The Sociology of Early Childhood

This text focuses on recent debates about the contribution which complex organizations have made to the transition from traditional to modern society, locating these debates in the historical context provided by recurring themes concerning the relationship between the individual and society.

Sociology Themes and Perspectives

The second edition of A Handbook for the Study of Mental Health provides a comprehensive review of the sociology of mental health. Chapters by leading scholars and researchers present an overview of historical, social and institutional frameworks. Part I examines social factors that shape psychiatric diagnosis and the measurement of mental health and illness, theories that explain the definition and treatment of mental disorders and cultural variability. Part II investigates effects of social context, considering class, gender, race and age, and the critical role played by stress, marriage, work and social support. Part III focuses on the organization, delivery and evaluation of mental health services, including the criminalization of mental illness, the

challenges posed by HIV, and the importance of stigma. This is a key research reference source that will be useful to both undergraduates and graduate students studying mental health and illness from any number of disciplines.

The World Is Flat [Further Updated and Expanded; Release 3.0]

Themes and Perspectives in Indian Sociology

This edited collection explores Positive Sociology of Leisure (PSL) as a subfield relating to leisure studies, sociology of leisure, and sociology of happiness. Defined as an area of research that examines social aspects of leisure life with a focus on the optimal functioning of relationship, group, community, organization, and other social units, PSL differs from more critical forms of sociology in that its starting point is social positives. The contributions draw on a range of diverse disciplinary backgrounds to consider various meanings of leisure across themes such as: ageing; sex, sexuality and family; community, youth, and education; and arts and creativity. Positive

Sociology of Leisure will be a key reference within the field of sociology of leisure, as well as an important introductory book for those interested in leisure studies.

The Sociology of Organizations

Perspectives in Sociology provides students with a lively and critical introduction to sociology and to the ways in which sociologists are trained to think and work. The subject is presented as a sequence of different perspectives on the social world, all of them interrelated, sometimes in conflict with one another, and all contributing important and necessary insights. The discussion is backed up by extensive reference to empirical studies. This edition has been completely revised. A chapter on critical theory has been added in order to reflect the extensive work and thinking that Marx's basic work continues to stimulate. The chapter on research strategies now takes account of new developments in the philosophy of science that are relevant for sociological approaches. Throughout, the authors have rewritten extensively in their continuing desire to produce clarity, and to respond to the comments of students and teachers.

Critical Themes in Indian Sociology

In this pioneering new book, Dr Martin presents a lively and accessible introduction to the social analysis of music. Dr Martin argues that musical meaning must be understood as socially constructed, rather than inherent, and that the notion of a correspondence between social and musical structures is highly problematic. An alternative approach, based on the 'social action' perspective is outlined, and the book concludes with a discussion of the social situation of music in advanced capitalist society. Along the way, leading thinkers are introduced: Adorno, Weber and Schntz as well as, more recently, John Shepherd and the feminist musicologists. The book draws on studies spanning the whole spectrum of Western music - rock bands to symphony orchestras, medieval plainchant to avant-garde jazz and concludes with a discussion of the social situation of music in advanced capitalist society.

Sociology

Haralambos and Holborn Sociology

The preparation, serving and eating of food are common features of all human societies, and have been the focus of study for numerous anthropologists - from Sir James Frazer onwards - from a variety of theoretical and empirical perspectives. It is in the context of this previous anthropological work that Jack Goody sets his own observations on cooking in West Africa. He criticises those approaches which overlook

the comparative historical dimension of culinary, and other, cultural differences that emerge in class societies, both of which elements he particularly emphasises in this book. The central question that Professor Goody addresses here is why a differentiated 'haute cuisine' has not emerged in Africa, as it has in other parts of the world. His account of cooking in West Africa is followed by a survey of the culinary practices of the major Eurasian societies throughout history - ranging from Ancient Egypt, Imperial Rome and medieval China to early modern Europe - in which he relates the differences in food preparation and consumption emerging in these societies to differences in their socio-economic structures, specifically in modes of production and communication. He concludes with an examination of the world-wide rise of 'industrial food' and its impact on Third World societies, showing that the ability of the latter to resist cultural domination in food, as in other things, is related to the nature of their pre-existing socio-economic structures. The arguments presented here will interest all social scientists and historians concerned with cultural history and social theory.

Haralambos and Holborn, Sociology Themes and Perspectives

I Am Woman

In an era when rapid social change, the disappearance of traditional communities, the rise of

political populism and the threat posed by radical religious movements makes it appear that 'all that is solid melts into air', the classical sociological problem of how peaceable societies can be created and maintained assumes renewed urgency. Uncovering Social Life: Critical Perspectives from Sociology explores how contemporary institutional changes erode existing social relationships and identities but also create space for opposition to, or creative adaptation of, these broader shifts. Exploring the threats and opportunities associated with the contemporary age, this book identifies how sociology helps us understand the problems associated with social order and change before focusing on the most important institutional transformations to have occurred in: bodies and health; sex, gender and sexuality; employment; finance; the Internet and new social media; technology and artificial intelligence; religion; governance and terrorism. After a critical introduction placing these issues in their historical and sociological context, theoretical chapters analysing how sociology views the individual/society relationship, and the volatile processes endemic to the modern era, provide an innovative and comprehensive context for these explorations. This book provides a clear and engaging account of social life. Covering a broad range of sociological topics, the diverse chapters are united in a concern with three major themes: the growing complexity of the current era, and the 'doubled' identities with which it is associated; the opportunities and constraints such developments pose to different groups; and the capacity of institutional changes to both erode existing social relationships, and create space for the

emergence of new collective identities that oppose these structural shifts.

In this lively and entertaining book, Gordon Marshall explores ten classic studies of British society to demonstrate the valuable qualities of British sociology, and its importance for understanding contemporary society. In each case he provides a precis of the research undertaken, assuming no prior knowledge on the part of the reader, a series of points that can be made in praise or criticism of the research, and an assessment of the sociological contribution made by the researchers. The ten studies chosen are: Goldthorpe on social mobility, Townsend on poverty, Rex and Moore on race and the inner city, the Affluent Worker project, Wallis on sectarianism, Jackson and Marsden on education and the working class, Brown and Harris on clinical depression among women, Cohen on deviance, Bott on families and social networks, and Burns and Stalker on management and new technology.
