This book focuses on the international banking revolution of the 1960s and provides a fresh historical perspective on the foundations of the subsequent financial globalization. The contributors address four main issues: the revival of London as a world financial centre; the emergence of Euro-banking as a new frontier of growth for credit institutions; the competitive challenge brought home by American banks to their European counterparts; and the strategic response by British and Continental banks.

### **Finding Orion**

The acclaimed author of *Ms. Bixby's Last Day* and *Posted* returns with an unforgettable tale of love and laughter, of fathers and sons, of what family truly means, and of the ways in which we sometimes need to lose something in order to find ourselves. Rion Kwirk comes from a rather odd family. His mother named him and his sisters after her favorite constellations, and his father makes funky-flavored jellybeans for a living. One sister acts as if she's always on stage, and the other is a walking dictionary. But no one in the family is more odd than Rion's grandfather, Papa Kwirk. He's the kind of guy who shows up on his motorcycle only on holidays handing out crossbows and stuffed squirrels as presents. Rion has always been fascinated by Papa Kwirk, especially as his son—Rion's father—is the complete opposite. Where Dad is predictable, nerdy, and reassuringly boring, Papa Kwirk is mysterious, dangerous, and cool. Which is why, when Rion and his family learn of Papa Kwirk's death and pile into the car to attend his funeral and pay their respects, Rion can't help but feel that that's not the end of his story. That there's so much more to Papa Kwirk to discover. He doesn't know how right he is.

"An under-read and engaging show-biz memoir." -The New Yorker "If I had a talent for anything, it was a talent for knowing who was talented." Mike Medavoy is a Hollywood rarity: a studio executive who, though never far from controversy, has remained well loved and respected through four decades of moviemaking. What further sets him apart is his role in bringing to the screen some of the most acclaimed Oscar-winning films of our time: *Apocalypse Now*, *One Flew Over the Cuckoo's Nest*, *Amadeus*, *The Silence of the Lambs*, *Philadelphia*, and *Sleepless in Seattle* are just some of the projects he green-lighted at United Artists, Orion, TriStar, his own Phoenix Pictures. "The ultimate lose-lose situation for a studio executive: to wind up with a commercial bomb and a bad movie." Of course, there are the box office disasters, and the films, as Medavoy says, "for which I should be shot." They, too, have a place in his fascinating memoir -- a pull-no-punches account of financial and political maneuvering, and of working with the industry's brightest star power, including Steven Spielberg, Martin Scorsese, Francis Ford Coppola, Kevin Costner, Robert De Niro, Jodie Foster, Sharon Stone, Michael Douglas, Meg Ryan, and countless others. "Putting together the elements of a film is a succession of best guesses." Medavoy speaks out on how movie studio buyouts have stymied the creative process and brought an end to the "hands-off"

The banking and financial sector has expanded dramatically in the last forty years, and the consequences of this accelerated growth have been felt by people around the world. *European Banks and the Rise of International Finance* examines the historical origins of the financialised world we live in by analysing the transformations in world finance which occurred in the decade from the first oil crisis of 1973, until the debt crisis of 1982. This a crucial and formative decade for understanding the modern financial landscape, but it is still mostly unexplored in economic and financial history. The availability of new archival evidence has allowed for the re-examination of issues such as the progressive privatisation of international financial flows to Less Developed Countries, especially in Latin America and South-East Asia, and its impact on the expansion of the European banking sector, and for the development of an invaluable financial and political history. This book is well suited for those interested in monetary economics and economic history, as well as those studying international political economy, banking history and Financial history.

But when newcomers arrive at Outpost Five, Orion uncovers disturbing revelations that make her question everything she thought she knew about life on both sides of the cirium shield. As conditions at the outpost grow increasingly dangerous, it’s up to Orion to forge a way past the flashfall, beyond all boundaries, beyond the world as she knows it.

### **How to Change Your Spouse (without Ruining Your Marriage)**

Marking the 30th anniversary of the formation of Orion Bank in 1970, financial historian Richard Roberts has written a history of Orion and the rise and decline of the consortium banking movement. Consortium banks were formed as joint ventures to enable banks to operate in the booming Euromarkets, with virtually every major international bank participating in a consortium bank during their heyday in the 1970s and 1980s. Orion Bank was one of the leading players in the Euromarkets in those decades: its shareholders were six of the biggest banks in the world from the three major trading blocks: Chase Manhattan, Royal Bank of Canada, NatWest, Westdeutsche Landesbank, Credito Italiano and Mitsubishi Bank. Like other consortiums banks, Orion Bank was prominent in Eurocurrency syndicated lending, but more unusually, it was also a top Eurobond lead manager. The story of Orion exemplifies the tensions inherent in the joint venture approach to business development and the strategic dilemmas facing consortium bank managements and shareholders. Richard Roberts uses primary archival papers and interviews with former Orion executives and other bankers prominent in consortium and investment banking to present an authoritative case study with great topical relevance as today's European banking industry continues to integrate across borders. Take Your Partners is also an invaluable source of reference for anyone with an interest in the Euromarkets and the development of international banking.

The book, titled Orion's Highway Across the Galaxy, is about an alien from a distant planet assigned to help mankind by making specific individuals in the past become famous. His name is Enoch and he is a distant cousin of the human race. Gifted with certain skills, he is able to help Nostradamus, Mozart, and Dr. Christiaan Barnard gain the recognition that they richly deserved. The following is a quote from Enoch as he summarizes his life: Nostradamus, Mozart, and Dr. Barnard all these men with different personalities were the ones that I helped in the corresponding years 1513, 1756, and 1962. Mozart lived for only thirty-five years because of the drugs he received as a baby causing his brain to deform. For every bad thing, there is a good thing: his contribution was the brilliance of his music that he left for society. When I recall the three Earthlings that I guided toward recognition, I concede that their beginnings were apt to be shadowy. So it is with great men trying to find their beginnings with their inner skills that are undeveloped. Most critics, then and now, still debate the success of their accomplishments with doubt and jealousy, and yet, wishing that they could achieve fame themselves. The plain and inescapable truth is that these men struggled with a desire that motivated them, and in the absence of eyewitnesses, no one was there to see me rally them on. I gave them inspiration and the ability to meet their goals. Enoch, II With a life span of twelve hundred years, Enoch is capable of accomplishing many goals set forth by his superiors. The only goal that he cannot successfully complete is to make a decision to marry Beena, the red-haired beauty whom he loves, or to marry Brianna, the beautiful blond that had his child out of wedlock. During Enoch's multiple visits to planet Earth, he discovers the mysteries of the universe. The following is one of Enoch's discoveries: Traveling at Warp 5, we crossed the barrier that separates the two spiral sectors in our galaxy, called the Milky Way. Beyond the stream of neutrinos on the other side of the barrier, I could see the multicolored beacons that our radar illuminated on the monitor screen. The green rings and yellow dots in a circular pattern outlined the entrance to Orion's Highway, a pathway that led to planet Earth. My assignment was to help an individual on Earth to become historically famous an individual whose artistic music skills would calm the soul and quench the fires of war within the hearts of men! The individual was my distant cousin, and I was about to become my Brother's Keeper. Enoch, II The story line unravels universal mysteries about the feasibility of space flight at warp speeds, a decoding of the Bible that shows when the Great Flood occurred, and the purpose fo

SEALS—America’s best just got better. On the heels of a bloody first contact comes Earth’s most important diplomatic mission in history: a summit meeting with the three alien empires vying for control of the galaxy. Assurance that Earth’s first extraterrestrial ambassadors aboard the spaceship Pangaea will be safe means little to Lieutenant Thomas “Stonewall” Jackson. After all, a job’s a job. As escorts on the voyage, Jackson and his sixteen-man team of new-breed Navy SEALs (Sea, Air, Land, and Space) must be neither seen nor heard. Unless, of course, the op hits the fan. While Jackson and his team respond to a distress call from an allied fleet, the Pangaea, with all its diplomatic passengers, goes missing, forcing the SEALs to follow the trail to an ice moon at the edge of the galaxy, a harsh environment crawling with crack commandos and hostile enemies. But for these warriors with their outrageous firepower, what seems an impossible quest is just another day in deep space. From the Paperback edition.
