstrate the diagnosis and management of a wide range of common and rare neuromuscular disorders. No other reference boasts such a large array of clinical studies devoted to all areas of this broad topic! Each case study reviews the etiologies, pathogenesis, differential diagnosis, and management of a particular disorder, helping you not only recognize its presentation, but also determine a diagnosis and the best treatment plans for your patients. You'll also find expert guidance on the basic mechanisms of neuromuscular disorders, clinical examination, and diagnostic tests—including EMG, muscle biopsy, genetic testing, and more. More than 100 detailed case studies explore both common and rare neuromuscular disorders and the treatment protocols for each, equipping you with the knowledge you need to confidently manage any challenge. Each case includes a summary of important points or highlights of the study. Case studies are arranged either by complaint or by diagnosis so that you can successfully manage your patients with or without an initial diagnosis. Comprehensive coverage of EMGs and nerve conduction studies and other diagnostic tests, including muscle and nerve biopsies and genetic testing, helps you accurately diagnose nerve, muscle, and neuromuscular transmission disorders. Detailed discussions of treatment plans and commonly used drugs enhance your management of autoimmune disorders, painful neuropathy, dysautonomia, and other neuromuscular disorders. A reader-friendly format takes you step by step through the diagnosis and treatment of neuromuscular disorders, from the basic anatomy and physiology of the nerve and muscle through to clinical evaluation, diagnostic testing, and therapy. More than 350 high-quality illustrations, including full-color patient photographs, biopsies, and EMG tracings, make complex concepts easier to understand and apply.

Porth: Pathophysiology 8th Ed + Bruyere: 100 Case Studies in Pathophysiology

Learn to connect pharmacology concepts with their impact on patient care! Designed to accompany Lehne's Pharmacology for Nursing Care, 10th Edition, this robust workbook – study guide features critical thinking study questions, case studies, and detailed patient teaching scenarios. The 10th edition includes an increased emphasis on patient safety, with added questions to help you learn to spot and remediate medication errors. Plus, an emphasis on priority nursing care with NCLEX® examination-style review questions prepares you for success on the exam. NCLEX®-style alternate format questions, including prioritization questions,

bolster your readiness for the NCLEX Exam while supporting review of core pharmacology content. Reinforcement of key information equips you for success on the NCLEX Examination and for patient safety (a QSEN core competency) in clinical practice. Three-part chapter organization separates content into study questions, NCLEX review and application questions, and dosage calculation questions. Detailed rationales for all prioritization questions are included in the answer key and encompass explanations for both correct and incorrect responses. Prioritization and delegation questions highlighted by special icons equip you to succeed on the NCLEX Exam and in the fast-paced clinical environment. Focus on implications of drugs and drug classes for patient care provides practice application of pharmacology content to the clinical setting. Application - and analysis-level questions highlighted by special icons help you integrate other nursing knowledge such as developmental considerations, laboratory values, and symptoms of adverse effects. Succinct question scenarios eliminate information that is not essential to answering the questions. Answer key is now included in the back of the printed study guide. NEW! Updated content has been thoroughly revised to ensure that the information is completely up-to-date and consistent with the textbook. NEW! Increased emphasis on patient safety features questions on safe patient care that challenge you to select appropriate actions to prevent or remediate medication errors.

Pharmacotherapeutics For Advanced Practice Nurse Prescribers

APPLY THEORY TO PRACTICE WITH THE CLINICAL CASES SERIES Based on real life scenarios, the Clinical Cases series presents quality case studies, complete with answers, to provide nursing students with an opportunity to explore scenarios they are likely to encounter in a variety of practice settings. Clinical Cases: Drug Calculations Case Studies can be used in conjunction with Havard's Nursing Guide to Drugs 9th edition as part of the suite of resources for undergraduate and Diploma of nursing students. Each case starts with an introduction, where the presenting condition and symptoms are outlined and as the case progresses, more details of the patient's condition, tests, medications and other considerations are provided. All cases come together with a conclusion where the patient outcomes are highlighted, followed by a discussion of the key considerations for the case. Multiple Choice Questions are integrated throughout and rationales are provided for all answers. Clinical Cases: Drug Calculations Case Studies is perfect for use during exam preparation or as a study tool, providing an engaging approach to learning and revision. 20 progressive case studies across a range of clinical practice areas including care of the adult patient, paediatrics, aged care, palliative care and midwifery Multiple Choice Questions integrated throughout each stage of the case studies Rationales provided for all answers References for further reading and research.

