The Wiley CPAexcel Study Guides have helped over a half million candidates pass the CPA Exam. This volume contains all current AICPA content requirements in Financial Accounting and Reporting (FAR). The comprehensive four-volume paperback set (AUD, BEC, FAR, REG) reviews all four parts of the CPA Exam. With

3,800 multiple-choice questions. The CPA study guides provide the detailed information candidates need to master or reinforce tough topic areas. The content is separated into 48 modules. Unique modular format—helps candidates zero in on areas that need work, organize their study program, and concentrate their efforts. Comprehensive questions—over 3,800 multiple-choice questions and their solutions in the complete set (AUD, BEC, FAR, REG). Guidelines, pointers, and tips show how to build knowledge in a logical and reinforcing way. Arms test-takers with detailed text explanations and skill-building problems to help candidates identify, focus on, and master the specific topics that may need additional reinforcement. Available in print format.

A Hands-On Approach to Electrical Design Electrical Design of Commercial and Industrial Buildings teaches students the critical components of electrical design through an integrated approach that combines fundamental theory with hands-on practice. By taking an applied-learning approach to instruction, this text explains electrical principles, design criteria, codes, and other key elements of the design process, then guides students through each step as they create their own electrical design plans. A companion Student Resource CD-ROM accompanies the printed textbook with sample plans - accompanied by example equipment lists, lighting fixture schedules, and calculation templates - provides students with a comprehensive framework for experiential learning. As an integrated learning tool, Electrical Design of Commercial and Industrial Buildings is both an essential teaching guide for electrical design instructors and an enduring reference book for students and professionals.

Field Guide to the Common Grasses of Oklahoma, Kansas, and Nebraska

Carving Nature at its Joints? In order to map the future of biology we need to understand where we are and how we got there. Present day biology is the realization of the famous metaphor of the organism as a *bete ^ machine* elaborated by Descartes in Part V of the *Discours*, a realization far beyond what anyone in the seventeenth century could have imagined. Until the middle of the nineteenth century that machine was an articulated collection of macroscopic parts, a system of gears and levers moving gasses, solids, and liquids, and causing some parts of the machine to move in response to the force produced by others. Then, in the nineteenth century, two divergent changes occurred in the level at which the living machine came to be investigated. First, with the rise of chemistry and the particulate view of the composition of matter, the forces on macroscopic machine came to be understood as the manifestation of molecular events, and functional biology became a study of molecular interactions. That is, the machine ceased to be a clock or a water pump and became an articulated network of chemical reactions. Until the first third of the twentieth century this chemical view of life, as reflected in the development of classical biochemistry treated the chemistry of biological molecules in much the same way as for any organic chemical reaction, with reaction rates and side products that were the consequence of statistical properties of the concentrations of reactants.

Poetry. "I read in a glossary of mining terminology that prize means to lever or loosen with a pry bar or pick. And the term suggests the noun for what is gained: a prize. In COAL TOWN PHOTOGRAPH, Pauletta Hansel prizes memory for the resource that it is. Throughout, this book dives into the challenge of the past as place. Its journey is from underground-darkness to a state of earned brightness. As she tells us in the title poem: 'I am from / a place that could not hold me, / never even tried. Come morning, / mist of evening rain, a ghost above a mirrored sun.' We should prize the work of this traveler forever."--Roy Bentley

From the acclaimed author of A Natural History of the Piano, the captivating story of the 1958 international piano competition in Moscow, where, at the height of Cold War tensions, an American musician showed the potential of art to change the world. April of 1958--the Iron Curtain was at its heaviest, and the outcome of the Tchaikovsky International Piano Competition seemed preordained. Nonetheless, as star musicians from across the globe descended on Moscow, an unlikely favorite emerged: Van Cliburn, a polite, lanky Texan whose passionate virtuosity captured the Russian spirit. This is the story of what unfolded that spring--for Cliburn and the other competitors, jurors, party officials, and citizens of the world who were touched by the outcome. It is a behind-the-scenes look at one of the most remarkable events in musical history, filled with political intrigue and personal struggle as artists strove for self-expression and governments jockeyed for prestige. And, at the core of it all: the value of artistic achievement, the supremacy of the heart, and the transcendent freedom that can be found, through music, even in the darkest moments of human history.

