THE SUNDAY TIMES BESTSELLER 'If you have the slightest interest in unidentified flying objects, you owe it to yourself to read what Nick Pope has to say.' The Independent 'A provocative book, written in a reasoned, dispassionate manner.' Review of Books An overview of the UFO mystery, written by the man who used to run the British Government's UFO project. This is a true insider's account of the phenomenon, and lifts the lid not just on classic cases like Roswell and the Rendlesham Forest incident, but on less well known cases too. This groundbreaking and highly controversial book highlights cases from the US, the UK, and the rest of the world, and Nick draws on his first-hand government experience to reveal what the authorities really know and think about UFOs, alien abductions, crop circles and animal mutilations. Open Skies Closed Minds was featured on Newsnight, serialised in the Daily Mail and reached number three in the hardback non-fiction list, staying in the top ten for ten weeks.

Australian goldminers were among the first white men to have sustained contact with Papua New Guineans. Some Papua New Guineans welcomed them, worked for them, traded with them and learnt their skills and soon were mining on their own account. Others met them with hostility, either by direct confrontation or by stealthy ambush. Many of the indigenous people and some miners were killed. The miners were dependent on the local people for labourers, guides, producers of food and women. Some women lived willingly in the miners' camps, a few were legally married, and some were raped. Working conditions for Papua New Guineans on the claims were mixed; some being well treated by the miners, others being poorly housed and fed, ill-treated, and subject to devastating epidemics. Conditions were rough, not only for them but for the diggers too. This book, republished in its original format, shows the differences in the experience of various Papua New Guinean communities which encountered the miners and tries to explain these differences. It is a graphic description of what happens when people from vastly different cultures meet. The author has drawn on documentary sources and interviews with the local people to produce, for the first time, a lively history.

This book is a compilation of recent global measures to conserve bio-resources and manage biotic and abiotic stresses. It highlights emerging issues related to agriculture, abiotic and biotic stress factors, ethnic knowledge, climate change and global warming, as well as natural resources and their sustainable management. It also focuses on the consolidated efforts of scientists and academics engaged in addressing a number of issues related to resource management and combating stresses in order to protect the Earth. Crop production and productivity have been significantly improved, however, there have been no corresponding practical advances in sustainable agriculture. This book offers a wide range of affordable approaches to managing bio-resources with a focus on sustainability. Lastly, it describes research highlights and future areas of research.

According to a longstanding interpretation, book religions are agents of textuality and logocentrism. This volume inverts the traditional perspective: its focus is on the strong dependency between scripture and aesthetics, holy books and material artworks, sacred texts and ritual performances. The contributions, written by a group of international specialists in Western, Byzantine, Islamic and Jewish Art, are committed to a comparative and transcultural approach. The authors reflect upon the different strategies of »clothing« sacred texts with precious materials and elaborate forms. They show how the pretypographic cultures of the Middle Ages used book ornaments as media for building a close relation between the divine words and their human audience. By exploring how art shapes the religious practice of books, and how the religious use of books shapes the evolution of artistic practices this book contributes to a new understanding of the deep nexus between sacred scripture and art.

When crime hits Manhattan's rarefied circles, Stone Barrington finds himself in the bull's-eye in this #1 New York Times bestseller. Stone Barrington seems to have a knack for being in the wrong place at the wrong time. When Manhattan's elite are beset by a series of clever crimes—and Stone is a material witness—he and his former partner Dino Bacchetti find themselves drawn into the world of high-end security and fraud, where insider knowledge and access are limited to a privileged few, and the wealthy are made vulnerable by the very systems meant to keep them safe. As Stone and Dino delve deeper into their investigation, they learn that the mastermind behind the incidents may have some intimate ties to Stone and that the biggest heist is still to come.

The Indian military setback against the Chinese attack in 1962 was high time for an honest soul-searching. Quite a few books written by Army officers have tried to tell their version of the untold story. Brig. Dalvi's account of the Sino-Indian War is by far the most remarkable and authentic. He was present in the theatre of war throughout, commanded a brigade and was held captive by the Chinese for seven months. In discussing the day-to-day events from 8 September to 20 October 1962 the author graphically tells the truth which only an actual participant could experience and know. The background of the war is drawn from his first-hand information as a high-ranking commander.

Schlieren and shadowgraph techniques are basic and valuable tools in various scientific and engineering disciplines. They allow us to see the invisible: the optical inhomogeneities in transparent media like air, water, and glass that otherwise cause only ghostly distortions of our normal vision. These techniques are discussed briefly in many books and papers, but there is no up-to-date complete treatment of the subject before now. The book is intended as a practical guide for those who want to use these methods, as well as a resource for a broad range of disciplines where scientific visualization is important. The colorful 400-year history of these methods is covered in an extensive introductory chapter accessible to all readers.

