Human + Machine

Are your thoughts getting in the way of living your life? Based in cutting-edge neuroscience and cognitive behavioral therapy (CBT), this important workbook will help you regain control from unwanted thoughts and get back to the things that matter. Do you have unwanted, disturbing, upsetting, or weird thoughts that you just can't seem to shake? Violent or sexual thoughts that cause you to feel ashamed, anxious, or depressed? Maybe you think they mean something about you—and that thought scares you even more. While you may not be able to shut your thoughts off permanently, you can gain distance from them and improve your life. This step-by-step guide will show you how. In *The Anxious Thoughts Workbook*, renowned psychologist David A. Clark presents a targeted, transdiagnostic approach to help you move past unwanted mental intrusions. You'll learn how to change the destructive patterns responsible for the persistence of anxious and depressive thinking, and strip these upsetting thoughts of their meaning—a process Clark refers to as “detoxing.” Finally, you'll learn to manage the feelings of shame that can accompany these thoughts. Are you ready to move past your thoughts and start focusing on more important things? If so, the proven-effective techniques in this workbook will help you get started.

The Circle

Before great basketball players developed their superstar flair, they built a solid base of fundamental skills in all phases of the game. *Basketball Skills and Drills* provides a blueprint for building the foundation that every well-rounded basketball player needs. The book also covers key team principles for both ends of the court. Tactics for offense, including special situations such as out-of-bounds plays, will improve spacing, ball and player movement, shot selection, and scoring. Defensive tactics emphasize positioning, pressure, and various systems to apply in each area or level of the court.

Taking a whole of government approach to skills development

The world's most popular spreadsheet program is now more powerful than ever, but it's also more complex. That's where this *Missing Manual* comes in. With crystal-clear explanations and hands-on examples, *Excel 2013: The Missing Manual* shows you how to master Excel so you can easily track, analyze, and chart your data. You'll be using new features like PowerPivot and Flash Fill in no time. The important stuff you need to know: Go from novice to ace. Learn how to analyze your data, from writing your first formula to charting your results. Illustrate trends. Discover the clearest way to present your data using Excel's new Quick Analysis feature. Broaden your analysis. Use pivot tables, slicers, and timelines to examine your data from different perspectives. Import data. Pull data from a variety of sources, including website data feeds and corporate databases. Work from the Web. Launch and manage your workbooks on the road, using the new Excel Web App. Share your worksheets. Store Excel files on SkyDrive and collaborate with colleagues on Facebook, Twitter, and LinkedIn. Master the new data model. Use

PowerPivot to work with millions of rows of data. Make calculations. Review financial data, use math and scientific formulas, and perform statistical analyses.

Excel 2013: The Missing Manual

"Microsoft's last Windows version, the April 2018 Update, is a glorious Santa sack full of new features and refinements. What's still not included, though, is a single page of printed instructions. Fortunately, David Pogue is back to help you make sense of it all--with humor, authority, and 500 illustrations."--Page 4 of cover.

4WD Driving Skills

The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing*. Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

Introduction to Sports Biomechanics

Discover the road to success with this new title in the AA's Driving Test Series. Providing essential information at a great format and price, the guide is designed to stand-alone or be used alongside the AA's new *Supervising a Learner Driver*. Written by an experienced AA instructor, with colour diagrams accompanying basic manoeuvres, the book includes all the information needed to improve your driving skills. Each skill element is fully explained with a three-point chart for every skill or skill set. Advice is given on different parts of the test and there's even tips to help you remember.

Life Skills Curriculum: ARISE Four Wheel Drive for The Mind, Book 2: Learning Strategies & Time Management (Instructor's Manual)

Testing expert W. James Popham cuts through the jargon and the hype to provide the definitive nuts-and-bolts introduction to formative assessment, a process with the power to completely transform teaching and learning. In his inimitable style, Popham explains the research supporting formative assessment's effectiveness and why familiarity with this research is the key to preserving both teacher sanity and district funds. You'll find step-by-step guidance on how to build frameworks for formative assessment and how to carry out each of the process's four levels:

teachers' instructional adjustments, students' learning tactic adjustments, a classroom climate shift, and schoolwide implementation. This book is the place to start for educators considering formative assessment, curious about why their school system is embracing formative assessment, or wondering why the "formative assessments" they're using now aren't producing the desired results. Here, you'll learn what formative assessment is and isn't, what it can do and what it can't, and the practical way to reap its very real rewards: better teaching and better learning.

