Individuals and Societies for the IB MYP 4&5: by Concept

The American way of life, built on individual liberty and limited government, is on life support. American freedom is being gutted. Whether we are trying to run a business, practice a vocation, raise our families, cooperate with our neighbors, or follow our religious beliefs, we run afoul of the government—not because we are doing anything wrong but because the government has decided it knows better. When we object, that government can and does tell us, “Try to fight this, and we’ll ruin you.” In this provocative book, acclaimed social scientist and bestselling author Charles Murray shows us why we can no longer hope to roll back the power of the federal government through the normal political process. The Constitution is broken in ways that cannot be fixed even by a sympathetic Supreme Court. Our legal system is increasingly lawless, unmoored from traditional ideas of “the rule of law.” The legislative process has become systemically corrupt no matter which party is in control. But there’s good news beyond the Beltway. Technology is siphoning power from sclerotic government agencies and putting it in the hands of individuals and communities. The rediversification of American culture is making local freedom attractive to liberals as well as conservatives. People across the political spectrum are increasingly alienated from a regulatory state that nakedly serves its own interests rather than those of ordinary Americans. The even better news is that federal government has a fatal weakness: It can get away with its thousands of laws and regulations only if the overwhelming majority of Americans

Bookmark File PDF The Permission Society How The Ruling Class Turns Our Freedoms Into Privileges And What We Can Do About It

voluntarily comply with them. Murray describes how civil disobedience backstopped by legal defense funds can make large portions of the 180,000-page Federal Code of Regulations unenforceable, through a targeted program that identifies regulations that arbitrarily and capriciously tell us what to do. Americans have it within their power to make the federal government an insurable hazard like hurricanes and floods, leaving us once again free to live our lives as we see fit. By the People's hopeful message is that rebuilding our traditional freedoms does not require electing a right-thinking Congress or president, nor does it require five right-thinking justices on the Supreme Court. It can be done by we the people, using America's unique civil society to put government back in its proper box. From the Hardcover edition.

The Permission Society

Join the Mysterious Benedict Society as Reynie, Kate, Sticky, and Constance embark on a daring new adventure that threatens to force them apart from their families, friends, and even each other. When an unexplained blackout engulfs Stonetown, the foursome must unravel clues relating to a nefarious new plot, while their search for answers brings them closer to danger than ever before. Filled with page-turning action and mind-bending brain teasers, this wildly inventive journey is sure to delight.

Climates of the British Isles

A WALL STREET JOURNAL BESTSELLER As Alexis Ohanian learned when he helped to co-found the immensely popular reddit.com, the internet is the most powerful and democratic tool for disseminating information in human history. And when that power is harnessed to create new communities, technologies, businesses or charities, the results can be absolutely stunning. In this book, Alexis will share his ideas, tips and even his own doodles about harnessing the power of the web for good, and along the way, he will share his philosophy with young entrepreneurs all over the globe. At 29, Ohanian has come to personify the dorm-room tech entrepreneur, changing the world without asking permission. Within a couple of years of graduating from the University of Virginia, Ohanian did just that, selling reddit for millions of dollars. He's gone on to start many other companies, like hipmunk and breadpig, all while representing Y Combinator and investing in over sixty other tech startups. WITHOUT THEIR PERMISSION is his personal guidebook as to how other aspiring entrepreneurs can follow in his footsteps.

Permission to Feel

“At a time when policing in America is at a crossroads, Barry Friedman provides much-needed insight, analysis, and direction in his thoughtful new book. Unwarranted illuminates many of the often ignored issues surrounding how we police in America and highlights why reform is so urgently needed. This revealing book comes at a critically important time and has much to offer all who care about fair treatment and public safety.” —Bryan Stevenson, founder and Executive Director of the Equal Justice Initiative and author of Just Mercy: A Story of Justice and Redemption In June 2013, documents leaked by Edward Snowden sparked