Credit rating agencies face a difficult trade-off between delivering both accurate and stable ratings. In particular, its users have consistently expressed a preference for rating stability, driven by the transactions costs induced by trading when ratings change frequently. Rating agencies generally assign ratings on a through-the-cycle basis whereas banks' internal valuations are often based on a point-in-time performance, that is they are related to the current value of the rated entity's or instrument's underlying assets. This paper compares the two approaches and assesses their impact on rating stability and accuracy. We find that while through-the-cycle ratings are initially more stable, they are prone to rating cliff effects and also suffer from inferior performance in predicting future defaults. This is because they are typically smooth and delay rating changes. Using a through-the-crisis methodology that uses a more stringent stress test goes halfway toward mitigating cliff effects, but is still prone to discretionary rating change delays.

Cultural Variations and Business Performance: Contemporary Globalism

“ this book was written from start to finish by one extremely dedicated and erudite individual. The author has done an excellent job of covering the many topics that fall under the umbrella of computational biology for vaccine design, demonstrating an admirable command of subject matter in fields as disparate as object-oriented databases and regulation

of T cell response. Simply put, it has just the right breadth and depth, and it reads well. In fact, readability is one of its virtues—making the book enticing and useful, all at once” Human Vaccines, 2010 " This book has several strong points. Although there are many textbooks that deal with vaccinology, few attempts have been made to bring together descriptions of vaccines in history, basic bioinformatics, various computational solutions and challenges in vaccinology, detailed experimental methodologies, and cutting-edge technologies This book may well serve as a first line of reference for all biologists and computer scientists" -Virology Journal, 2009 Vaccines have probably saved more lives and reduced suffering in a greater number of people than any other medical intervention in human history, succeeding in eradicating smallpox and significantly reducing the mortality and incidence of other diseases. However, with the emergence of diseases such as SARS and the threat of biological warfare, vaccination has once again become a topic of major interest in public health. Vaccinology now has at its disposal an array of post-genomic approaches of great power. None has a more persuasive potential impact than the application of computational informatics to vaccine discovery; the recent expansion in genome data and the parallel increase in cheap computing power have placed the bioinformatics exploration of pathogen genomes centre stage for vaccine researchers. This is the first book to address the area of bioinformatics as applied to rational vaccine design, discussing the ways in which bioinformatics can contribute to improved vaccine development by introducing the subject of harnessing the mathematical and computing power inherent in bioinformatics to the study of vaccinology putting it into a historical and societal context, and exploring the scope of its methods and applications. Bioinformatics for Vaccinology is a one-stop introduction to computational vaccinology. It will be of particular interest to bioinformaticians with an interest in immunology, as well as to immunologists, and other biologists who need to understand how advances in theoretical and computational immunobiology can transform their working practices.

The Treasury of the Encyclopaedia Britannica

Volume XIII of The Marcus Garvey and Universal Negro Improvement Association Papers covers the twelve months between the UNIA's second international convention in New York in August 1921 and the third convention in August 1922. It was a particularly tumultuous time for Garvey and the UNIA: Garvey's relationship with the UNIA's top leadership began to fracture, the U.S. federal government charged Garvey with mail fraud, and his Black Star Line operation suffered massive financial losses. This period also witnessed a marked shift in Garvey's rhetoric and stance, as he retreated from his previously radical anticolonial positions, sought to court European governments as well as the leadership of the Ku Klux Klan, and moved against his political rivals. Despite these difficult and uncertain times, Garveyism expanded its reach throughout the Caribbean archipelago, which, as Volume XIII confirms, became the UNIA's de facto home in the early 1920s. The volume's numerous reports from the UNIA's Caribbean divisions and chapters describe what it was like for UNIA activists living and working under extremely repressive circumstances. The volume's major highlight covers the U.S. military's crackdown on the UNIA in the Dominican Republic, as documented in the correspondence between John Sydney

de Bourg—whom Garvey had dispatched to monitor the situation—and U.S. and British government officials. In addition to UNIA divisional reports and de Bourg's extensive correspondence, Volume XIII contains a wealth of newspaper articles, political tracts, official documents, and other sources that outline the complex responses to Garveyism throughout the United States, the Caribbean, and Europe, all the while documenting this watershed moment for Garvey and the UNIA.

Development of transgenic crop plants, their utilization for improved agriculture, health, ecology and environment and their socio-political impacts are currently important fields in education, research and industries and also of interest to policy makers, social activists and regulatory and funding agencies. This work prepared with a class-room approach on this multidisciplinary subject will fill an existing gap and meet the requirements of such a broad section of readers. Volume 2 with 13 chapters contributed by 41 eminent scientists from nine countries deliberates on the utilization of transgenic crops for resistance to herbicides, biotic stress and abiotic stress, manipulation of developmental traits, production of biofuel, biopharmaceuticals and algal bioproducts, amelioration of ecology and environment and fostering functional genomics as well as on regulations and steps for commercialization, patent and IPR issues, and compliance to concerns and compulsions of utilizing transgenic plants.

White field, black seeds - who can sow? Although the riddle from which these words are taken comes from oral tradition, it refers to the ability to write, a skill which in most Nordic countries was not regarded as necessary for everyone. And yet a significant number of ordinary people with no access to formal schooling took up the pen and produced a variety of highly interesting texts: diaries, letters, memoirs, collections of folklore and handwritten newspapers. This collection presents the work of primarily Nordic scholars from fields such as linguistics, history, literature and folklore studies who share an interest in the production, dissemination and reception of written texts by non-privileged people during the long nineteenth century.