Let's Drive Right

Social and behavioral science has for decades studied and recognized leadership as a social exchange between leaders and followers. But leadership is rather complex, and as such, it tends to lead to an increased interest within and across different disciplines. This book is an attempt to provide theoretical and empirical framework to better understand leadership challenges in various contexts. The authors cover an array of themes that span from an individual level to an organizational and societal level. In this volume, two sections are presented. The first section based on individual level focuses on different leadership styles and abilities, and the other section provides theories to understand leadership in public administration, in industrial settings and in nonprofit organizations.

Drawing on the Right Side of the Brain

Prentice Hall Drive Right Skills and Application Student Workbook C2010

In *Teaching with Poverty in Mind: What Being Poor Does to Kids' Brains and What Schools Can Do About It*, veteran educator and brain expert Eric Jensen takes an unflinching look at how poverty hurts children, families, and communities across the United States and demonstrates how schools can improve the academic achievement and life readiness of economically disadvantaged students. Jensen argues that although chronic exposure to poverty can result in detrimental changes to the brain, the brain's very ability to adapt from experience means that poor children can also experience emotional, social, and academic success. A brain that is susceptible to adverse environmental effects is equally susceptible to the positive effects of rich, balanced learning environments and caring relationships that build students' resilience, self-esteem, and character. Drawing from research, experience, and real school success stories, *Teaching with Poverty in Mind* reveals

- * What poverty is and how it affects students in school;
- * What drives change both at the macro level (within schools and districts) and at the micro level (inside a student's brain);
- * Effective strategies from those who have succeeded and ways to replicate those best practices at your own school; and
- * How to engage the resources necessary to make change happen. Too often, we talk about change while maintaining a culture of excuses. We can do better. Although no magic bullet

can offset the grave challenges faced daily by disadvantaged children, this timely resource shines a spotlight on what matters most, providing an inspiring and practical guide for enriching the minds and lives of all your students.

Drive

Remember those great teachers who made you excited about learning? Remember how it felt to be in their classes and to experience how they made their classrooms come alive? What made those teachers special? What qualities and skills did they have to ignite student learning? Most important, how did those teachers help their students become successful? In *Qualities of Effective Teachers*, 2nd edition, James H. Stronge shows educators how to recreate this same excitement and enthusiasm in their own classrooms by describing the characteristics and skills of effective teachers. Stronge synthesizes research to identify specific teacher behaviors that contribute to student achievement. Rather than look at outside factors like demographics, district leadership, and state mandates, Stronge focuses specifically on what teachers can control: their own preparation, personality, and practices. Learn how effective teachers

- *Prepare to be effective educators.
- *Establish, manage, and maintain learning-focused classroom environments.
- *Organize time, communicate expectations, and plan instruction.
- *Present curriculum to support active and engaged learning.
- *Monitor student progress, identify student potential, and meet the needs of special populations in the classroom.

This second edition includes new tips and tools for engaging at-risk students and high-ability students. It also includes skills checklists and an expanded, annotated bibliography to provide a springboard for further insight and exploration. Teachers, educators who hire teachers, teacher leaders, supervisors, and teachers-in-training can all use this book to learn to how to develop better teachers and to improve the quality of learning for all students.

Driving Skills Manual

The young adult adaptation of the acclaimed, #1 New York Times bestseller *Just Mercy*--soon to be a major motion picture starring Michael B. Jordan, Jaime Foxx, and Brie Larson and now the subject of an HBO documentary feature! In this very personal work--adapted from the original #1 bestseller, which the New York Times calls "as compelling as *To Kill a Mockingbird*, and in some ways more so"--acclaimed lawyer and social justice advocate Bryan Stevenson offers a glimpse into the lives of the wrongfully imprisoned and his efforts to fight for their freedom. Stevenson's story is one of working to protect basic human rights for the most vulnerable people in American society--the poor, the wrongly convicted, and those whose lives have been marked by discrimination and marginalization. Through this adaptation, young people of today will find themselves called to action and compassion in the pursuit of justice. Proceeds of this book will go to charity to help in Stevenson's important work to benefit the voiceless and the vulnerable as they attempt to navigate the broken U.S. justice system. Practical Business Skills for Driving Instructors

Introduction to Sports Biomechanics has been developed to introduce you to the core topics covered in the first two years of your degree. It will give you a sound grounding in both the theoretical and practical aspects of the subject. Part One covers the anatomical and mechanical foundations of biomechanics and Part Two concentrates on the measuring techniques which sports biomechanists use to study the movements of the sports performer. In addition, the book is highly illustrated with line drawings and photographs which help to reinforce explanations and examples.

