Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

you to get exponentially more traffic than ever before. This book is not about increasing your conversions--yet these secrets will increase your conversions more than any headline tweak or split test you could ever hope to make. What most businesses really have is a "funnel" problem. Your funnel is the online process that you take your potential customers through to turn them into actual customers. Everyone has a funnel (even if they don't realize it), and yours is either bringing more customers to you, or repelling them. In this updated edition, Russell Brunson, CEO and co-founder of the multimillion-dollar software company ClickFunnels, reveals his greatest secrets to generating leads and selling products and services after running tens of thousands of his own split tests. Stop repelling potential customers. Implement these processes, funnels, frameworks, and scripts now so you can fix your funnel, turn it into the most profitable member of your team, and grow your company online.

And, having taught the course themselves for many years, they are very experienced in selecting the types of cases that will spark student interest and generate lively classroom discussions. Many of the cases reflect high profile companies, products, and people that students will have heard of, know about from personal experience, or can easily identify with. Crafting And Executing Strategy: The Quest For Competitive Advantage (Special Indian Edition)

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.