The following pages contain an account of certain mathematical recreations, problems, and speculations of past and present times. I hasten to add that the conclusions are of no practical use, and most of the results are not new. If therefore the reader proceeds further he is at least forewarned. At the same time I think I may assert that many of the diversions - particularly those in the latter half of the book - are interesting, not a few are associated with the names of distinguished mathematicians, while hitherto several of the memoirs quoted have not been easily accessible to English readers.

Following the format of Fitzroy Dearborn's highly successful International Dictionary of Historic Places and International Dictionary of University Histories, the International Dictionary of Library Histories provides basic information for each institution - location and holdings - followed by an extensive (1,000-5,000 word) essay on its history as well as a Further Reading list. In addition, the dictionary includes introductory articles on the history of various types of libraries and a library history in various regions of the world. The dictionary profiles more than 200 institutions from around the world, including the world's most important research libraries and other libraries with globally or regionally notable collections, innovative traditions, and significant and interesting histories. The essays take advantage of the growing scholarship of library history to provide insightful overviews of each institution, including not only the traditional values of these libraries but their innovations as well, such as developments in automated systems and electronic delivery. The profiles will emphasize the unique materials of research in these institutions - archives, manuscripts, personal and institutional papers. The introductory articles on types of libraries include topics ranging from theological libraries to prison libraries, from the ancient to the digital. An international team of more than 200 leading scholars in the field have contributed essays to the project.

Unearthly Disclosure is a story of alien bases, alien contacts and abductions, genetic mutants, animal mutilations, and government paranoia. Here, Timothy Good, one of the world's most respected authorities on the alien phenomenon, reveals for the first time sensational information provided to him by high-level military and scientific sources, who confirm that aliens have established subterranean and submarine bases on Earth and that extra-terrestrial contact has been made with a select group in the US military and scientific intelligence community. Among numerous revelations in this book are those involving the alien creature photographed by Filiberto Caponi in Italy. The author spent several years investigating this controversial case and commissioned an Expert Witness checked by the Law Society to analyse Caponi's astonishing photographs. Published for the first time, this unique story forms the central section of Unearthly Disclosure.

Beaten Down By Blood

An inspirational story of love, loss, and resilience. As spring approached, Linda focused on beginning her first marriage until she received the devastating news of her mother's terminal illness. No one could have anticipated the avalanche of tragedy that filled the next ten years. What surprised Linda the most was that when she eventually reflected on that most painful decade of her life, she realized how each tragedy gave her more courage and strength to face the next one. Perfectly Negative introduces a cast of real, relatable characters who will have you crying, laughing, and ultimately rejoicing in Linda's triumph and determination to make sense of the overwhelming heartbreak she endured. This insightful memoir reveals nuggets of wisdom to reassure you as you face your own life lemons/lessons.

Beaten Down by Blood: The Battle of Mont St Quentin-Peronne 1918 charts an extraordinary journey from the trenches facing Mont St Quentin on 31 August 1918 through the frenetic phases of the battle until the final objectives are taken on 5 September. This is the story, often told in the words of the men themselves, of the capture of the 'unattackable' Mont and the 'invincible' fortress town of Péronne, two of the great feats of Australian forces in the First World War. The Author places real men on the battlefield, describing their fears and their courage and their often violent deaths. The struggle for control of the battle, to site the guns, to bridge the Somme and maintain communications are portrayed in vivid detail. The story also offers a glimpse of the men's families at home, their anxiety and their life-long grief.

An e-book that contains information from experienced Shanghai travelers on travel, hotels, entertainment, health issues, safety, and business etiquette. This Shanghai Business Travel Guide assumes you are a North American businessperson traveling directly from North America to Shanghai, China. The Guide's goal is to provide you with practical and current

information that will allow you to plan and execute your trip most effectively. The Guide contains information written by business people who have lived, worked, and played in Shanghai. The Guide is different from most China travel guides, which are written for tourists not business people and are not frequently updated. Travel guides usually contain glowing reports of life in a particular country; we tell it like it is! This Guide helps you prepare for your trip by advising you how much to budget for your trip, how to get a visa, and what vaccinations you should have. We suggest the best hotels and help you find your way from the airport to your hotel. Of course the main purpose of your trip is business, and understanding Chinese business etiquette may mean the difference between a successful trip and a failure. We explain how the Chinese conduct business and guide you through business meetings and dinners. The Guide is packed with advice from experienced Shanghai travelers on all the things we love about the city and many of the problems we have encountered. We tell you how to power up your laptop and where to find the best restaurants and bars and what to do in an emergency. The Guide is packed with hyperlinks to relevant sites and even has a chapter on critical Chinese phrases you will need. And you can hear a native speaker recite the phrases. This is an electronic document that will be emailed to you (Be sure to include your email address with your order.) The document is in PDF format and can be read with free Adobe Acrobat Reader software (www.adobe.com).