Essential Questions

AI is radically transforming business. Are you ready? Look around you. Artificial intelligence is no longer just a futuristic notion. It's here right now--in software that senses what we need, supply chains that "think" in real time, and robots that respond to changes in their environment. Twenty-first-century pioneer companies are already using AI to innovate and grow fast. The bottom line is this: Businesses that understand how to harness AI can surge ahead. Those that neglect it will fall behind. Which side are you on? In *Human + Machine*, Accenture leaders Paul R. Daugherty and H. James (Jim) Wilson show that the essence of the AI paradigm shift is the transformation of all business processes within an organization--whether related to breakthrough innovation, everyday customer service, or personal productivity habits. As humans and smart machines collaborate ever more closely, work processes become more fluid and adaptive, enabling companies to change them on the fly--or to completely reimagine them. AI is changing all the rules of how companies operate. Based on the authors' experience and research with 1,500 organizations, the book reveals how companies are using the new rules of AI to leap ahead on innovation and profitability, as well as what you can do to achieve similar results. It describes six entirely new types of hybrid human + machine roles that every company must develop, and it includes a "leader's guide" with the five crucial principles required to become an AI-fueled business. *Human + Machine* provides the missing and much-needed management playbook for success in our new age of AI. **BOOK PROCEEDS FOR THE AI GENERATION** The authors' goal in publishing *Human + Machine* is to help executives, workers, students and others navigate the changes that AI is making to business and the economy. They believe AI will bring innovations that truly improve the way the world works and lives. However, AI will cause disruption, and many people will need education, training and support to prepare for the newly created jobs. To support this need, the authors are donating the royalties received from the sale of this book to fund education and retraining programs focused on developing fusion skills for the age of artificial intelligence.

Drive Right

Failure to Drive Right

Contemporary Leadership Challenges

Written for both existing and trainee driving instructors in the UK, Practical Teaching Skills for Driving Instructors shows how to develop and improve the ability to teach driving as a lifetime skill. The companion title to the popular best-seller The Driving Instructor's Handbook, it offers advice on teaching, communication and coaching skills. Fully revised, it investigates how and why people learn and the different teaching and learning processes involved. With sections on structuring a lesson and problem solving, it also looks at the reasons why people learn to drive and the motivation involved in seeing it through, from early stage lessons to the final practical test. Listed by the DSA as essential reading for the ADI exams, it is an indispensable guide for all new and established driving instructors, providing all the necessary advice for the conscientious instructor keen to communicate effectively with their pupils.

Drive Right

"This booklet is a general guide about what is in the test, not a book of road rules. For more detailed information on road rules refer to the Road Users' Handbook or the Australian Road Rules."--P. 1.

Ditch That Textbook

Basketball Skills and Drills

Parents surprise a number of professional driving instructors with their approach to teaching a new driver how to drive. Driving is a life & death exercise and if you go about it incorrectly it can become a family tragedy. Instructors have debated the pro's and con's of where and when a new driver should be driving on the open road with many a parent. Some parents believe their child should drive in traffic within the first lesson, others hold back for too many hours. This book has been written to give guidance to parents, and driving instructors, who want to play an active role in developing any new driver. The concept of this book is simple; firstly we learn about the vehicle controls, then the manoeuvring procedures, followed by the more complex on-road procedures, through to the open road and traffic speed processes. By following this book, in page order, a new driver will develop these skills progressively and be introduced to the tougher tasks as a combination of earlier learned skills. By including drawings and basic descriptions the book can be share-read by the facilitator and the new driver to assist in the learning process.