In this first book devoted to the genesis, failure, and lasting legacy of Ulysses S. Grant's comprehensive American Indian policy, Mary Stockwell shows Grant as an essential bridge between Andrew Jackson's pushing Indians out of the American experience and Franklin D. Roosevelt's welcoming them back in. Situating Grant at the center of Indian policy development after the Civil War, *Interrupted Odyssey: Ulysses S. Grant and the American Indians* reveals the bravery and foresight of the eighteenth president in saying that Indians must be saved and woven into the fabric of American life. In the late 1860s, before becoming president, Grant collaborated with Ely Parker, a Seneca Indian who became his first commissioner of Indian affairs, on a plan to rescue the tribes from certain destruction. Grant hoped to save the Indians from extermination by moving them to reservations, where they would be guarded by the U.S. Army, and welcoming them into the nation as American citizens. By so doing, he would restore the executive branch's traditional authority over Indian policy that had been upended by Jackson. In *Interrupted Odyssey*, Stockwell rejects the common claim in previous Grant scholarship that he handed the reservations over to Christian missionaries as part of his original policy. In part because Grant's plan ended political patronage, Congress overturned his policy by disallowing Army officers from serving in civil posts, abandoning the treaty system, and making the new Board of Indian Commissioners the supervisors of the Indian service. Only after Congress banned Army officers from the Indian service did Grant place missionaries in charge of the reservations, and only after the board falsely accused Parker of fraud before Congress did Grant lose faith in his original policy. Stockwell explores in depth the ousting of Parker, revealing the deep-seated prejudices that fueled opposition to him, and details Grant's stunned disappointment when the Modoc murdered his peace commissioners and several tribes—the Comanche, Kiowa, Cheyenne, and Sioux—rose up against his plans for them. Though his dreams were interrupted through the opposition of Congress, reformers, and the tribes themselves, Grant set his country firmly toward making Indians full participants in the national experience. In setting Grant's contributions against the wider story of the American Indians, Stockwell's bold, thoughtful reappraisal reverses the general dismissal of Grant's approach to the Indians as a

complete failure and highlights the courage of his policies during a time of great prejudice.

"There is no one quite like Barbara Kingsolver in contemporary literature," raves the Washington Post Book World, and it is right. She has been nominated three times for the ABBY award, and her critically acclaimed writings consistently enjoy spectacular commercial success as they entertain and touch her legions of loyal fans. In *High Tide in Tucson*, she returns to her familiar themes of family, community, the common good and the natural world. The title essay considers Buster, a hermit crab that accidentally stows away on Kingsolver's return trip from the Bahamas to her desert home, and turns out to have manic-depressive tendencies. Buster is running around for all he's worth -- one can only presume it's high tide in Tucson. Kingsolver brings a moral vision and refreshing sense of humor to subjects ranging from modern motherhood to the history of private property to the suspended citizenship of human beings in the Animal Kingdom. Beautifully packaged, with original illustrations by well-known illustrator Paul Mirocha, these wise lessons on the urgent business of being alive make it a perfect gift for Kingsolver's many fans.

Distant Planet

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

Whether you're interested in becoming a handyman or developing artisanal woodworking skills, the place to begin is by learning the fundamentals of using

basic workshop tools correctly. The place to find out how is right here. Make: Tools is shop class in a book. Consumer-level 3D printers and CNC machines are opening up new possibilities for makers. But there will always be a need for traditional workshop skills and tools. Charles Platt's Make: Tools applies the same approach to its subject matter as his bestselling Make: Electronics -- in-depth explanations and hands-on projects that gradually increase in level of challenge. Illustrated in full color with hundreds of photographs and line drawings, the book serves as a perfect introduction to workshop tools and materials for young adults and adults alike. Platt focuses on basic hands tools and assumes no prior experience or knowledge on the part of the reader. The projects all result in fun games, toys, and puzzles. The book serves as both a hands-on tutorial a reference that will be returned to again and again.

Modifying Production Cylinder Heads

Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon, Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In *Howling at the Moon*, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing *Thriller* (and how, after it won seven Grammys, Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the success of "Sexual Healing"—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff's clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence

for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, *Howling at the Moon* is a blistering *You'll Never Eat Lunch in this Town Again* of the music industry.

The latest Scandinavian publishing phenomenon is not a Stieg Larsson-like thriller; it's a book about chopping, stacking, and burning wood that has sold more than 200,000 copies in Norway and Sweden and has been a fixture on the bestseller lists there for more than a year. Norwegian Wood provides useful advice on the rustic hows and whys of taking care of your heating needs, but it's also a thoughtful attempt to understand man's age-old predilection for stacking wood and

passion for open fires. An intriguing window into the exoticism of Scandinavian culture, the book also features enough inherently interesting facts and anecdotes and inspired prose to make it universally appealing. The U.S. edition is a fully updated version of the Norwegian original, and includes an appendix of U.S.-based resources and contacts.

Annotation Advanced guide to distributed applications using PowerBuilder 9. This book addresses development Web and Intranet-based systems, including Web Services, Portals, Application-Servers, XML, and Mobile Access. Content provides both specific implementation techniques and architectural patterns for distributed application development. PowerBuilder 9, to be released Q4 2002, introduces many highly-anticipated distributed development features including support for Web Services and Java application servers. Version 9 of PowerBuilder introduces many features designed specifically to blend the traditional strength of PowerBuilder as a rapid Client/Server application development tool with the new emerging models for distributed application development. PowerBuilder developers need PowerBuilder-specific information on interacting with Java application servers, such as WebSphere, WebLogic, and Sybases Enterprise Application Server (EAServer), and Web Service development. This book presents the new capabilities of PowerBuilder 9 along with the architecture and patterns required to create distributed systems in PowerBuilder. William Green and his team of writers are among the most prominent members of the Sybase community, having helped found TeamSybase in 1994. They have written and served on the advisory boards for every major PowerBuilder publication and have authored three books -- PowerBuilder 5 Object-Oriented Design and Development, PowerBuilder Foundation Class (PFC), and Secrets of the PowerBuilder Masters. They respond to several hundred newsgroups and listserv postings daily. They are active consultants implementing PowerBuilder-based solutions and serve on key community advisory panels within Sybase.