Introducing Pharmacology

This classic resource offers complete coverage of nursing case management - from theoretical background and historical perspective to practical applications and how the field is changing to meet the challenges of today's health care environment. It

focuses on the implementation of various case management models used throughout the United States and abroad. Key topics include the impact of public policy on health care; understanding the effects of health care reimbursement and its application at the patient level; throughput and capacity management; the impact of the revenue cycle; compliance and regulatory issues; and principles needed to improve case manager-client interaction. This helpful resource is designed to help nurse case managers assess their organization's readiness for case management, prepare and implement a plan to achieve necessary improvements and evaluate the plan's success. Includes numerous proven case management models currently being used in institutions across the country

Organized to take the nursing case manager on a journey from the historical development of nursing case management to the successful implementation of a case management program Offers detailed guidance for planning, implementing, and evaluating a case management program Outlines the planning process with information on key topics such as analysis of the organization, the role of the organization's members, selection criteria for new case managers, case management education, credentialing, and partnerships Features guidelines for implementing a case management program with information on ethical issues, technology, compliance, and regulatory issues Addresses the evaluation component of developing and implementing a case management program by presenting information on outcomes, research, documentation, continuous quality improvement, measuring cost effectiveness, care continuum, and evidence-based practice Presents acute care and community based models of case management Highlights the evolution of collaborative models of case management, addressing key elements of joint decision-making, shared accountability, and interdisciplinary systems of care Addresses health care delivery through case management and public policy by presenting current legislative issues and their affect on both health care reimbursement and the application of care at the patient level Presents the insights, experiences, and advice of nursing administrators who have researched and successfully implemented nursing case management programs in various facilities

A new chapter, Telehealth Applications for Case Management, introduces the concept of telehealth; provides examples of telehealth usage in women's health, chronic disease management, and mental health; and summarizes the evidence that supports telehealth and identifies existing issues and challenges.

Case Management: Life at the Intersection of Margin and Mission, is a new chapter that highlights strategies case managers and others can use to optimize their organizations' financial outcomes while simultaneously improving clinical outcomes for their patients. It emphasizes the work of case managers in the financial arena of health care, including revenue cycle management. A new chapter, Maximizing Reimbursement through Accurate Documentation and Coding, provides tips and strategies on maximizing reimbursement by designing and implementing programs focused on improving the physician's documentation. Effective Management Tools for Case Management Leaders: Strategy Maps and Balanced Scorecards, A Case Study is a new chapter that discusses strategy maps and balanced scorecards and their role in transforming an organization's mission and strategy into a management system and a comprehensive set of performance measures. Features updated information on HIPPA regulation (Health Insurance Portability and Accountability Act), patient safety and confidentiality issues, case management for Medicare patients, Medicare legislation, and utilization management.

Pharmacology Case Studies for Nurse Prescribers

Complex pharmacologic information is simple to learn with this complete study resource! Designed to accompany Lehne's Pharmacology for Nursing Care, 9th Edition, this robust workbook features critical thinking study questions, case studies, and patient teaching scenarios that help you connect pharmacology concepts with their impact on patient care. Plus, an emphasis on priority nursing care with NCLEX examination-style review questions prepares you for success on the exam. NCLEX Examination-style questions are included in each chapter. NEW! NCLEX-style alternate format questions including prioritization questions, bolster your readiness for the NCLEX Exam while supporting review of core pharmacology content NEW! Increased emphasis on patient safety features questions on safe patient care that challenge you to select appropriate actions to prevent or remediate medication errors. NEW! Detailed rationales for all prioritization questions are included in the answer key and encompass explanations for both correct and incorrect responses.