Bookmark File PDF The Permission Society How The Ruling Class Turns Our Freedoms Into Privileges And What We Can Do About It

widespread debate about secret government surveillance of Americans. Just over a year later, the shooting of Michael Brown, a black teenager in Ferguson, Missouri, set off protests and triggered concern about militarization of law enforcement and discriminatory policing. In *Unwarranted*, Barry Friedman argues that these two seemingly disparate events are connected—and that the problem is not so much the policing agencies as it is the rest of us. We allow these agencies to operate in secret and to decide how to police us, rather than calling the shots ourselves. And the courts, which we depended upon to supervise policing, have let us down entirely. *Unwarranted* tells the stories of ordinary people whose lives were torn apart by policing—by the methods of cops on the beat and those of the FBI and NSA. Driven by technology, policing has changed dramatically. Once, cops sought out bad guys; today, increasingly militarized forces conduct wide surveillance of all of us. Friedman captures the eerie new environment in which CCTV, location tracking, and predictive policing have made suspects of us all, while proliferating SWAT teams and increased use of force have put everyone's property and lives at risk. Policing falls particularly heavily on minority communities and the poor, but as *Unwarranted* makes clear, the effects of policing are much broader still. Policing is everyone's problem. Police play an indispensable role in our society. But our failure to supervise them has left us all in peril. *Unwarranted* is a critical, timely intervention into debates about policing, a call to take responsibility for governing those who govern us.

Systems Practice in the Information Society

This is the second volume of a four volume set intended to describe the techniques and applications of thermoanalytical and calorimetric methods. The general techniques and methodology are covered extensively in Volume 1, along with the fundamental physicochemical background needed. Consequently the subsequent volumes dwell on the applications of these powerful and versatile methods, while assuming a familiarity with the techniques. Volume 2 covers major areas of inorganic materials and some related general topics, e.g., catalysis, geochemistry, and the preservation of art. The chapters are written by established practitioners in the field with the intent of presenting a sampling of the how thermoanalytical and calorimetric methods have contributed to progress in their respective areas. The chapters are not intended as exhaustive reviews of the topics, but rather, to illustrate to the readers what has been achieved and to encourage them to consider extending these applications further into their domains of interest. - Provides an appreciation for how thermal methods can be applied to inorganic materials and processes. - Provides an insight into the versatility of thermal methods. - Shares the experiences of experts in a variety of different fields. - A valuable reference source covering a huge area of materials coverage.

Echo is a failing actress who prefers to lose herself in the lives of others rather than examine her own. When her father disappears in a seaside misstep, she and her mother are left grief-stricken, unsure of how to piece back together their family that, it turns out, had never been whole. But then Orly – a dominatrix – moves in across the street. And through her, Echo begins to find the pieces that will allow her to carry on. Set among the bright colours and harshly glittering lights of Los Angeles, this is a love story about people addled with dreams and expectations who turn to the erotic for answers.

Permission to Remain Among Us

Vol. 1- includes the proceedings of the society.

Grant Wood

If a picture is worth a thousand words, then it's a good bet that at least half of those words relate to the picture's copyright status. Art historians, artists, and anyone who wants to use the images of others will find themselves awash in byzantine legal terms, constantly evolving copyright law, varying interpretations by museums and estates, and despair over the complexity of the whole situation. Here, on a white—not a high—horse, Susan Bielstein offers her decades of experience as an editor working with illustrated books. In doing so, she unsnarls the threads of permissions that have ensnared scholars, critics, and artists for years. Organized as a series of “takes” that range from short sidebars to extended discussions, *Permissions, A Survival Guide* explores intellectual property law as it pertains to visual imagery. How can you determine whether an artwork is copyrighted? How do you procure a high-quality reproduction of an image? What does “fair use” really mean? Is it ever legitimate to use the work of an artist without permission? Bielstein discusses the many uncertainties that plague writers who work with images in this highly visual age, and she does so based on her years navigating precisely these issues. As an editor who has hired a photographer to shoot an incredibly obscure work in the Italian mountains (a plan that backfired hilariously), who has tried to reason with artists' estates in languages she doesn't speak, and who has spent her time in the archival trenches, she offers a snappy and humane guide to this difficult terrain. Filled with anecdotes, asides, and real courage, *Permissions, A Survival Guide* is a unique handbook that anyone working in the visual arts will find invaluable, if not indispensable.

