Peaks of Europe' is not a traditional landscape photography book. It's the result of a 5-month adventure across 17 countries told through the lens of a European travel photographer who took 29 years to finally explore the continent on which in he was born. The book has been designed for a specific purpose: telling the story of a 5-month road trip and what it takes to be living out of a car for several months, with all the good and bad moments. For this project, Johan Lolos wasn't just documenting the landscapes. This book features a series of photos with a focus on the storytelling as much as the imagery. At the end, the people he met were what he remembered most.

The Bangernomics Bible is a crash course in buying and running a car for less. Bangernomics contrasts the absurd expense of buying new, with the supreme good sense of buying used. Bangernomics shows the mechanically bewildered how to buy and run a safe, durable car and save money. The Bangernomics Bible is universe friendly, so no matter where you live in the world the advice is always relevant. James Ruppert is the internationally recognised guru of Bangernomics and a full time automotive anarchist.

The Land Crusier Legend

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst.
