The (Im)Perfect Girlfriend

Easing the transition from GCSE to AS level, this textbook meets the 2004 Edexcel specifications and provides numerous worked examples and solutions to aid understanding of key concepts.

Edexcel AS Physics

Our brand-new resources are written specifically to tackle the demands of the GCSE (9-1) Maths.

Structural Elements Design Manual

This book is written for students and clinicians who want to learn about adolescent behavioral health and psychosocial development. It focuses on the experiences of culturally diverse adolescents and families including, but not limited to, diversity based on race, ethnicity, gender identity, sexual orientation, spirituality, ability/disability status, age, nationality, language, and socioeconomic status. Written from a bioecological and strength-based perspective, it views adolescents as having the power to initiate growth and recover from setbacks.

Structural Elements Design Manual is a manual on the practical design of structural elements that comprise a building structure, namely, timber, concrete, masonry, and steel. Practical guidance on the design of structural elements is provided in accordance with the appropriate British Standard or Code of Practice. Plenty of worked examples are included. Comprised of five chapters, this book begins with an overview of interrelated matters with which the structural engineer is concerned in the design of a building or similar structure. The British Standards and Codes of Practice are also considered, along with loading, structural mechanics, and theory of bending. The discussion then turns to timber, concrete, masonry, and steel elements, with emphasis on safety considerations and material properties. This monograph should prove useful not only to students of structural and civil engineering, but also to those studying for qualifications in architecture, building,

and surveying who need to understand the design of structural elements.

Anna's Diary

Oxford A Level Mathematics for Edexcel covers the latest 2008 curriculum changes and also takes a completely fresh look at presenting the challenges of A Level. It specifically targets average students, with tactics designed to offer real chance of success to more students, as well as providing more stretch and challenge material. This Further Pure 1 book is fully updated to reflect the changes to the new Edexcel specification, meaning that it can now be studied with confidence at AS level. It also includes a background knowledge chapter to help bridge the gap between GCSE and A level study.

Activate: 11-14 (Key Stage 3): Activate 2 Student Book

This new and expanded edition is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge Colleges for conditional offers in mathematics. They are also used by some other UK universities and many mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. Advanced Problems in Mathematics bridges the gap between school and university mathematics, and prepares students for an undergraduate mathematics course. The questions analysed in this book are all based on past STEP

questions and each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anyone interested in advanced mathematics. In the second edition the author has enhanced the content as per the latest trend in examination . As a result this book would act as a highly focused and effective resource for students aspiring to crack the 'Integrated Program in Management (IPM)' entrance examination. The book has been designed keeping in mind the busy schedule of aspirants , currently preparing for their 10+2 examinations , by providing 'to-the-point' concepts and 'quality' practice questions. The last five years' examination pattern and the scope of Aptitude Tests as conducted by IIM Indore have also been incorporated across all chapters. It would also be a useful resource to crack undergraduate level entrance examinations of 'University of Delhi', 'Symbiosis', 'Narsee Monjee (NMIMS)' and other key BBA offering institutions.

This book focuses on the human aspects of wearable technologies and game design, which are often neglected. It shows how user-centered practices can optimize the wearable experience, thus improving user acceptance, satisfaction and engagement with novel wearable gadgets. It addresses both research and best practices in the applications of human factors and ergonomics to sensors, wearable technologies and game design innovations, as well as new findings on the integration of wearability principles with regard to: aesthetics, affordance, comfort, contextual awareness, customization, ease of use, ergonomics, information overload, intuitiveness, obtrusiveness, privacy, reliability, responsiveness, satisfaction, subtlety, user-friendliness and wearability. Gathering the outcomes of both the AHFE 2019 Conference on Human Factors and Wearable Technologies and the AHFE 2019 Conference on Human Factors in Game Design and Virtual Environments, held on July 24–28, 2019 in Washington, DC, USA, the book addresses the needs of professionals, researchers, and students whose work involves the human aspects of wearable, smart and/or interactive technologies and game design

research.

This booklet is intended to help you to prepare for STEP examinations. It should also be useful as preparation for any undergraduate mathematics course, even if you do not plan to take STEP. The questions are all based on recent STEP questions. I chose the questions either because they are 'nice' - in the sense that you should get a lot of pleasure from tackling them - or because I felt I had something interesting to say about them. In this booklet, I have restricted myself (reluctantly) to the syllabus for Papers I and II, which is the A-level core (i.e. C1 to C4) with a few additions. This material should be familiar to you if you are taking the International Baccalaureate, Scottish Advanced Highers or other similar courses.
