Circular Relative to Textbooks for Elementary and High Schools

Literacy skills are the cornerstone upon which students' knowledge, self-esteem, and future educational opportunities are built. But far too many teachers lack the time, materials, and specialized knowledge required to address these skills adequately. To that end, Climbing the Literacy Ladder is a one-stop shop to help teachers plan and differentiate literacy instruction for all students from prekindergarten through 5th grade. Literacy educator Beverly Tyner presents plans for small-group instruction that addresses elementary students' six

developmental stages of reading and writing: emergent, beginning, fledgling, transitional, fluent, and independent. To help teachers support students' literacy development, this book also provides - Characteristics of readers and writers at each stage. - Lesson plans that target each of the research-based instructional components (fluency, word study, vocabulary, and comprehension). - Authentic classroom scenarios and conversations. - Practical classroom strategies and activities. - Advice for when to move students to the next stage. If students cannot read with comprehension by 3rd grade, then their educational future is cast in doubt. Climbing the Literacy Ladder will not only help you grow as a competent and empowered literacy teacher but also ensure that your students continue to travel a clear and unobstructed educational road. This book is a co-publication of ASCD and ILA.

Forthcoming Books

How can teachers make sure that all students gain the reading skills they need to be successful in school and in life? In this book, Karen Tankersley describes the six foundational "threads" that students need to

study in order to become effective readers: phonemic awareness, phonics and decoding, vocabulary, fluency, comprehension, and higher-order processing. For each area, the author explains how students acquire the reading skills they need and offers a series of skill-building strategies and activities that teachers can use in the classroom. Although reading is perhaps most intensely taught in the kindergarten and 1st-grade classrooms, Tankersley emphasizes that helping students become lifelong readers is a task for all teachers, including content-area teachers in middle and high schools. The *Threads of Reading* addresses key questions about literacy, such as * What makes a difference in reading achievement? * How much reading time is enough? * How can teachers use writing to build reading skills? * How can teachers help students make meaning from their reading? The strategies in this book address many situations, from individual instruction to small- or large-group instruction, from kindergarten to high school. Teachers will appreciate the multitude of activities provided, and administrators will learn to better evaluate the reading programs in place in their districts and schools. Grounded in both research and "teacher lore" from actual classrooms, this book is a solid guide to helping students become lifelong readers. Latter-Day Prophets Since 1844. This volume is the third of three on Church History and the Doctrine and Covenants. It covers Church history during the administration of all of its Prophet-Prophets since Joseph Smith. It begins with the succession of the Apostles after Joseph Smith's martyrdom, the building of the Nauvoo Temple, and the trek to the west of the Latter-day Saint pioneers. We follow them through Iowa, Winter Quarters, and on to Utah. We witness the colonization of the state of Deseret, while the rest of the country suffered from Civil War. Then we follow events through the administrations of all of the 19th-Century, 20th-Century, and 21st-Century prophets from John Taylor to Thomas S. Monson. We become familiar with the early lives, missions, marriages, and callings of each of these prophets,

seeing how the Lord prepared them for the particular time that they led the Church. We finish with a look toward the future as we await the Second Coming of our Lord. The cover features a beautiful photograph of the Salt Lake Temple, taken at dusk during the Christmas season from the roof of the Joseph Smith Memorial Building.

Practical, effective, evidence-based reading interventions that change students' lives. *Essentials of Understanding and Assessing Reading Difficulties* is a practical, accessible, in-depth guide to reading assessment and intervention. It provides a detailed discussion of the nature and causes of reading difficulties, which will help develop the knowledge and confidence needed to accurately assess why a student is struggling. Readers will learn a framework for organizing testing results from current assessment batteries such as the WJ-IV, KTEA-3, and CTOPP-2. Case studies illustrate each of the concepts covered. A thorough discussion is provided on the assessment of phonics skills, phonological awareness, word recognition, reading fluency, and reading comprehension. Formatted for easy reading as well as quick reference, the text includes bullet points, icons, callout boxes, and other design elements to call attention to important information. Although a substantial amount of research has shown that most reading difficulties can be prevented or corrected, standard reading

remediation efforts have proven largely ineffective. School psychologists are routinely called upon to evaluate students with reading difficulties and to make recommendations to address such difficulties. This book provides an overview of the best assessment and intervention techniques, backed by the most current research findings. Bridge the gap between research and practice. Accurately assess the reason(s) why a student struggles in reading. Improve reading skills using the most highly effective evidence-based techniques. Reading may well be the most important thing students are taught during their school careers. It is a skill they will use every day of their lives; one that will dictate, in part, later life success. Struggling students need help now, and *Essentials of Understanding and Assessing Reading Difficulties* shows how to get these students on track.
