Ergonomics in Sport and Physical Activity: Enhancing Performance and Improving Safety is also available as an e-book. The e-book is available at a reduced price and allows readers to highlight and take notes throughout the text. When purchased through the Human Kinetics site, access to the e-book is immediately granted when the order is received. Ergonomics in Sport and Physical Activity: Enhancing Performance and Improving Safety is the first text to provide an in-depth discussion of how the principles of ergonomics can be applied in the context of sport and other physical activities to reduce injury and improve performance. The text blends concepts from biomechanics, physiology, and psychology as it shows how ergonomics is applied to physical activity. This comprehensive text outlines methods for assessing risk in and procedures for dealing with stress, eliminating hazards, and evaluating challenges posed in specific work or sport environments. It discusses issues such as the design of effective equipment, clothing, and playing surfaces; methods of assessing risk in situations; and staying within

appropriate training levels to reduce fatigue and avoid overtraining. The text not only examines sport ergonomics but also discusses ergonomic considerations for physically active special populations. Ergonomics in Sport and Physical Activity explains what ergonomics is, how ergonomists solve practical problems in the workplace, and how principles of ergonomics are applied in the context of sport and other physical activities when solving practical problems related to human characteristics and capabilities. The text shows readers how to improve performance, achieve optimal efficiency, enhance comfort, and reduce injuries by exploring topics such as these: Essential concepts, terms, and principles of ergonomics and how these relate to physical activity Physical properties of the body and the factors limiting performance Interactions between the individual, the task, and the environment Injury risk factors in relation to body mechanics in various physical activities Injury prevention and individual protection in the review of sports equipment and sports environments Comfort, efficiency, safety, and details of systems criteria in equipment design This research-based text uses numerous practical examples, figures, charts, and graphs to bring the material to life. In addition, descriptions of technological advances show where we have been and how technology has advanced the field. Through the book's discussion of the various stressors and adaptive mechanisms, readers will learn how to cope with various environmental conditions. They will also learn how various training modes can be used to alter sport-specific capabilities and enhance performance. Presenting a wide range of approaches, theoretical

models, and analytical techniques, *Ergonomics in Sport and Physical Activity: Enhancing Performance and Improving Safety* illustrates the potential for ergonomics to be extended across recreation, competitive sport, and physically active work environments. Bridging the gap between ergonomics and exercise science, this unique text will assist both health care and exercise professionals in developing an improved awareness of how human capabilities are best matched to physical activities.

The Dragon's Tale #6

Princess Pulverizer may not be a knight yet, but she won't let that stop her from saving the day! Princess Pulverizer dreams of becoming a knight. Dribble the dragon, a companion on her Quest of Kindness, dreams of becoming a chef. So he's thrilled when he gets the chance to open a pop-up restaurant in the village they're visiting (though he has to stay hidden, since people are still pretty scared of dragons). But a jealous juggler isn't pleased with their arrival, and mysterious problems begin to arise. Villagers feel sick to their stomachs, then a barn burns to the ground--and Dribble is blamed! Can Princess Pulverizer help her friend before things go up in flames? Praise for *Princess Pulverizer: Grilled Cheese and Dragons* [*]"Very funny series . . ." --Publishers Weekly, starred review "A wacky adventure that stands out through highlighting its heroine's foibles, giving her plenty of room to grow in future installments." --Kirkus "This spirited chapterbook is an obvious choice for Princess in Black grads and

The Physics of Skiing

Imagine a world of Gatsby-esque glamor, opulence, and cultural prestige, of exclusive parties and elegant dinners, of literary luminaries including Somerset Maugham, Daphne du Maurier, Irving Stone, and Theodore Roethke, of Manhattan townhouses and country estates. This is a world where children are raised by nannies, tutors, chauffeurs, gardeners, butlers, maids, and assorted staff, sent off to private schools—and largely ignored by their parents. Publishing magnate Nelson Doubleday's daughter, Neltje, was raised to assume her place as a society matron. But beneath a seemingly idyllic childhood, darker currents ran: a colorful but alcoholic father whose absences left holes, a mother incapable of love, a family divided by money and power struggles, and a secret that drove the young woman into emotional isolation. North of Crazy is her story—written with the same fierce passion, wit, and emotion that drove her off the conventional path to reconstruct her life from base zero. She became an artist, cattle rancher, and entrepreneur.

school, Helen List sat in the kitchen drinking a cup of coffee. She was still in her nightgown and slippers. John List came up behind her and put a 9mm German-made Steyr automatic pistol to the side of her head and fired once. She died instantly. The bullet smashed into the opposite wall John made his way up the stairs to the third floor where his 85-year old mother, Alma, wearing a housedress, was preparing breakfast in her efficiency kitchen...She was standing near the storage room that adjoined her kitchen when a 9mm bullet ripped through the side of her skull. Alma List was dead before her body crumpled in a heap on the floor... The righteous carnage had begun.