Transactions of the Royal Scottish Society of Arts

Born into slavery in 1818, Frederick Douglass rose to become a preeminent American intellectual and activist who, as statesman, author, lecturer, and scholar, helped lead the fight against slavery and racial oppression. Unlike many other leading abolitionists, Douglass embraced the U.S. Constitution, believing it to be an essentially anti-slavery document guaranteeing that individual rights belonged to all Americans, of all races. Furthermore, in his most popular lecture, “Self-Made Men,” Douglass praised those who rise through their own effort and devotion rather than the circumstances of their privilege. For him, independence, pride, and personal and economic freedom were the natural consequences of the equality

that lay at the heart of the American dream—a dream that all people, regardless of race, gender, or class, deserved a chance to pursue. This biography takes a fresh look at the life and inspirational legacy of one of America's most passionate and dedicated thinkers. As detailed in this compact and highly compelling work, Douglass—in some ways a conservative, in other ways a revolutionary—espoused and lived the central idea of his work: we must be free to make ourselves the best people we can be.

Year Book of the New York Society of Architects

The Conscience of the Constitution: The Declaration of Independence and the Right to Liberty documents a forgotten truth: the word “democracy” is nowhere to be found in either the Constitution or the Declaration. But it is the overemphasis of democracy by the legal community—rather than the primacy of liberty, as expressed in the Declaration of Independence—that has led to the growth of government power at the expense of individual rights. Now, more than ever, Sandefur explains, the Declaration of Independence should set the framework for interpreting our fundamental law. In the very first sentence of the Constitution, the founding fathers stated unambiguously that “liberty” is a blessing. Today, more and more Americans are realizing that their individual freedoms are being threatened by the ever-expanding scope of the government. Americans have always differed over important political issues, but some things should not be settled by majority vote. In *The Conscience of the Constitution*, Timothy Sandefur presents a dramatic new challenge to the status quo of constitutional law.

Journal of the Society of Comparative Legislation

John W. Meyer's work broke new grounds in institutional thought in sociology and made him a central thinker for the emerging interdisciplinary field of neoinstitutionalism, while at the same time establishing institutional thought's comparative variant, world society theory. His scholarship plays a prominent role in contemporary social theory, and has shaped research areas such as international relations and globalization, organization theory, and management studies. One of the results of Meyer's wide-ranging and interdisciplinary influence is that his work has appeared in a diverse range of outlets. This book brings together some of John W. Meyer's widely-scattered work, reviewing four decades of scholarship, and adding several original pieces from Meyer's current work. It gathers substantive commentary on social processes, from stratification to globalization to socialization, as well as on key social institutions, from science to religion to law to education. In its expansive review, this book is both about neoinstitutional thought in general and world society theory in particular. This book is both by John W. Meyer and about John W. Meyer: to the compilation of Meyer's canonized and current work, Georg Krücken and Gili S. Drori add an essay on the theoretical and empirical contribution of Meyer's institutional theory, placing it within the broader context of contemporary social theory, globalization research, and organizational studies in both in the United States and Europe.

The Consumer Society

From award-winning blogger Melissa Camara Wilkins, come and find a stunningly simple path to confidence and clarity. All you have to do is give yourself permission to show up as your gloriously imperfect self. Trying to fix yourself is exhausting. But being yourself - that is both possible and life-giving. The key is a simple heart-shift from chasing after perfection to learning to tell a truer story about ourselves, the world, and our place in it. Melissa Camara Wilkins invites you into her journey of discovering the profound simplicity of dropping the pretenses and allowing ourselves to be fully human - flaws and all. This is a story about making life simpler by letting go of who you think you're supposed to be and becoming who you really are. With wit and compassion, Melissa explores how to be present, show up as your real self, and get comfortable in your own skin by aligning the truth inside you with the life you live on the outside. Gain confidence with the freeing practices of dropping the mask, abandoning the experts, and understanding your real assignment. With refreshing honesty and insight, Melissa invites you to move from the either/or dichotomy into a spacious freedom of embracing the both/and - brave and scared, messy and real, gloriously imperfect and absolutely enough. This is your permission slip to be your whole, human self. For everyone who feels the pressure to fit in, measure up, and get it together, Permission Granted is a life-giving invitation to soul-level simplicity.

