Master Techniques in Blepharoplasty and Periorbital Rejuvenation

Effectively avoiding, recognizing, and managing complications is integral to your operative success. Let a multidisciplinary team of experts in otolaryngology, plastic surgery, oral and maxillofacial surgery, and general surgery guide you through the full range of complications associated with every type of head and neck procedure

. . . so you will be equipped to produce the most favorable outcomes for even the most challenging cases! Expert, comprehensive, multidisciplinary coverage of head and neck complications helps you to safely incorporate new surgical techniques into your practice. An emphasis on complication prevention and recognition assists you in avoiding the "complication cascade." Coverage of both acute and long-term care of patients with head and neck complications prepares you to make effective choices in both instances. A new "Quality of Life" section examines the controversies that often surround selecting one procedure over another, illuminating why certain procedures aren't always best for some patients. A new section on complications of facial plastic and reconstructive surgery equips you to perform these techniques with greater confidence. A consistent, practical chapter format helps you focus on key clinical and surgical considerations. A new, more cohesive full-color illustration program richly captures visual nuances of clinical presentation and operative technique. A bonus CD-ROM allows you to use all of the images from the book in electronic presentations.

Techniques in Ophthalmic Plastic Surgery

Facial Plastic Surgery

This beautifully illustrated new book represents the state-of-the-art in facial cosmetic surgery, offering a unique multidisciplinary approach. In providing a comprehensive treatment of all the topics in facial cosmetic surgery, the book draws on the skills and talents of the leading practitioners in dermatology, plastic

surgery, facial plastic surgery, and oculoplastic surgery. Every procedure presented is tackled by physicians from two different specialties, each bringing their own insights to the problem at hand. In every case, these specialists are pioneers and leaders in their field of aesthetic facial surgery.

Dermatologic Surgery

A comprehensive atlas of oculoplastic surgical procedures. This text provides a concise, practical guide to recognizing the anatomy of the eyelid and gives a step-by-step description of common and alternative operative techniques.

Ophthalmic Plastic Surgery

Insightful case studies span all aspects of cosmetic eyelid surgery, including complications, in this unique text. Dr. Mauriello presents his techniques, including newer ones, developed during his more-than-20 years' experience with blepharoplasty. The first three chapters—preoperative evaluation of patients undergoing cosmetic eyelid surgery, surgical principles of cosmetic upper and lower eyelid blepharoplasty, and complications of cosmetic eyelid surgery—are written by Dr. Mauriello and include alternative techniques by several experts. Subsequent chapters on surgical controversies and adjunctive office procedures are written by contributors with editorial commentary by Dr. Mauriello.

Oculofacial, Orbital, and Lacrimal Surgery

Traditionally, professional medical and surgical society meetings, journals, and texts are single-specialty driven to accommodate specific specialists with information most important to them. A consequence of this structure is that it can create an unintentional and artificial barrier to sharing knowledge that can benefit patient outcomes. Cosmetic and reconstructive surgeons, more than ever, are seeking to know what other specialists are doing. This publication, the first of a series, focuses on the brow and upper eyelid rejuvenation and presents varied and complementary techniques from the core specialties of Plastic surgery, Oculoplastic surgery, Facial plastic surgery, and Dermatology to address all aspects of rejuvenation procedures of the upper face. Surgical and non-invasive techniques are presented concisely, focusing on time-tested as well as novel procedures. The most talented and accomplished subspecialists in their respective fields provide insights into such topics as Preoperative Evaluation for the Upper Eyelid and Brow; Aesthetic Enhancements in Upper Blepharoplasty; Asian Upper Lid Blepharoplasty; Prevention and Intraoperative Management of Blepharoplasty Complications; Ptosis Repair in Aesthetic Blepharoplasty; Adjunctive Fat Grafting of the Brow/Upper Lid; The Open Brow Lift; Adjunctive Skin Care of the Brow and Upper Lid; among many others. Specific techniques, Patient perspective and goals, and clear anatomic descriptions are presented with each procedure, with several offering technique videos. Guest editors Babak Azizzadeh and Guy Massry strongly believe that, with more and varied practitioners with different training taking on cosmetic and reconstructive surgeries or procedures, transparency of information is essential in order to expose the best information to all practitioners of this art and science.
