Principles of Economics

The new edition of this classic text covers the latest developments in American gun policy including the most recent shooting incidents that persist in plaguing the American landscape. Continuing a multi-decade trend, crime generally remains low throughout the US, but mass shootings have increased in both number and lethality, stoking greater support for gun laws among the public. Two seismic political events are highlighted in the eighth edition. The first is the ascendance

of the gun safety movement, culminating in numerous electoral victories for gun law supporters in 2018 congressional and state races around the country. This outcome, which contributed to the Democrats' capture of the House of Representatives for the first time since 2008, also demonstrates that support for stronger gun laws could be a winning issue for proponents in 2020 and beyond. The second political development featured is the financial, political, and legal crises that beset the nation's oldest and most powerful gun group, the National Rifle Association. These crises are sufficiently grave that they may pose an existential threat to the organization's traditional dominance in the realm of gun politics. Author Robert J. Spitzer has long been a recognized authority on gun control and gun policy. His even-handed treatment of the issue--as both a member of the NRA and the Brady Center--continues to compel national and international interest, including appearances on major media such as the PBS NewsHour. The eighth edition of *The Politics of Gun Control* provides the reader with up-to-date data and coverage of gun ownership, gun deaths, school shootings, border patrols and new topics including universal background checks, limits on large capacity ammunition magazines, and "red flag" laws. New to the Eighth Edition Covers the ascendance of the Second Amendment sanctuary and gun safety movements, resulting from heinous shootings in Las Vegas and Parkland, Florida. Tracks the financial, political, and legal crises that threaten the dominance of the National Rifle Association. Examines new policy measures including universal background checks, limits on large capacity ammunition magazines, the bump stock controversy, and "red flag" laws, among others.

Selected Readings in Public Finance

Recent policy debates about the future of Social Security and Medicare have been dominated by the issue of personal versus societal responsibility. Significant changes now being considered would increase the level of privatization and tilt these programs away from defined benefit toward defined contribution models. This annual volume of the National Academy of Social Insurance examines the concept of introducing choice into the Social Security and Medicare programs, how it would be defined and structured, and what sort of safeguards would be needed to protect program participants. The ideas, from representatives of the public and private sectors, range from tinkering to overhauling the programs to make them more responsive and cost-effective. The contributors provide an overview of the history and fundamental values of social insurance, discuss options for reforming Social Security and Medicare, review the benefits and drawbacks of expanding choice options, explore the types of mechanisms needed to protect consumers if market-based reforms are adopted, and address the political likelihood of Social Security and Medicare reforms. The essays in this volume give parameters to the debate over the future of Social Security and Medicare, and reflect the range and diversity of views which will shape these two hallmark social insurance programs for decades to come.

Fundamentals of Corporate Finance

Public Finance 8/e benefits from the combined efforts of Harvey Rosen's market-leading book and new co-author Ted Gayer's research and government agency experience. Ted recently served as a Senior Economist on the President's Council of Economic Advisors and is currently a member of the EPA's Science Advisory Board. Additionally, Rosen served on the President's Council of Economics Advisers, 2003-2005, as a member and chairman. As a result, the 8th edition maintains the strengths of previous editions but is enhanced with new material and current examples from public finance literature and the policy world. It includes substantive changes that reflect the progress that has been made in the field of public finance. These changes may be divided into three categories: new organization, new material, and new pedagogical features. As with previous editions, the book continues to draw upon the latest research while never losing sight of the reality it is supposed to describe, always drawing the links between economic analysis and current political issues.

American Public Policy, 8th Edition + Issues for Debate in American Public Policy, 12th Edition Package

Appropriate for introductory courses in Financial Management and Corporate Finance. While organized to fit the course structure of the majority of undergraduate corporate finance and financial management courses, concepts are grounded in examples and language highly familiar to today's students. Long-term financial decisions are discussed before short-term decisions to emphasize the valuation approach throughout the text. The book also illustrates how the concepts can apply to many personal situations.

Technical Communication

Comprehensive and truly accessible, Technical Communication guides students through planning, drafting, and designing the documents that will matter in their professional lives. Known for his student-friendly voice and eye for technology trends, Mike Markel addresses the realities of the digital workplace through fresh samples and cases, practical writing advice, and a companion Web site — TechComm Web — that continues to set the standard with content developed and maintained by the author. The text is also available in a convenient, affordable e-book format.

Economics U. S. A.

Alfred Marshall, Principles of Economics (1890) – Founder of Modern (Neo-classical) Economics. His book Principles of Economics was the dominant textbook in economics for a long time and it is considered to be his seminal work.

Social Security and Medicare

Guell's Issues in Economics Today presents economic theory brought to life through current issues with an engaging, conversational style. The 8th edition includes 8 theory chapters introducing the core topics in microeconomics and macroeconomics, and a selection of 40 short issues chapters, from which instructors can pick and choose the issues of most interest to their students. This format allows maximum flexibility for instructors to lay a foundation of theory first or dive right into coverage of today's current issues. In addition, issues can be organized along themes such as social policy, health and education policy, election year issues, international issues, and business issues, or combined with outside content. Guell's 8th edition provides content that is timely and relevant for students, flexible enough to fit any course design.

Public Budgeting Systems

The much anticipated fourth edition of Craig Deegan's Financial Accounting Theory delivers authoritative and completely up to date material with the discussion of both existing theories and newer theories that have surfaced as financial reporting has become more international. This edition includes a new selection of modern 'Accounting Headlines' which provide current examples of organisations and individuals putting accounting theory into practice in both local and global settings. Financial Accounting Theory covers additional topics such as critical perspectives, public sector accounting and fair value. Workflows and processes are presented using enhanced visual charts to help demonstrate how accounting works in practice. Deegan presents the concepts in a clear and straightforward style, while challenging students to think critically about the range of accounting theories. Financial Accounting Theory provides a sound basis for readers contemplating further research and develops habits of analytical reasoning and critical thinking.