In Defense of Looting

The community of Oberlin, Ohio, was founded as an evangelical community in 1833 and in 1834, Oberlin College became one of the first American colleges to admit black students. The story of Oberlin--both community and college--mirrors the story of race in America.

Social Psychology and Human Sexuality

In spite of its central importance in human relationships, the study of sexuality has been somewhat neglected by social psychologists. This reader brings together a fascinating selection of articles which examine sex as a social phenomenon: as a group of behavior patterns that people engage in together, under the influence of social pressures, and indeed as ways that people relate to each other.

Permission to Forget

#1 NEW YORK TIMES BESTSELLER • NOW A MAJOR MOTION PICTURE STARRING MICHAEL B. JORDAN AND JAMIE FOXX • A powerful true story about the potential for mercy to redeem us, and a clarion call to fix our broken system of justice—from one of the most brilliant and influential lawyers of our time. “[Bryan Stevenson’s] dedication to fighting for justice and equality has inspired me and many others and made a lasting impact on our country.”—John Legend NAMED ONE OF THE MOST INFLUENTIAL BOOKS OF THE DECADE BY CNN • Named One of the Best Books of the Year by The New York Times • The Washington Post • The Boston Globe • The Seattle Times • Esquire • Time Bryan Stevenson was a young lawyer when he founded the Equal Justice Initiative, a legal practice dedicated to defending those

most desperate and in need: the poor, the wrongly condemned, and women and children trapped in the farthest reaches of our criminal justice system. One of his first cases was that of Walter McMillian, a young man who was sentenced to die for a notorious murder he insisted he didn't commit. The case drew Bryan into a tangle of conspiracy, political machination, and legal brinkmanship—and transformed his understanding of mercy and justice forever. Just Mercy is at once an unforgettable account of an idealistic, gifted young lawyer's coming of age, a moving window into the lives of those he has defended, and an inspiring argument for compassion in the pursuit of true justice. Winner of the Carnegie Medal for Excellence in Nonfiction • Winner of the NAACP Image Award for Nonfiction • Winner of a Books for a Better Life Award • Finalist for the Los Angeles Times Book Prize • Finalist for the Kirkus Reviews Prize • An American Library Association Notable Book "Every bit as moving as To Kill a Mockingbird, and in some ways more so . . . a searing indictment of American criminal justice and a stirring testament to the salvation that fighting for the vulnerable sometimes yields."—David Cole, The New York Review of Books "Searing, moving . . . Bryan Stevenson may, indeed, be America's Mandela."—Nicholas Kristof, The New York Times "You don't have to read too long to start cheering for this man. . . . The message of this book . . . is that evil can be overcome, a difference can be made. Just Mercy will make you upset and it will make you hopeful."—Ted Conover, The New York Times Book Review "Inspiring . . . a work of style, substance and clarity . . . Stevenson is not only a great lawyer, he's also a gifted writer and storyteller."—The Washington Post "As deeply moving, poignant and powerful a book as has been, and maybe ever can be, written about the death penalty."—The Financial Times "Brilliant."—The Philadelphia Inquirer

Proceedings of the Massachusetts Historical Society

Our understanding of climate and its role in human affairs has changed markedly over recent years, as have climate observation systems and modelling capabilities. Reliance on recent weather statistics to provide a guide for future climate is no longer viable. Evidence of human-induced climate change has placed climate high on political and the media agendas. *Climates of the British Isles* provides a comprehensive account of what we know about climate and changing climates at the end of the twentieth century. Integrating the historical and geographical dimensions of climate, the crucial link between past and future climatic conditions is examined through the geographical lens of the British Isles. *Climates of past ages* are reconstructed and full descriptions of present climate are illustrated by a wealth of graphs, maps and images. Important climate data sets are provided. Marking the twenty-fifth anniversary of the internationally acclaimed Climatic Research Unit, this book distils much of the leading research of present and recent members of the unit and presents an authoritative, accessible view of climatic change and prospects for the next millenium and beyond.