Looking at the past, present and future of adventure tourism, *Adventure Tourism: the new frontier* examines the product, the adventure tourist profile, and issues such as supply, geography and sustainability. International case studies are used to illustrate these issues, including: Gorilla watching holidays, Trekking on Mount Everest, Diving holidays, and Outward Bound packages. Analysis of the development and nature of adventure tourism accompanies these studies, ensuring that the title is useful both for undergraduate and postgraduate students of tourism and for professionals involved in managing adventure tourism enterprises. There is also a companion website with additional cases,

Investment, Growth and Employment

Investment - in both facilities and know-how - is essential for growth. Economists try to understand the forces that determine investment, but investment behaviour is unruly; often the term animal spirits is used to explain the resulting volatility. This volume presents studies to explain international investment behaviour and assess its impact on growth and jobs. The authors also examine policy measures to reverse the climate of low investment that has characterised recent decades. The contributors examine how well standard models of investment work, the role of finance constraints, the effect of risk and uncertainty, the impact of alternative forms of corporate governance, the forces shaping the adoption of new technology, the impact of foreign direct investment, the effect of investment on the NAIRU and the causal structure of investment and growth. Editors

introductions to the different sections of the book provide comprehensive overviews of the main theories of investment, the impact of investment on growth and employment and examine the main questions raised for policy makers.

The Cat in the Candle Factory

Making Sense of the Law

"Gardening is the most basic of languages, the labor from which we're all born and nourished. . . ." In these pages, we travel the country with Debra Landwehr Engle as she visits 20 gardens and gardeners from California to Maine and Minnesota to Arkansas, showing us that grassroots campaigns actually can and do involve roots--and seeds and garden trowels. That any person with a steadfast resolve and an open patch of dirt can help bridge the gap between multinational refugees. That lush vegetation and running water and cool stones can help spark the fading memories of our elderly. And that our children can learn about where food comes from, labyrinths, wetlands systems, and healing from grief and loss just by digging in the earth with a caring adult hand to guide them. As the stories in this remarkable

collection demonstrate, the simplest act of gardening can produce significant changes in the lives of people we might never even meet. Consider the man who sends seedlings and greenhouses halfway around the world to feed hospital patients, or the immigrant woman who began selling her own flowers as a way to raise money for overseas charities, or the couple who offers their land as a midday retreat for the residents of nearby nursing homes. These acts and others are not heroic--or even unusual--as Ms. Engle tells us. We see ourselves in these uplifting tales from the garden, as they inspire us to transform our own little parts of the world into places of greater peace, repose, play, and healing. For gardeners, community activists, and those who understand the spiritual value of putting a spade in the soil, these stories capture the promise renewed each time we plant a seed and give us fresh ideas for changing the world, one garden at a time.

A Union Against Unions

Two men played a crucial role in the creation and early history of the National Park Service: Stephen T. Mather, a public relations genius of sweeping vision, and Horace M. Albright, an able lawyer and administrator who helped transform that vision into reality. In *Creating the National Park Service*, Albright and his daughter, Marian Albright Schenck, reveal the previously untold story of the critical "missing years"

in the history of the service. During this period, 1917 and 1918, Mather's problems with manic depression were kept hidden from public view, and Albright, his able and devoted assistant, served as acting director and assumed Mather's responsibilities. Albright played a decisive part in the passage of the National Park Service Organic Act of 1916; the formulation of principles and policies for management of the parks; the defense of the parks against exploitation by ranchers, lumber companies, and mining interests during World War I; and other issues crucial to the future of the fledgling park system. This authoritative behind-the-scenes history sheds light on the early days of the most popular of all federal agencies while painting a vivid picture of American life in the early twentieth century.

