### **Advanced Skills in Executive Protection**

Effective and practical security officer training is the single most important element in establishing a professional security program. The Effective Security Officer's Training Manual, Second Edition helps readers improve services, reduce turnover, and minimize liability by further educating security officers. Self-paced material is presented in a creative and innovative style. Glossaries, summaries, questions, and practical exercises accompany each chapter.

### **Bodyguard Manual**

This latest edition of Effective Security Management retains the qualities that made the previous editions a standard of the profession: a readable, comprehensive guide to the planning, staffing, and operation of the security function within an organization. All chapters are completely updated with the focus on practical methods that the reader can put to use in managing an effective security department. The Fourth Edition covers current computer applications that

can help in the administrative, managerial, and supervisory aspects of the security function. In addition, two new chapters address employee management in detail. The first, Lifestyle Management for Managers, will discuss motivation at work: the how, when, where, what and why of self-motivation for the boss. The second, The Departing Employee, will discuss the exit interview and the information that can be gained in that process. Also, back by popular demand, are the author's "Jackass Management Traits," 32 humorous portrayals of negative management traits that illustrate very real problems that can undermine the effectiveness of supervisors and managers. \* Includes a new chapter on the use of statistics as a security management tool \* Contains complete updates to every chapter while retaining the outstanding organization of the previous editions \* Recommended reading for The American Society for Industrial Security's (ASIS) Certified Protection Professional (CPP) exam

### **Ten Strategies of a World-Class Cybersecurity Operations Center**

This book addresses evaluations for child protection, one of the most delicate legal arenas in which forensic mental examiners play a part. The evaluations are highly specialized, requiring child clinical specialization, a knowledge of the legal and social context, and a thorough understanding of the professional and ethical

guidelines for child protection evaluations. This volume provides that context, and presents established empirical foundations from the behavioral, social, and medical sciences. Finally, the book provides a detailed "how-to" for practitioners, including information on data collection, interpretation, report writing and expert testimony.

### **Child Protective Services**

Ammunition Technician/Officer (AMMO) Training and Readiness (T&R) Manual (NAVMC 3500.89A) details the required events for standardization training of Marines and Navy personnel whose primary mission is the handling of ammunition and explosives. ### **Can I See your Hands**

A first of its kind, this book-of, by, and for the noncommissioned officer and petty officer-is a comprehensive explanation of the enlisted leader across the U.S. Armed Services. It complements The Armed Forces Officer, the latest edition of which was published by NDU Press in 2007, as well as the Services' NCO/PO manuals and handbooks. Written by a team of Active, Reserve, and retired senior enlisted

leaders from all Service branches, this book defines and describes how NCOs/POs fit into an organization, centers them in the Profession of Arms, explains their dual roles of complementing the officer and enabling the force, and exposes their international engagement. As Chairman of the Joint Chiefs of Staff General Martin E. Dempsey writes in his foreword to the book, "We know noncommissioned officers and petty officers to have exceptional competence, professional character, and soldierly grit-they are exemplars of our Profession of Arms." Aspirational and fulfilling, this book helps prepare young men and women who strive to become NCOs/POs, re-inspires serving enlisted leaders, and stimulates reflection by those who have retired from or left active service. It also gives those who have never worn the uniform a better understanding of who these exceptional men and women are, and why they are properly known as the "Backbone of the Armed Forces."

### **Evaluation of Parenting Capacity in Child Protection**

Since the first edition of Security and Loss Prevention was published in 1983, much has changed in security and loss prevention considerations. FEMA's Community Emergency Response Team (CERT) Basic Training Instructor Guide is a critical program in the effort to engage everyone in America in making their communities safer, more prepared, and more resilient when incidents occur. Community-based preparedness planning allows you and others interested from your community to prepare for and respond to anticipated disruptions and potential hazards following a disaster. As individuals, we can prepare our homes and families to cope during that critical period. Through pre-event planning, neighborhoods and worksites can also work together to help reduce injuries, loss of lives, and property damage. Neighborhood preparedness will enhance the ability of individuals and neighborhoods to reduce their emergency needs and to manage their existing resources until professional assistance becomes available. The purpose of the CERT Basic Training is to provide you and others in your community who complete this course with the basic skills that they will need to respond to their community's immediate needs in the aftermath of a disaster, when emergency services are not immediately available. This course will be beneficial to individuals who desire the skills and knowledge required to prepare for and respond to a disaster. Instructors for these community courses usually range from skilled fire and rescue instructors that have completed the CERT Train-the Trainer course and are knowledgeable about the CERT model, different types of hazards that present greatest risks for communities, local building structures that may

present greatest hazard in disaster events, community's emergency operation plans, and licensed Paramedics or Emergency Medical Technicians and nurses for providing hands-on knowledge relating to disaster medical operations Related items: FEMA's companion product-- CERT Basic Training Participant Manual can be found here: <https://bookstore.gpo.gov/products/sku/027-002-00627-5> Emergency Management & First Responders publications can be found here: <https://bookstore.gpo.gov/catalog/security-defense-law-enforcement/emerg>
