The story is about a golden-haired youth who wanders into the city of Teloth, telling tales of the great city of Aira, where he was prince. While Iranon enjoys singing and telling his tales of wonder, few appreciate it. A city solon even orders Iranon to cease his singing & music, and become apprenticed to the cobbler - or leave the city by sunset. When a disenfranchised boy named Romnod suggests leaving Teloth to go to the famed city of Oonai (which he thinks may be Aira, now under a different name), Iranon takes him up on his offer.

The first part of acclaimed author Mick Smith's epic, completely unauthorised history of Britain's external intelligence community. Six tells the complete story of the service's birth and early years, including the tragic, untold tale of what happened to Britain's extensive networks in Soviet Russia between the wars. It reveals for the first time how the playwright and MI6 agent Harley Granville Barker bribed the Daily News to keep Arthur Ransome in Russia, and the real reason Paul Dukes returned there. It shows development of tradecraft and the great personal risk officers and their agents took, far from home and unprotected. In Salonika, for example, Lieutenant Norman Dewhurst realised it was time to leave when he opened his door to find one of his agents hanging dismembered in a sack. This first part of Six takes us up to the eve of the conflict, using hundreds of previously classified files and interviews with key players to show how one of the world's most secretive of secret agencies originated and developed into something like the MI6 we know today.

The idea of koinonia has gained prominence in recent ecumenical discussions. Lorelei Fuchs proposes the theological concept of koinonia, loosely translated as communion, as the key to moving the fractured churches toward a future unity. Fuchs challenges churches to move beyond mere dialogue to apply their ecumenical insights at the local level. She begins by relating the exegetical meaning of koinonia to its ecumenical meaning, tracing the place of koinonia both within the churches and between the churches. She then examines the concept in the extensive and fruitful dialogues that have taken place between Lutherans, Anglicans, and Roman Catholics, finally articulating a symbolic competence for communionality that provides a rich and workable way forward for church unity at all levels. Encompassing the latest in ecumenical thought within the Catholic, Anglican, and Lutheran milieu, *Koinonia and the Quest for an Ecumenical Ecclesiology* provides a framework for moving closer to the reality of Christ's prayer that all may be one.

Pro patria: the autobiography of an Irish conspirator, ed. [or rather written] by W. Mackay

This book is about the size, the shape and the architectural nature of the Globe playhouse of Shakespeare's time, the most important theatre in English history. The design of the second Globe, and by extension the first, has been a subject of keen debate for many years, fostered by recurrent attempts to reconstruct the playhouse, both in London and Detroit. Professor Orrell here offers fresh ways of looking at some well-known documents and newer evidence. By using detailed diagrams and seventeenth-century panoramas, the author is able to establish the accuracy of Hollar's famous 'Long View' of London, and by reconstructing his methods arrives at an exact measurement of the diameter of the second Globe. These findings document many advances in our hard knowledge of the theatre buildings of Shakespeare's time, to the point where reconstructions may be undertaken with confidence.

In this compelling sequel to Power Quest Book One: America's Obsession with the Paranormal, S. Douglas Woodward reveals the hidden history of Nazi infestation of American institutions after World War II. Beginning with the 1952 flying saucer flap over the nations capital and concluding with the CIA's clandestine mind control agenda of the 1950s-1970s, the reader is confronted with highly charged and seldom known facts. The story centers on America's erstwhile alliance with German fascism linked to the infamous personalities of Hitler's Nazi Party who escaped the war crimes trials at Nuremberg. In this second volume of Power Quest, The Ascendancy of Antichrist in America, Woodward brings to the reader the recently declassified proof our America has often shunned its most noble ideals. The author uncovers a vast record of unethical and deceptive Federal activities committed in Washington's darkened corridors of political power. Woodward condenses mountains of highly reliable research compiled by authoritative investigative journalists and insiders along with his own well-turned analysis, demonstrating that the political and spiritual evil of Nazism was often excused and encouraged by American officials as part of a blind quest to fight communism during the Cold War. Woodward makes no secret of his evangelical perspective. But Power Quest: The Ascendancy of Antichrist in America is not a selective proof texting of biblical assertions or a diatribe against liberal political views. His account is a factual history that most Americans have never heard. For conservative Christian readers, Woodward speaks prophetically - challenging the cherished assumption held by political conservatives that America traditionally takes the moral high ground. And he poses an alternative view to the typical eschatological position, asking "Could America be the seat of power for a literal personage the Bible calls Antichrist?"