This textbook presents a comprehensive overview of the environmental impacts of various types of outdoor recreation, and how these can be best managed. As a field of study, recreational ecology is both multidisciplinary and interdisciplinary, and the authors seek to develop a deeper understanding of both the role and function of the factors that influence visitor numbers and their impact. An accessible and comprehensive textbook, it features numerous types

of outdoor recreational activities including hill walking, rock climbing, mountain marathons, skiing, scuba diving and more. Drawn from several global case studies, the authors estimate the current and future numbers involved in outdoor recreation, and how best these numbers can be managed. Effective visitor impact management actions arise from collaboration between recreation ecologists, social scientists, experienced recreation managers, recreation stakeholders and the recreationalists themselves: as such, this book will be multi-disciplinary in scope. This practical and engaging textbook will be invaluable to students and scholars of outdoor recreation and adventure tourism as well as practitioners and managers working in the field.

One of the visionary architects of the twentieth century, John Lautner designed dramatically innovative buildings with a rare sensitivity to site, vista, and structure. Accompanying a full-scale exhibition on Lautner at Los Angeles's Hammer Museum, this is the first publication to comprehensively explore his work, including his apprenticeship with Frank Lloyd Wright and the cultural and geographical context of Los Angeles, through an intensive examination of the archives of the John Lautner Foundation. Although Lautner's dramatic houses are well-known, this is the first time his work has been seriously examined by scholars. Historian Nicholas Olsberg contributes an analysis of Lautner's evolution, providing social and cultural context. Architect Frank Escher covers the relationship between his experiments in structure and poetics of space, and Jean-Louis Cohen discusses Lautner's place in new design tendencies. This richly illustrated monograph includes previously

unpublished sketches, drawings, construction images, and Lautner's own photographs to unveil the evolution, originality, and logic of his designs, focusing on the atmospheres and vistas they establish and the connections to landscape and sensory fluidity that mark their innovative spatial arguments.

Social Assistance in Albania

Let the Water Do the Work is an important contribution to riparian restoration. By "thinking like a creek," one can harness the regenerative power of floods to reshape stream banks and rebuild floodplains along gullied stream channels. Induced Meandering is an artful blend of the natural sciences - geomorphology, hydrology and ecology - which govern channel forming processes. Induced Meandering directly challenges the dominant paradigm of river and creek stabilization by promoting the intentional erosion of selected banks while fostering deposition of eroded materials on an evolving floodplain. The river self-heals as the growth of native riparian vegetation accelerates the meandering process. Not all stream channel types are appropriate for Induced Meandering, yet the Induced Meandering philosophy of "going with the flow" can inform all stream restoration projects. Induced meandering strives to understand rivers as timeless entities governed by immutable rules serving their watersheds, setting their own timetables, and coping with their own realities as they carry mountains grain by grain to the sea. Anyone with an interest in natural resource management in these uncertain times

should read this book and put these ideas to work.

Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor.

The North American Arctic addresses the emergence of a new security relationship within the North American North. It focuses on current and emerging security issues that confront the North American Arctic and that shape relationships between and with neighbouring states (Alaska in the US; Yukon, Northwest Territories and Nunavut in Canada; Greenland and Russia). Identifying the degree to which 'domain awareness' has redefined the traditional military focus, while a new human rights discourse undercuts traditional ways of managing sovereignty and territory, the volume's contributors question normative security arrangements. Although security itself is not an obsolete concept, our understanding of what constitutes real human-centred security has become outdated. The contributors argue that there are new regionally specific threats originating from a wide range of events and possibilities, and very different subjectivities that can be brought to understand the shape of Arctic security and security relationships in the twenty-first century.

Riding Home: The Power of Horses to Heal, Horse Nation's must read book of 2016, is the first and only book to scientifically and experientially explain why horses have the extraordinary ability to emotionally transform the lives of thousands of men, women and children, whether they are horse lovers, or suffering from deep psychological wounds. It is a book for anyone who wants to experience the joy, wonder, self-awareness and peace of mind that comes from creating a horse/human relationship, and it puts forth and clarifies the principles of today's Natural Horsemanship (or what was once referred to as "Horse Whispering") Everyone knows someone who needs help: a husband, a wife, a partner, a child, a friend, a troubled teenager, a war veteran with PTSD, someone with autism, an addiction, anyone in emotional pain or who has lost their way. Riding Home provides riveting examples of how Equine Therapy has become one of today's most effective cutting-edge methods of healing. Horses help us discover hidden parts of ourselves, whether we're seven or seventy. They model relationships that demonstrate acceptance, kindness, honesty, tolerance, patience, justice, compassion, and forgiveness. Horses cause all of us to become better people, better parents, better partners, and better friends. A horse can be our greatest teacher, for horses have no egos, they never lie, they're never wrong and they manifest unparalleled compassion. It is this amazing power of horses to heal and teach us