The Official Highway Code

The only comprehensive book on geriatric occupational therapy designed specifically for the COTA, *Occupational Therapy with Elders: Strategies for the COTA, 3rd Edition* provides in-depth coverage of each aspect of geriatric practice, from wellness and prevention to death and dying. A discussion of foundational concepts includes aging trends and strategies for elder care, and coverage of emerging areas includes low-vision rehabilitation, mobility issues including driving, and Alzheimer's disease and other forms of dementia. Expert authors René Padilla, Sue Byers-Connon, and Helene Lohman offer an unmatched discussion of diverse populations and the latest on geriatric policies and procedures in this fast-growing area of practice. Unique! A focus on the occupational therapy assistant highlights the importance of COTAs to the care of elder clients. Case studies illustrate principles and help you apply what you've learned to actual situations. Key terms, chapter objectives, and review questions highlight important content in each chapter. Use of the term "elder" reduces the stereotypical role of dependent patients and helps to dispel myths about aging. A multidisciplinary approach demonstrates how the OT and the COTA can collaborate effectively. Unique! Attention to diverse populations and cultures prepares you to respect and care for clients of different backgrounds. Unique! The companion Evolve website makes review easier with more learning activities, references linked to MEDLINE abstracts, and links to related OT sites. Unique! A discussion of elder abuse, battered women, and literacy includes information on how the COTA can address these often-overlooked issues. New information on alternative treatment settings for elders reflects new trends in OT care. Updated information on Medicare, Medicaid, and HIPAA regulations discusses the latest policies and how to incorporate the newest procedures into practice. Significant additions are made to the chapters on public policy, dementia, and oncology.

A Whole New Mind

Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning. In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Good to Great

The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job. Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how

to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site *The Professor is In*, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish -Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right *The Professor Is In* addresses all of these issues, and many more.

Airplane Flying Handbook (FAA-H-8083-3A)

All New and Fully Loaded! New Keys to Teaching Success CD includes PowerPoint Presentations you can customize, Computer Test Bank, Teaching Resources, and more! All new Behind the Wheel Video Program with Activity Sheets: the new videos engage students with real-life scenarios. From the new cover to larger font sizes and single column layout, the new design facilitates greater readability and helps differentiate instruction for all types of different learners and different classroom styles!

The Development of Essential Skills in Meeting Driving Emergencies

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of

pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

A Guide to the Driving Test

Simple and timeless tools for success and happiness For more than eighty years, millions of people from Warren Buffett to Oprah Winfrey have benefited from the remarkable wisdom of Dale Carnegie. Intended as a basic sales primer, *How to Win Friends and Influence People* quickly exploded into an overnight success—selling more than fifteen million copies worldwide and becoming one of the most influential books of all time. With an enduring grasp of human nature, Dale Carnegie's *How to Win Friends and Influence People* shows you how to be more persuasive and effective, a better leader and manager, and happier at home and at work. This special new edition of the beloved classic includes an exclusive foreword by Terry O'Reilly.

Occupational Therapy with Elders - E-Book

Windows 10

The driving test reaches its 80th anniversary in 2015, and this commemorative edition of the Highway Code is a celebration of that milestone in British road safety. Updated for 2015, *The Official Highway Code* is essential reading for all road users in England, Scotland and Wales, providing all the latest rules of the road and traffic signs. All road users have a responsibility to keep their knowledge up-to-date, so make sure you do just that with the latest edition of this handy reference guide. Every day, on average, five people are killed and 60 people are seriously injured on our roads. If we're to bring those figures down, it's vital that all road users - drivers, motorcyclists, cyclists, horse riders and pedestrians - are familiar with all the rules in *The Official Highway Code*. This 2015 edition includes the new drug-driving laws, HGV speed limit changes on single and dual carriageways in England and Wales, updated drink-driving limits in Scotland and general rule changes. *The Highway Code* is available in just about any format you can think of and is constantly updated to reflect changes in technology, understanding and the law. Please continue to read it - not just as a learner driver, but as a responsible

lifelong road user - so we can keep Britain's roads among the safest in the world.

Teaching Students to Drive Their Brains

What are "essential questions," and how do they differ from other kinds of questions? What's so great about them? Why should you design and use essential questions in your classroom? Essential questions (EQs) help target standards as you organize curriculum content into coherent units that yield focused and thoughtful learning. In the classroom, EQs are used to stimulate students' discussions and promote a deeper understanding of the content. Whether you are an Understanding by Design (UbD) devotee or are searching for ways to address standards—local or Common Core State Standards—in an engaging way, Jay McTighe and Grant Wiggins provide practical guidance on how to design, initiate, and embed inquiry-based teaching and learning in your classroom. Offering dozens of examples, the authors explore the usefulness of EQs in all K-12 content areas, including skill-based areas such as math, PE, language instruction, and arts education. As an important element of their backward design approach to designing curriculum, instruction, and assessment, the authors

- *Give a comprehensive explanation of why EQs are so important;
- *Explore seven defining characteristics of EQs;
- *Distinguish between topical and overarching questions and their uses;
- *Outline the rationale for using EQs as the focal point in creating units of study; and
- *Show how to create effective EQs, working from sources including standards, desired understandings, and student misconceptions.