The Political Roots of Racial Tracking in American Criminal Justice

Starting from the premise that democracy is more than simply a matter of universal suffrage and the holding of regular multiparty elections, and that development is about much more than growth of GDP, this Report focuses on how to make democracy work for pro-poor development and on development policies that in themselves uphold and promote democratic values. It argues that development and democracy are not only goals in their own right but must also be mutually reinforcing. Pro-poor development recognises that people need the

'capabilities' to do and be the things that they have reason to value, such as being adequately nourished, having equitable access to justice and participating in decisions that affect their lives. It also recognises that development policies aimed at the general populace may have a more limited positive impact on particularly disadvantaged groups. Such groups need to be identified (for example, in terms of gender, ethnicity, religion, age or occupation) and policies need to be specifically designed for improving the lives of the poor. The Report argues that governments, the private sector, civil society and the international community each have a vital role to play in delivering development and democracy, and calls for responsibility, partnership and concrete actions from all these actors. Without responsibility on all these levels, development and democracy will remain rhetoric rather than become reality. Prepared by the Commonwealth Expert Group on Development and Democracy at the request of Commonwealth Heads of Government, the Report contains a number of recommendations for action at the national and international levels. It will be of interest to policy-makers, multilateral and bilateral agencies, the private sector, civil society organisations and all those committed to development, democracy and the achievement of the Millennium Development Goals.

Is your company a storyteller—or a storydoer? The old way to market a business was storytelling. But in today's world, simply communicating your brand's story in the hope that customers will listen is no longer enough. Instead, your authentic brand must be evident in every action the organization undertakes. Today's most successful businesses are storydoers. These companies create products and services that, from the very beginning, are manifestations of an authentic and meaningful story—one told primarily through action, not advertising. In *True Story*, creative executive Ty Montague argues that any business, regardless of size or industry, can embrace the principles of storydoing. Indeed, our best-run companies—from small start-ups to global conglomerates—organize around a coherent narrative that is then broadcast through every action they take (from product design to customer service to marketing). Montague shows why storydoing firms are nimble, more adaptive to change, and more efficiently run businesses. Montague is a founder of the growth consultancy co:collective and the former president and CCO of J. Walter Thompson, the largest advertising agency in North America. He brings his depth of creative business experience to the book and provides a clear framework and proven process for bringing you and your customers together in the creation of your brand story. Montague introduces five critical elements—what he calls the “the four truths and the action map”—that are the foundation of storydoing: • the participants (your customers, partners, and employees) • the protagonist (your company today) • the stage (the world around your business) • the quest (your driving ambition and contribution to the world) • your action map (the actions that will make your story real for participants) The book is filled with examples of how forward-thinking organizations—including Red Bull, Shaklee, Grind, TOMS Shoes, and News Corporation—are effectively using

storydoing to transform their organizations and drive extraordinary results.

This book traces the economic, political, and psychological factors that have influenced India's pro-Arab policy from the 1920s to today, and how these factors influence the implementation of present policy with the Arab world. The origins and dynamics of India's foreign policy with West Asia are discussed in detail. Although India's relations with her immediate neighbors are the subject of much study, this examination of India and the Arab world provides a multitude of the perplexing issues that have a direct bearing on India's diversity and rise to mid-level power status.

Kirby's Quest for Somerset

A critical examination of political Zionism, a topic often considered taboo in the West, is long overdue. Moreover, the discussion of Christian Zionism is usually confined to Evangelical and fundamentalist settings. The present volume will break the silence currently reigning in many religious, political, and academic circles and, in so doing, will provoke and inspire a new, challenging conversation on theological and ethical issues arising from various aspects of Zionism--a conversation that is vital to the quest for a just peace in Israel and Palestine. The eight authors offer a rich diversity of religious faith, academic research, and practical experience, as they represent all three Abrahamic faiths and five different Christian traditions. Among the many themes that run through Zionism and the Quest for Justice in the Holy Land is the contrast between exclusivist narratives, both biblical and political, and the more inclusive narratives of the prophetic Scriptures, which provide the theological foundation and the moral imperative for human liberation. Readers will be drawn into a compelling, readable, and stimulating series of essays that tackle many of the complex issues that still confound clergy, politicians, diplomats, and academic experts.