Lehne's Pharmacotherapeutics for Nurse Practitioners and Physician Assistants

Trounce's Clinical Pharmacology for Nurses E-Book

Saunders Nursing Survival Guide: Pharmacology, 2nd Edition is a study and review aid that provides students with additional information on this extensive and difficult subject area. It offers a visual, interactive approach that clearly explains topics such as drug pharmacodynamics, pharmacotherapeutics, and pharmacokinetics. Visual cues help the student retain the information by expressing the material in a fun, engaging manner with activities created to appeal to students with different learning styles. NCLEX® review questions are included at the end of each chapter review and test the students' understanding of key topics. Take Home Points highlight the most important points to study or use in the clinical atmosphere. Caution Notes alert readers to urgent information about dangerous conditions and how to avoid them. Lifespan Notes point out age-related variations in signs and symptoms, nursing interventions, and patient teaching. Culture Notes highlight possible variations related to a patient's cultural background. WebLinks direct readers to the Internet for additional resources. New introductory chapter highlights information on Drug Concepts pertinent to pharmacology. New chapter on drugs used to treat neuropsychiatric disorders covers the most important drugs, including anxiolytics/sedative-hypnotics, antidepressants, antipsychotics, and mood stabilizers. New information on anti-migraine medications gives students a better understanding of pain relief for patients. Revised cardiovascular section presents the material in a more streamlined approach. Revised NCLEX® review questions include new alternate item format questions, as well as 80 new questions. What You WILL LEARN familiarizes students with clear chapter objectives. Tell Us What YOU Think page directs students to the Saunders Nursing Survival Guide survey site where their feedback is gathered.

Pharmacology Case Studies for Nurse Prescribers

Thinking. Doing. Caring. Connect nursing theory to clinical practice with 46 in-depth, real-world case studies. For each case study, answer questions that call on you to recall facts, understand nursing concepts, apply critical thinking, and sharpen your clinical reasoning skills in common clinical situations.

Neuromuscular Case Studies E-Book

Knowledge gained within the individual areas of law and ethics, pharmaceuticals, pharmacology and pathology are tested by each example, bringing together all areas taught on the degree course. Each chapter contains five case studies, starting with uncomplicated cases and increasing in complexity as they expand.

Clinical Case Studies for the Family Nurse Practitioner

With the important part played by nurses in the administration of drugs and in recording their effects, an understanding of pharmacology and its application to patient care is an integral part of pre-registration nursing education. This popular textbook gives an up-to-date account of the action and use of drugs in the treatment and prevention of disease, as well as exploring the principles underlying drug usage. The eighteenth edition of this highly successful textbook builds on the foundation of its predecessors by bringing the text fully up to date with developments in the world of clinical pharmacology and current trends in clinical practice.

Study Guide for Pharmacology

Written by a distinguished nursing professional with over 25 years of experience, Pharmacology Case Study Workbook provides nursing students with an opportunity to apply pharmacology concepts to real-world situations. The text features 50 case studies based on real-life clinical situations that challenge students to think critically and develop effective problem-solving skills. Case studies present patients' medication history, enabling students to learn about the disease process from the point of medication use - an approach used in actual clinical practice. Other features include a review of key terms, home and intensive care scenarios, and a list of variables that must be considered in order to conduct an appropriate case analysis. Also present are a series of questions that will help guide students in developing effective ways to handle the scenario. Perfect for individual or group use, Pharmacology Case Studies is a valuable tool to help prepare nursing students for clinical practice!

Nursing Care Case Studies

Covers all the key aspects of anatomy and physiology that nursing students need to know in short, concise and easily accessible chapters. Whilst using case study scenarios commonly encountered by nurses in clinical practice, to help students to apply this anatomy and physiology knowledge to their everyday working life.