Using essential questions can be challenging—for both teachers and students—and this book provides guidance through practical and proven processes, as well as suggested "response strategies" to encourage student engagement. Finally, you will learn how to create a culture of inquiry so that all members of the educational community—students, teachers, and administrators—benefit from the increased rigor and deepened understanding that emerge when essential questions become a guiding force for learners of all ages.

Teaching with Poverty in Mind

HAVE YOU BEEN DRINKING, SIR? Officer Kevin Burns made a remarkable 1,590 DWI arrests in his 27-year career working for the town of Southbury, CT, from 1989 to 2016. Early in his career, fed up with being called to accidents caused by drunk drivers, he decided to do something about it. He determined the best way to prevent such accidents was to stop drunk drivers before they crashed. "I saw DWI detection enforcement as preventing homicide/suicide/assault with a motor vehicle." Such an illustrious achievement should be celebrated by law enforcement, and Kevin Burns crowned a hero. Instead, he suffered discrimination at the hands of his department, including being unjustly accused of offenses that earned him a sixty-day suspension. *Failure to Drive Right* tells the stories of over one hundred of Officer Burns's more memorable DWI arrests in his career. From the lady partying after an AA meeting to the one with a baby strapped in the backseat, and the man driving drunk on a lawn tractor to the one Burns arrested eight times, Burns's stories are compelling and perhaps even familiar to those from the Southbury area. Burns includes a chapter revealing both the details of his unjust suspension and how he missed out on a well-deserved promotion. He also debunks the myths associated with Officer Burns, and explains how to beat a DWI.

The Anxious Thoughts Workbook

'Feinstein's triumph is to write so well that she makes Lena's predicament not only moving, in a perfunctory dismissive way, but also painful [she has] an accurate and acute feeling for language, and pauses, and silence.' Guardian Lena's seemingly contented family life is coming apart at the seams. Her husband Ben has been having an affair with the au pair, and as their relationship slides he retreats more and more into his work in a science lab. Sons Alan and Michael may appear happy enough, but this is far from the case - both are responding to a physical world which they alone inhabit. And Lena - desperately lost and seeking an identity of her own, both inside and outside of her family unit - increasingly finds solace at the bottom of a bottle. An exploration of just how lonely - and how magic - a marriage can be, *The Circle* is a poignant, poetic and incredibly assured debut novel.

Skills for Learner Drivers

New York Times Bestseller An exciting--and encouraging--exploration of creativity from the author of *When: The Scientific Secrets of Perfect Timing* The future belongs to a different kind of person with a different kind of mind: artists, inventors, storytellers-creative and holistic "right-brain" thinkers whose abilities mark the fault line between who gets ahead and who doesn't. Drawing on research from around the world, Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*) outlines the six fundamentally human abilities that are absolute essentials for professional success and personal fulfillment--and reveals how to master them. *A Whole New Mind* takes readers to a daring new place, and a provocative and necessary new way of thinking about a future that's already here.

Practical Teaching Skills for Driving Instructors

If the difference between a student's success and failure were something specific you could teach, wouldn't you? Metacognition is exactly that—a tool that helps students unlock their brain's amazing power and take control of their learning. Educational researchers and professional developers Donna Wilson and Marcus Conyers have been exploring and using the explicit teaching of metacognition for years, and in this book they share a practical way to teach preK-12 students how to drive their brains by promoting the following practices: * Adopt an optimistic outlook toward learning, * Set goals, * Focus their attention, * Monitor their progress, and * Engage in practices that enhance cognitive flexibility. Wilson and Conyers explain metacognition and how it equips students to meet today's rigorous education standards. They present a unique blend of useful metaphors, learning strategies, and instructional tips you can use to teach your students to be the boss of their brains. Sample lessons show these ideas in a variety of classroom settings, and sections on professional practice help you incorporate these tools (and share them with colleagues and parents) so that you are teaching for and with metacognition. Research suggests that metacognition is key to higher student achievement, but studies of classroom practice indicate that few students are taught to use metacognition and the supporting cognitive strategies that make learning easier. You can teach metacognition to your students, so why wouldn't you? This book shows you how.

Drive Right

"This comprehensive and practical guide concentrates on the essential skills of four wheel driving for every type of off-road terrain as well as sealed and unsealed roads. It explains what makes a four wheel drive vehicle different, tells how to approach challenging situations and show what to do if things go wrong"--Cover verso.
