In this age of rapid transition, Asian American studies and American studies in general are being reconfigured to reflect global migrations and the diverse populations of the United States. Asian American literature, in particular, has embodied the crisis of identity that is at the heart of larger academic and political debates surrounding diversity and the inclusion and exclusion of immigrant and refugee groups. These issues underlie the very principles on which literature, culture, and art are produced, preserved, taught, and critiqued. *Words Matter* is the first collection of interviews with 20th-century Asian American writers. The conversations that have been gathered here—interviews with twenty writers possessing unique backgrounds, perspectives, thematic concerns, and artistic priorities—effectively dispel any easy categorizations of people of Asian descent. These writers comment on their own work and speak frankly about aesthetics, politics, and the challenges they have encountered in pursuing a writing career. They address, among other issues, the expectations attached to the label "Asian American," the burden of representation shouldered by ethnic artists, and the different demands of "mainstream" and ethnic audiences.

Education is a main issue in all countries. Policy makers, educators, families, students and, in a more general way, societies expect schools to provide a high quality education. They also expect students to be able to achieve and to become active and critical citizens. As senior researchers in education, we address some of the most complex and demanding research questions: How does learning affect identity? How does participation to educational settings, scenarios and situations impact the way we are or became? Can changes in how we perceive our Selves be considered as part of the learning process? This book attempts to outline some answers to such broad questions using a very robust and updated theoretical frame: the dialogical approach. In these chapters very wellknown international authors from different continents and countries analyze school and educational situations through new lens: by considering the teaching and learning processes as multivoiced and socially complex and considering identity development as a true leverage for development. The focus on the dialogical nature of both learning and identities makes this book interesting not only for educators and educational researchers but also for anyone interested in human sciences, policy makers, students and their families. We also aimed at producing a book that can be useful for different cultures and educational systems. Thus, in this book there are researches and comments from different cultural perspectives, making it appealing for a very large targetpublic.

"The Romantic era was a vibrant and exciting time in the history of the novel. Yet, aside from a few iconic books - for example, Pride and Prejudice or Frankenstein - it has been ignored or dismissed by later readers and critics. Bringing this rich but neglected body of works to the fore, Recognizing the Romantic Novel challenges us to rethink our ideas of the novel as a genre, as well as our long-held assumptions about the literary movement of Romanticism."--BOOK JACKET.

A Co-publication of the National Council of Teachers of English and Routledge. How can teachers make sound pedagogical decisions and advocate for educational policies that best serve the needs of students in today's diverse classrooms? What is the pedagogical value of providing culturally and linguistically diverse students greater access to their own language and cultural orientations? This landmark volume responds to the call to attend to the unfinished pedagogical business of the NCTE Conference on College Composition and Communication 1974 Students' Right to Their Own Language resolution. Chronicling the interplay between legislated/litigated education policies and language and literacy teaching in diverse classrooms, it presents exemplary research-based practices that maximize students' learning by utilizing their home-based cultural, language, and literacy practices to help them meet school expectations. Pre-service teachers, practicing teachers, and teacher educators need both resources and knowledge, including global perspectives, about language variation in PreK-12 classrooms and hands-on strategies that enable teachers to promote students' use of their own language in the classroom while also addressing mandated content and performance standards. This book meets that need. Visit <http://www.ncte.org> for more information about NCTE books, membership, and other services.

decade, The Allyn & Bacon Guide to Writing: Concise Edition offers the most progressive and teachable introduction to academic and personal writing available. This four-color guide offers engaging instruction in rhetoric and composition, a flexible sequence of comprehensive writing assignments, and numerous examples of student and professional writing. Solidly grounded in current theory and research, yet eminently practical and teachable, The Allyn & Bacon Guide to Writing: Concise Edition is the new standard for first-year composition courses in writing, reading, critical thinking, and inquiry. Part I, "A Rhetoric for College Writers," provides a conceptual framework for the text by showing how inquiring writers pose problems, pursue them through discussion and exploratory writing, and solve them within a rhetorical context shaped by the writer's purpose, audience, and genre. Part II, "Writing Projects," contains six self-contained assignment chapters arranged according to the purposes for writing. Each chapter guides students through the process of generating and exploring ideas, composing and drafting, and revising and editing. "Guidelines for Peer Reviewers" which sum up the important features in the assignments and facilitate detailed, helpful peer reviews. Part III, "A Guide to Composing and Revising," comprises two self-contained chapters of nuts-and-bolts strategies for composing and revising. Part IV, "A Rhetorical Guide to Research," presents pedagogically sequenced instruction for helping students learn to conduct searches, evaluate sources, and incorporate sources into their own writing. Research skills are taught within a rhetorical context with special attention to the rhetoric of websites.

The Dark Side of Knowledge

Karen Tei Yamashita's novels, essays, and performance scripts have garnered considerable praise from scholars and reviewers, and are taught not only in the United States but in at least half a dozen countries in Asia, South America, and Europe. Her work has been written about in numerous disciplines in the humanities and social sciences. Karen Tei Yamashita: Fictions of Magic and Memory is the first anthology given over to Yamashita's writing. It contains newly commissioned essays by established, international scholars; a recent interview with the author; a semiautobiographical keynote address delivered at an international conference that ruminates on her Japanese American heritage; and a full bibliography. The essays offer fresh and in-depth readings of the magic realist canvas of *Through the Arc of the Rain Forest* (1990); the Japanese emigrant portraiture of *Brazil-Marú*
