### **Fundamentals of Nursing NCLEX Practice Quiz 14 (25**

Signs and Symptoms SMA linked to chromosome 5 (SMN-related), types 0-4. In spinal muscular atrophy (SMA) types 0 through 4, symptoms vary on a continuum from severe to mild based on how much functional SMN protein there is in the nerve cells called motor neurons.. ("SMN" stands for survival of motor neuron.) The more SMN protein there is, the later in life symptoms begin and the milder the

### **Diseases - SMA - Signs & Symptoms | Muscular Dystrophy**

Option A: Because of restricted respiratory movement, a recumbent, immobilize patient is at particular risk for respiratory acidosis from poor gas exchange; atelectasis from reduced surfactant and accumulated mucus in the bronchioles, and hypostatic pneumonia from bacterial growth caused by stasis of mucus secretions. 25.

### **Pulmonary Secretions Seminars In Respiratory**

Pulmonary - 2 \* You are a respiratory therapist working at a 200 bed community hospital. A female patient with severe COPD has been receiving home care for the past six months. She is now back in the hospital in what her physician describes as an "end-stage" condition. She is also unable to adequately clear her secretions.

## **Bing: Pulmonary Secretions Seminars In Respiratory**

Tuberculosis is diagnosed by finding Mycobacterium tuberculosis bacteria in a clinical specimen taken from the patient. While other investigations may strongly suggest tuberculosis as the diagnosis, they cannot confirm it. A complete medical evaluation for tuberculosis (TB) must include a medical history, a physical examination, a chest X-ray and microbiological examination (of sputum or some

## **Pneumonia - Wikipedia**

Pneumonia is an inflammatory condition of the lung primarily affecting the small air sacs known as alveoli. Symptoms typically include some combination of productive or dry cough, chest pain, fever and difficulty breathing. The severity of the condition is variable. Pneumonia is usually caused by infection with viruses or bacteria, and less commonly by other microorganisms.

## **Pulmonary Function Testing - Clinical Respiratory Diseases**

Pulmonary function testing provides a method for objectively assessing the function of the respiratory system. The tests do not always diagnose specific conditions but should be used to gain a greater understanding of a patients' clinical problem. Questions which may be answered with pulmonary function tests include:
