Herbal Cosmetics Handbook (3rd Revised Edition)

The charismatic Seed Sistas distill over 20 years of clinical and teaching experience into an easy-to-use comprehensive system of herbal medicine. This

book empowers readers to take charge of their own wellbeing by reconnecting them with their local plants, and with the land, the elements and the seasons. "A unique mix of knowledge and wisdom, respect and irreverence" - Bruce Parry This book has been written for anyone who has heard the whispers of the wild and has been stirred to know more, for those with a political conscience and for lovers of the outdoors. Whether you are new to the ways of herbs or already a practising herbalist, it explains how you can take your physical and mental health into your own hands using the plants that grow around you. Sensory Herbalism is a unique system of health devised by the Seed Sistars over 20 years of practice. It combines traditional herbal knowledge with an understanding of how the elements (water, fire, air, earth and spirit) and the ever-changing seasons interact with the human body. Their approach blends science, medicine, creativity, ritual, magic and fun into practical, easy-to-use tools that guide readers in developing their own relationship with plants. Illustrated with 140 artworks, photographs and diagrams, the book offers a revolutionary understanding of how to get to know and use your local medicinal plants. Understand plants better than ever before using the five tools of Sensory Herbalism: observation through the senses, intuition, interpretation, characterization and the poetic creation of plant dreams. Embark on a guided journey through the year, deepening your knowledge of each season's featured plants and enhancing your wellbeing with herbal medicines, nutritious recipes and healing rituals.

The Herbal Handbook

Healing Plants of Nigeria: Ethnomedicine and Therapeutic Applications offers comprehensive information on the use of herbal medicines in West Africa. Combining an evidence-based, ethnobotanical perspective with a pharmacological and pharmaceutical approach to phytomedicine, the book bridges the gap between the study of herbal plants' pharmacological properties and active compounds for the development of clinical drugs and community-oriented approaches, emphasising local use. It demonstrates how the framework of African traditional medicine can be preserved in a contemporary clinical context. The book outlines the history and beliefs surrounding the traditional use of herbs by the local population alongside their application in contemporary phytotherapy in Nigeria and West Africa. It features a critical assessment of the scientific rationale behind the use of these plants in ethnomedicine and offers a composite catalogue of phytotherapeutic and wellness agents, detailing the safety profile, efficacy, and scientific integrity of plants used to treat diseases and optimise health. Features: An ethnobotanical survey containing over 200 full-colour photographs of Nigerian and West African plants. A unique combination of ethnobotany and pharmacognosy, bridging the divide between pharmaceutical and community-oriented approaches to herbal medicine research. Contextual discussion of the

therapeutic potential of Nigerian herbal medicine. Offers a template which can be used to separate the superstitious aspects of ethnomedicine from culturally inherited deposits of knowledge. A handbook for herbal and natural medicine practitioners, the book is aimed at African thinkers, scientists, healthcare providers and students of pharmacology and ethnomedicine.

In *The Fungal Pharmacy*, noted herbalist Robert Rogers introduces readers to more than 300 species of medicinal mushrooms and lichens found in North America. These fungi, Rogers explains, have the capacity to heal both the body and, through the process of myco-remediation, the planet itself. Throughout the book, he documents their success in optimizing the immune system and treating a wide range of acute and chronic diseases, including cardiovascular, respiratory, and

liver problems, blood sugar disorders, cancer, and obesity. Entries discuss the mushroom or lichen's medicinal traits and properties, including active chemical components, preparation methods (including extracts, essences, and essential oils), and historical as well as modern-day usage. Two hundred full-color photos and thorough descriptions make identification easy for the reader. Rogers also delves into the cultural, religious, and literary significance of each mushroom, featuring fascinating tidbits about each one's etymology and history.

Handbook of Phytochemical Constituent Grass, Herbs and Other Economic Plants

With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the Handbook of African Medicinal Plants provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional

remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.

THE HERBAL MEDICINE-MAKER'S HANDBOOK is an entertaining compilation of natural home remedies written by one of the great herbalists, James Green, author of the best-selling THE MALE HERBAL. Writing in a delightfully personal and down-

home style, Green emphasizes the point that herbal medicine-making is fundamental to every culture on the planet and is accessible to everyone. So, first head into the garden and learn to harvest your own herbs, and then head into your kitchen and whip up a batch of raspberry cough syrup, or perhaps a soothing elixir to erase the daily stresses of modern life. From the Trade Paperback edition.

The Herbal Handbook

The definitive, full-color guide to making and using approximately 250 herbal medicines at home, with instructions for everything from harvesting to administering low-cost, DIY remedies. This comprehensive, full-color guide provides detailed, easy-to-follow instructions for making and using approximately 250 herbal medicines at home, including practical tips and numerous effective formulas developed and tested by the authors, both expert herbalists with years of experience. Readers who appreciate the health-giving properties of herbal medicines but are discouraged by the high price of commercial products can now make their own preparations for a fraction of the cost. The authors tell you everything you need to know about harvesting, preparing, and administering herbs in many different forms, including fresh, bulk dried herbs, capsules, extracts in water, alcohol, glycerin, vinegar and oil, and even preparations like essential oils and flower essences. The book also covers topical applications of herbs as salves, lotions, poultices, tooth powders, ear drops, and more, and includes an extensive

chapter on herbal hydrotherapy. The Modern Herbal Dispensary explains why different preparations of the same herb will obtain better results, demonstrating how capsules, teas, tinctures, or glycerites of the same plant will not have exactly the same effect on the body. Leading herbalists Thomas Easley and Steven Horne have tested and proven the herbal formulas they offer, along with suggestions for treating more than one hundred illnesses. They lay out the principles of herbal formulation and also provide instructions on how to prepare single herbs, a procedure that has been largely ignored in other references. More comprehensive than any other guide, thoroughly researched, beautifully illustrated, and presented with ease of use in mind, this book will take its place as the premier reference for those who want to produce all the herbal remedies they need, and to save money in the process.

With the new contribution of Dr. Volker Fintelmann, Weiss's classic text on Herbal Medicine has been expanded and refocused to meet the needs of practicing physicians, residents, students, and other clinicians. Arranged by organ system, the book's clear structure and scientific orientation make the topic of herbal medicine accessible to even the most traditional medical doctor. You will benefit from the newest research, clinical studies, and the pivotal findings of the German Commission E on the efficacy of herbs. Special features include: In-depth coverage of the state-of-the-art of phytotherapy Key prescription information highlighted in each chapter Superb color photographs throughout the text Two new quick reference sections that maximize your access to the material-- by herbs and the disorder they are used for, and by disorder and the herbs used in its treatment

Volker Fintelmann, MD is a licensed doctor of internal medicine and gastroenterology. Former Chairman of the German Commission E, his work focuses on the practical and methodological development of herbal medicine. Rudolf Fritz Weiss, MD (1895-1991), author of the first edition of HERBAL MEDICINE is highly

regarded as the founding father of modern German phytotherapy. He studied botany and medicine at the University of Berlin, qualifying as a doctor in 1922 and subsequently taking additional qualifications in internal medicine. A teaching post in herbal medicine was interrupted by war service as an army doctor, followed by seven years in Russian captivity as a doctor in prisoner-of-war camp hospitals. After retiring from clinical practice in 1961, he devoted his life to the scientific development and acceptance of herbal medicine. Weiss was appointed as a member of the German Commission E in 1978. He was founder and editor of the ZEITSCHRIFT FUER PHYTOTHERAPIE, and lectured on current advances in the subject at the University of Tuebingen.
