Moral Reasoning and Statecraft

The Publishers' Trade List Annual

The focus of this inquiry, by the Science and Technology Committee, was the support by the UK Government for the Beagle 2 project developed as part of the European Space Agency's (ESA) Mars Express mission. The Committee found the Government showed enthusiasm for this project, but was unable to provide a guaranteed financial backing for the development of a lander, resulting in a failure to secure sufficient sponsorship income, which was subsequently seen to have a detrimental impact on the project's success. The Committee feels, that Government needs to put in place a system that can deal with major financial commitments at short notice. In hindsight, the development of the lander and orbiter separately is seen as wrong, impeding the flexible co-ordination of the mission, leading to tensions between the Beagle 2 consortium, ESA and other contractors. Further, there was a lack of co-ordinated oversight between these three groups, and therefore a failure to identify important weaknesses in the mission. Despite the failure of Beagle, the Committee does see some positive potential for future projects, both in scientific and educational benefits, but that the costs of such projects would benefit from greater participation by other organizations.

T.C. Memorandum Decisions

The term "technological fix" should mean a fix provided by technology--a solution for all of our problems, from medicine and food production to the environment and business. Instead, technological fix has come to mean a cheap, quick fix using inappropriate technology that usually creates more problems than it solves. This collection sets out the distinction between a technological fix and a true technological solution. Bringing together scholars from a variety of disciplines, the essays trace the technological fix as it has appeared throughout the twentieth century. Addressing such "fixes" as artificial hearts, industrial agriculture and climate engineering, these essays examine our need to turn to technology for solutions to all of our problems.

Composed by nine of his former students on the occasion of the Miller Center's tenth anniversary, these essays commemorate Dr. Kenneth W. Thompson's educational leadership and support. It is fitting that the contributors to this volume have chosen to present Dr. Thompson with a collection of essays devoted to moral reasoning and statecraft. As teacher and scholar, Dr. Thompson returns time and time again to explore the moral resources of statecraft and to probe the normative foundations of political choice. Contributors to this volume are Reed Davis, Alberto R. Coll, Farhang Rajaei, W. David Clinton, Daniel G. Lang, Nicolai N. Petro, Robert A. Strong, Ian Graig, Gale A. Mattox and Brian E. Klunk. Includes a complete bibliography of Dr. Thompson's writings. Co-published with the Miller Center of Public Affairs.