Study Guide for Pharmacology for Nursing Care - E-Book

100 Cases in Clinical Medicine is an indispensable revision tool for medical students preparing for clinical examinations or OSCEs. Using scenarios which mimic daily life, the cases will interest students in clinical problems and help them develop their clinical reasoning skills, with each case presenting details of a patient's medical history and the key findings of a clinical examination, together with initial investigation results for evaluation. Key questions then prompt the student to evaluate the patient, and reach a decision regarding their condition and the possible management plan, while the answer pages will help the student to understand the processes that a clinician goes through in dealing with the problems presented. Contents are organised to provide a quick review of each body system, with a selection of cases relevant to that specific system, then the majority are presented randomly to mimic real life in a GP surgery or emergency department. New to this edition: a review of each body system as well as random cases; new page design with a second colour used throughout; and brought up-to-date with 25% new cases.

Case Studies in Geriatric Primary Care and Multimorbidity Management

Annotation. Based on real life scenarios, the Clinical Cases series presents quality case studies, complete with answers, to provide nursing students with an opportunity to explore scenarios they are likely to encounter in a variety of practice settings. Clinical Cases: Nursing Care Case Studies is perfect for use during exam preparation or as a study tool, providing an engaging approach to learning and revision.

Pharmacology and the Nursing Process⁷

This new edition of Introducing Pharmacology remains an accessible and relevant introduction for nursing and healthcare students who are new to pharmacology, as well anyone looking to refresh their knowledge of the subject. Focused and engaging, the text balances accessibility with depth. Coverage of anatomy and physiology as well as pathophysiology helps to relate the subject to practical realities and makes this text stand out. It includes: Concise explanations of how drugs work in the human body. Explains the underlying physiology and pathophysiology necessary for an understanding of the action of drugs. All of the common drug groups that practitioners are likely to encounter in clinical practice. New to this edition: Additional chapter on cancer and anti-cancer drugs. New sections, including general anaesthetics, hay-fever and prescribing for special groups such as children, pregnant women and the elderly. Updated to include the latest UK prescribing guidelines. New case-studies, relating pharmacological theory to clinical practice. Inclusion of a new glossary of key terms and definitions.

Pediatric Nursing

Immerse Yourself in the Role of a Pediatric Nurse Develop the clinical judgment and critical thinking skills needed to excel in pediatric nursing with this innovative, case-based text. Pediatric Nursing: A Case-Based Approach brings the realities of practice to life and helps you master essential information on growth and

development, body systems, and pharmacologic therapy as you apply your understanding to fictional scenarios based on real clinical cases throughout the pediatric nursing experience. Accompanying units leverage these patient stories to enrich your understanding of key concepts and reinforce their clinical relevance, giving you unparalleled preparation for the challenges you'll face in your nursing career. Powerfully written case-based patient scenarios instill a clinically relevant understanding of essential concepts to prepare you for clinicals. Nurse's Point of View sections in Unit 1 help you recognize the nursing considerations and challenges related to patient-based scenarios. Unfolding Patient Stories, written by the National League for Nursing, foster meaningful reflection on commonly encountered clinical scenarios. Let's Compare boxes outline the differences between adult and pediatric anatomy and physiology. Growth and Development Check features alert you to age and developmental stage considerations for nursing care. The Pharmacy sections organize medications by problem for convenient reference. Whose Job is it Anyway? features reinforce the individual responsibilities of different members of the healthcare team. Analyze the Evidence boxes compare conflicting research findings to strengthen your clinical judgment capabilities. How Much Does It Hurt? boxes clarify the principles of pediatric pain relevant to specific problems. Hospital Help sections alert you to specific considerations for the hospitalization of pediatric patients. Priority Care Concepts help you confidently assess patients and prioritize care appropriately. Patient Teaching boxes guide you through effective patient and parent education approaches. Patient Safety alerts help you quickly recognize and address potential safety concerns. Interactive learning resources, including Practice & Learn Case Studies and Watch & Learn Videos, reinforce skills and challenge you to apply what you have learned. Learning Objectives and bolded Key Terms help you maximize your study time. Think Critically questions instill the clinical reasoning and analytical skills essential to safe patient-centered practice. Suggested Readings point you to further research for more information and clinical guidance.
