Planning Guide for Maintaining School Facilities

Marple has been an educator for 30 years, including positions as an elementary school teacher, reading teacher, principal, and superintendent. Here she provides a practical guide for operating effective school systems through the establishment of three core components: minimum organizational requirements, a management system, and an improvement process. Functioning together, these three components are designed to reduce politicized interference in the decision-making activities of school boards, administrators, educators and the community.