Tavistock Press was established as a co-operative venture between the Tavistock Institute and Routledge & Kegan Paul (RKP) in the 1950s to produce a series of major contributions across the social sciences. This volume is part of a 2001 reissue of a selection of those important works which have since gone out of print, or are difficult to locate. Published by Routledge, 112 volumes in total are being brought together under the name The International Behavioural and Social Sciences Library: Classics from the Tavistock Press. Reproduced here in facsimile, this volume was originally published in 1977 and is available individually. The collection is also available in a number of themed mini-sets of between 5 and 13 volumes, or as a complete collection.

Annual Report of the American Scenic and Historic Preservation Society to the Legislature of New York

The social and political climate in which Wood's art flourished bears certain striking similarities to America today, as national identity and the tension between urban and rural areas reemerge as polarizing issues in a country facing the consequences of globalization and the technological revolution. Wood portrayed the tension and alienation of contemporary experience. By fusing meticulously observed reality with fables of childhood, he crafted unsettling images of estrangement and apprehension that pictorially manifest the anxiety of modern life.

Down to Earth Sociology: 14th Edition

The mental well-being of children and adults is shockingly poor. Marc Brackett, author of *Permission to Feel*, knows why. And he knows what we can do. "We have a crisis on our hands, and its victims are our children." Marc Brackett is a professor in Yale University's Child Study Center and founding director of the Yale Center for Emotional Intelligence. In his 25 years as an emotion scientist, he has developed a remarkably effective plan to improve the lives of children and adults – a blueprint for understanding our emotions and using them wisely so that they help, rather than hinder, our success and well-being. The core of his approach is a legacy from his childhood, from an astute uncle who gave him permission to feel. He was the first adult who managed to see Marc, listen to him, and recognize the suffering, bullying, and abuse he'd endured. And that was the beginning of Marc's awareness that what he was going through was temporary. He wasn't alone, he wasn't stuck on a timeline, and he wasn't "wrong" to feel scared, isolated, and angry. Now, best of all, he could do something about it. In the decades since, Marc has led large research teams and raised tens of millions of dollars to investigate the roots of emotional well-being. His prescription for healthy children (and their parents, teachers, and schools) is a system called RULER, a high-impact and fast-effect approach to understanding and mastering emotions that has already transformed the thousands of schools that have adopted it. RULER has been proven to reduce stress and burnout, improve school climate, and enhance academic achievement. This book is the culmination of Marc's development of RULER and his way to share the strategies and skills with readers around the world. It is tested, and it works. This book combines rigor, science, passion and inspiration in equal parts. Too many children and adults are suffering; they are ashamed of their feelings and emotionally unskilled, but they don't have to be. Marc Brackett's life mission is to

reverse this course, and this book can show you how.

Permission Granted

As a collection of ideas and methodologies, systems thinking has made an impact in organizations and in particular in the information systems field. However, this main emphasis on organizations limits the scope of systems thinking and practice. There is a need first to use systems thinking in addressing societal problems, and second to enable people involved in developing the information society to reflect on the impacts of systems and technologies in society as a whole. Thus, there are opportunities to review the scope and potential of systems thinking and practice to deal with information society-related issues. Systems Practice in the Information Society provides students of information systems as well as practicing Information Systems managers with concepts and strategies to enable them to understand and use systems thinking methodologies and address challenges posed by the development of information-based societies. This book brings experiences, ideas, and applications of systemic thinking in designing and evaluating socio-technological initiatives. Using a number of cultural contexts, this book explores how organizations, including governments, can enable better access to information and communication technologies and improve the quality of life of individuals.

