The American Journey

This seminar was established to encourage ongoing interaction between geometers at Stanford University and the University of California (Berkeley, Davis, and Santa Cruz). Over the years, lectures presented have provided a panorama of developments in symplectic and contact geometry and topology, Poisson geometry, quantization theory, and applications. This volume includes papers by several of the distinguished seminar participants. The diversity of the topics from the seminar are reflected in the informative presentations. A wide range of topics are presented in the book, including symplectic topology, Hamiltonian dynamics, quantum cohomology and mirror symmetry, infinite-dimensional symplectic geometry, the theory of Hamiltonian group actions, and quantization.

Notes on the Geology of Northern California

Drawing on two decades of research this social and political history of North-Western Ghana traces the creation of new ethnic and territorial boundaries, categories and forms of self-understanding, and represents a major contribution to debates on ethnicity, colonialism and the 'production of history'. It explores the creation and redefinition of ethnic distinctions and commonalities by African and European actors, showing that ethnicity's power derives from a contradiction: while ethnic identities purport to be non-negotiable, creating permanent bonds, stability and security, the boundaries of the communities created and the associated traits and practices are malleable and adaptable to specific interests and contexts.

World History

Bestselling author Tracie Peterson continues her saga of life and love in the rugged Alaskan Territory with the second volume of the ALASKAN QUEST series. When Pinkerton agent Helaina Beecham's obsession with capturing a dangerous fugitive dulls her judgment, she is kidnapped and carried off into the wilderness just as an early winter is approaching. Now her only hope is that Jacob Barringer--the man who has captured her heart--will find her before it is too late. (Alaskan Quest Book 2)

The Railway Engineer

Describes the literature on critical/emancipatory and interpretive models for community empowerment, emphasizing information published since 1988, including case studies especially relevant to economic empowerment. Other annotations describe materials dealing with the role of the economy in community empowerment, self-sufficiency, and development. Economic development studies that enhance culture-specific values, traditions, and productive relationships are given special attention.

World Geography

Perfect for the anti-aviary (or bird fanatic with a sense of humor), this snarky illustrated handbook is equal parts profane, funny, and—let's face it—true. Featuring 50 common North American birds, such as the White-Breasted Butt Nugget and the Goddamned Canada Goose (or White-Breasted Nuthatch and Canada Goose for the layperson), Kracht identifies all the idiots in your backyard and details exactly why they suck with humorous, yet angry, ink drawings. Each entry is accompanied by facts about a bird's (annoying) call, its (dumb) migratory

pattern, its (downright tacky) markings, and more. With migratory maps and tips for birding, plus musings on the avian population and the ethics of birdwatching, this is the essential guide to all things wings. No need to wonder what all that racket is anymore!