This account of key issues in Israel's foreign policy offers a new insight into Israeli thinking. It also covers issues where the focus is on American, British, Egyptian and Jordanian diplomacy. The author's research is based on an abundance of

Koinonia and the Quest for an Ecumenical Ecclesiology

This is a study of issues in good governance in South Asia, viz. in the countries of India, Pakistan, Sri Lanka and Nepal. The focus is on the interconnections between governance, decentralization (of authority and decision making) and poverty eradication. The book submits a stratagem to turn South Asia's greatest handicap, poverty, into a source of strength, in which the poor contribute directly to growth. The key to this pro-poor growth strategy, according to the authors, is community mobilization through social movements and non-governmental development initiatives. The book is divided into three parts, the conceptual framework, illustrative case studies and lessons for macro/microeconomic policy. Part I critically evaluates conventional developmental thinking and suggests the outline of an alternative pro-poor developmental strategy. Part II, the backbone of the volume, is a collection of six case studies from selected locations in south Asia, covering both rural and urban experiences. Part III draws lessons from these studies for a value-driven policy with both short-term and long-term implications. The book is a first of its kind, examining in-depth issues of vital importance to the development of the South Asian region. The importance of this volume lies in the synthesized lessons for policy and implementation drawn from cases where new ground has been broken in the conceptualization of social mobilization and pro-poor growth.

True Story

Power Quest, Book Two

The race problem in the American criminal justice system endures because of the enabling behavior of the public and of policy makers. The tendency of racial justice advocates to point the finger of blame chiefly at law enforcement, or racial conservatives, or the war on drugs, or any other single entity is misguided. Whether the problem is defined in terms of minority overrepresentation in the criminal justice system or in terms of the differential treatment minorities receive while entangled within the criminal process, a critical mass of citizens and policy makers that care enough to demand something be done about it is lacking. *We Are "The Man"* is the story of how racial concerns are consistently ignored in the national crime-policy process and why.

Inflation targeting (IT) has become the sacred cow of central banking. But its suitability to developing nations remains contested. The contributors to this

volume perform the valuable service of sketching out plausible, more development-friendly alternatives. They are to be commended in particular for avoiding a one-size-fits-all approach and paying close attention to the needs of specific countries. Their proposals range from relatively minor tinkering in IT to comprehensive overhaul. A common theme is the central role of the real exchange rate, which the central banks ignore at their economies peril. Dani Rodrik, Harvard University, US

As the world economy is devastated by a virulent financial crisis and jobs are lost in scores, central bankers are increasingly questioned as to why they have failed to sustain stability and growth even though they told us all along that conquering inflation would be necessary and sufficient to do so while hoping to get a pat on the back for achieving a degree of price stability unprecedented in recent times. This book provides a lot of food for thought on why. It is a powerful critique of the orthodox obsession with inflation in neglect of the two deepseated problems of the unbridled market economy financial instability and unemployment. It is a must for all policy makers, notably in the developing world, and for the mainstream. Yilmaz Akyuz, formerly of the United Nations Conference on Trade and Development, Geneva, Switzerland

This collective volume makes a compelling case for balancing the developmental and stabilization functions of central banks. In particular, the authors emphasize that, as practiced in many successful developing countries, competitive real exchange rates can be good for growth and employment generation, and should thus be a specific focus of central bank actions. The book is a must read for those looking for a more balanced framework for central bank policies. José Antonio Ocampo, Columbia University, US and former Under-Secretary-General of the United Nations for Economic and Social Affairs and Finance Minister of Colombia

This book, written by an international team of economists, develops concrete, country specific alternatives to inflation targeting, the dominant policy framework of central bank policy that focuses on keeping inflation in the low single digits to the virtual exclusion of other key goals such as employment creation, poverty reduction and sustainable development. The book includes thematic chapters, including analyses of class attitudes toward inflation and unemployment and the gender impacts of restrictive monetary policy. Other chapters propose improved monetary frameworks for Argentina, Brazil, India, Mexico, the Philippines, South Africa, Turkey, and Vietnam. Policy frameworks that are explored include employment targeting, and targeting a stable and competitive real exchange rate. The authors also show that to reach a larger number of targets, including higher employment and stable inflation, central banks must use a larger number of instruments, including capital management techniques. This volume offers concrete, socially valuable alternatives that economists, policy makers, students and interested laypeople should consider before adopting one size fits all, often inadequate, policies that have become a virtual policy making fad.

Kurdistan, the name given to the Kurds’ historical homeland, is a landlocked region that lies at the crossroads of Turkey, Syria, Iraq and Iran. After the fall of Ottoman Empire the Kurdish people were promised independence by the treaty of Sevres in 1920. The Kurds are known as a nation without borders and consider as a stateless people. Aftermath of the Arab Spring in 2010, Kurdistan has witnessed an increase in nationalism and a shift in geo-politics. The book examines the various models which could be acceptable solution to the Kurdish problem in West Asian region. It also evaluates the role of the Kurdish diaspora placing Kurdish issue in the international forum. The Kurdish Peshmerga and YPG militia maintains one of the strongest forces confronting against the ISIS in West Asian region.