Writings on Human Rights, Law, and Society in India

The mental well-being of children and adults is shockingly poor. Marc Brackett, author of *Permission to Feel*, knows why. And he knows what we can do. Just Mercy

Basalt is the most voluminous of all the igneous rocks. Extensive field, experimental, petrographic and geochemical studies of basalt have provided us with a considerable understanding of igneous petrogenesis, plate tectonics, and crust-mantle interaction and exchange. One important aspect of geology that has developed over the last few decades is the study of oceanic basalts. The ocean basins cover about two thirds of the earth's surface and are floored by a basement of oceanic basalt that is continuously undergoing generation at spreading centres and destruction at subduction zones, a process which throughout geological time is recognized as the principal means of generating new crust. The study of oceanic basalts enables us to understand better the generation and recycling of crustal materials (including the continental crust), and the exchange between oceanic crust and seawater via hydrothermal activity. Compositional variations displayed by oceanic basalts provide windows into the mantle, and the identification of isotopically-distinct mantle reservoirs demonstrates that the source of oceanic basalts is heterogeneous and is controlled by convection and reservoir interactions within the mantle.

Permission to Feel

The voice behind the popular grief podcast *Coming Back: Conversations on Life After Loss* puts pen to paper in her first book to create a powerful permission slip for anyone facing the devastating heartbreak that comes with death, divorce, diagnosis, and so much more. When loss steamrolls through, there's a lot of hidden and not-so-hidden "rules" about the way you're "supposed" to grieve: "You should be over it after a year." "Put on a brave face." "Keep your grief at home." *Permission to Grieve* calls out society's garbage rules for what they really are: toxic and repressive narratives that insist we abandon our true selves in the face of grief. Shelby asks instead: - What if we allowed grief the freedom to influence our emotions? - What if we allowed grief the power to alter our identities at home, school, and work? - What if we allowed grief to show up in the physical world through art, memorial, and ritual? - What if we gave ourselves... *Permission to Grieve*? Drawing on her experience as a grieving person and two years' worth of interviews with grief experts like Megan Devine, Kerry Egan, and Caleb Wilde, Shelby Forsythia makes the case for radical, self-honoring permission—free from personal judgement and society's restrictive timelines and rules. *Permission to Grieve* guides you to call your grief out of hiding and invites you to give it permission through thoughtful writing prompts, easy-to-follow exercises, and clever visual illustrations. In this book you'll learn: - How society encourages us to practice life-rejection and self-abandonment instead of expressing our grief - The three big permissions that unlock the emotions, identities, and actions our grief

wants to express—featuring insights from -podcast guests and Shelby Forsythia’s personal grief community - Tips and tricks for practicing permission to grieve in the real world—including how to ask for permission to grieve from friends, family, and coworkers and tools for helping others tap into their own permission to grieve Permission to Grieve is not a hall pass from a higher authority; it’s a personal practice that is strengthened with self-awareness, attention, and love. You don’t have to wait to receive permission to grieve; you already have it. Permission to Grieve is a book for people who are tired of covering up and pushing down their pain. It’s a book for people who know that there’s a better, more compassionate way to approach the worst thing that has ever happened to them. It’s a book for people who believe that grief is not an enemy to be vanquished as quickly as possible, but an opportunity to connect more deeply with their human selves. Because even in the midst of loss, Shelby writes, we can create grace, space, and room to breathe.

Permission to Grieve

Handbook of Thermal Analysis and Calorimetry

A fresh argument for rioting and looting as our most powerful tools for dismantling white supremacy Looting--a crowd of people publicly, openly, and directly seizing goods--is one of the more extreme actions that can take place in the midst of social unrest. Even self-identified radicals distance themselves from looters, fearing that violent tactics reflect badly on the broader movement. But Vicky Osterweil argues that stealing goods and destroying property are direct, pragmatic strategies of wealth redistribution and improving life for the working class--not to

mention the brazen messages these methods send to the police and the state. All our beliefs about the innate righteousness of property and ownership, Osterweil explains, are built on the history of anti-Black, anti-Indigenous oppression. From slave revolts to labor strikes to the modern-day movements for climate change, Black lives, and police abolition, Osterweil makes a convincing case for rioting and looting as weapons that bludgeon the status quo while uplifting the poor and marginalized. *In Defense of Looting* is a history of violent protest sparking social change, a compelling reframing of revolutionary activism, and a practical vision for a dramatically restructured society.

The Consumer Society Reader

For thirty-five years and through thirteen editions, Jim Henslin's *Down to Earth Sociology* has opened new windows onto the social realities that shape our world. Now in its fourteenth edition, the most popular anthology in sociology includes new articles on our changing world while also retaining its classic must-read essays. Focusing on social interaction in everyday life, the forty-six selections bring students face-to-face with the twin projects of contemporary sociology: understanding the individual's experience of society and analyzing social structure. The fourteenth edition's exceptional new readings include selections on the role of sympathy in everyday life, mistaken perceptions of the American family, the effects of a criminal record on getting a job, and the major social trends affecting our future. Together with these essential new articles, the selections by Peter Berger, Herbert Gans, Erving Goffman, Donna Eder, Zella Luria, C. Wright Mills, Deborah Tannen, Barrie Thorne, Sidney Katz, Philip Zimbardo, and many others provide firsthand reporting that gives students a sense of "being there." Henslin also explains basic methods of social research, providing insight into how sociologists explore the social world. The selections in *Down to Earth Sociology* highlight the most significant themes of contemporary sociology, ranging from the sociology of gender, power, politics, and religion to the contemporary crises of racial tension, crime, rape, poverty, and homelessness.

Report of the Committee of the Society for the Improvement of Prison Discipline, and for the Reformation of Juvenile Offenders

Without Their Permission

Throughout history, kings and emperors have promised "freedoms" to their people. Yet these freedoms were really only permissions handed down from on high. The American Revolution inaugurated a new vision: people have basic rights to life, liberty, and the pursuit of happiness, and government must ask permission from them. Sadly, today's increasingly bureaucratic society is beginning to turn back the

clock and to transform America into a nation where our freedoms—the right to speak freely, to earn a living, to own a gun, to use private property, even the right to take medicine to save one's own life—are again treated as privileges the government may grant or withhold at will. Timothy Sandefur examines the history of the distinction between rights and privileges that played such an important role in the American experiment, and how we can fight to retain our freedoms against the growing power of government. Illustrated with dozens of real-life examples—including many cases he litigated himself—Sandefur shows how treating freedoms as government-created privileges undermines our Constitution and betrays the basic principles of human dignity.

The Conscience of the Constitution

The Consumer Society Reader features a range of key works on the nature and evolution of consumer society. Included here is much-discussed work by leading critics such as Jean Baudrillard, Susan Bordo, Dick Hebdige, bell hooks, and Janice Radway. Also included is a full range of classics, such as Frankfurt School writers Adorno and Horkheimer on the Culture Industry; Thorstein Veblen's oft-cited writings on "conspicuous consumption"; Betty Friedan on the housewife's central role in consumer society; John Kenneth Galbraith's influential analysis of the "affluent society"; and Pierre Bourdieu on the notion of "taste." "Consumer society--the 'air we breathe,' as George Orwell has described it--disappears during economic downturns and political crises. It becomes visible again when prosperity seems secure, cultural transformation is too rapid, or environmental disasters occur. Such is the time in which we now find ourselves. As the roads clog with gas-guzzling SUVs and McMansions proliferate in the suburbs, the nation is once again asking fundamental questions about lifestyle. Has 'luxury fever,' to use Robert Frank's phrase, gotten out of hand? Are we really comfortable with the 'Brand Is Me' mentality? Have we gone too far in pursuit of the almighty dollar, to the detriment of our families, communities, and natural environment? Even politicians, ordinarily impermeable to questions about consumerism, are voicing doubts [and] polls suggest majorities of Americans feel the country has become too materialistic, too focused on getting and spending, and increasingly removed from long-standing non-materialist values." —From the introduction by Douglas B. Holt and Juliet B. Schor
