On 19 February 2013 the Irish Taoiseach Enda Kenny apologized to the women who had been incarcerated in Ireland's Magdalene laundries. In the audience sat Steven O'Riordan, a documentary filmmaker and founder of the Magdalene Survivors Together group. And by his side were some of the women he had helped. Nancy, Kathleen, Diane, Marie and Marina were confined in Magdalene laundries throughout Ireland during the 1950s, 60s and 70s. The physical and psychological abuse they suffered at the institutions, run on behalf of the State, led to a lifetime of shame and secrecy. Inspirational and moving, these women tell their stories for the first time.

Welcome to computer science in the 21st century. Did you ever wonder how computers represent DNA? How they can download a web page containing population data and analyze it to spot trends? Or how they can change the colors in a color photograph? If so, this book is for you. By the time you're done, you'll know how to do all of that and a lot more. And Python makes it easy and fun. Computers are used in every part of science from ecology to particle physics. This introduction to computer science continually reinforces those ties by using real-world science problems as examples. Anyone who has taken a high school science class will be able to follow along as the book introduces the basics of programming, then goes on to show readers how to work with databases, download data from the web automatically, build graphical interfaces, and most importantly, how to think like a professional programmer. Topics covered include: Basic elements of programming from arithmetic to loops and if statements. Using functions and modules to organize programs. Using lists, sets, and dictionaries to organize data. Designing algorithms systematically. Debugging things when they go wrong. Creating and querying databases. Building graphical interfaces to make programs easier to use. Object-oriented programming and programming patterns.

### The Incompleat Angler

"The first truly comparative assessment of how democracies seek to constrain and limit judicial misbehavior. . . . Clear, insightful conclusions."--Martin Edelman, SUNY, Albany  
Judicial power poses a dilemma for democratic societies: judges exert political power but typically are not democratically accountable for their use of it. This book is a comparative study of the discipline and removal of errant judges in four Western nations--France, Italy, England, and the United States. Democracies place a high premium on maintaining the appearance of judicial independence, and formal mechanisms ensuring it normally include lengthy and secure tenure and adequate salary. Federal judges in the United States come close to absolute independence, since they serve in their position for life; in more than 200 years, only seven have been removed from office. Still, democratic theory requires that the service of public officials always be temporary and conditional. This book shows how each of the four countries views accountability as proportionate to power. English, French, and Italian judges cannot challenge the democratic authority of the state, and their accountability is less democratically maintained. In the English system, discipline is the prerogative of Parliament; the French largely police their own ranks. In the United States, where judges wield considerable power, they may be removed through election in many states or through the actions of elected political representatives. The book concludes that the tension between democratic goals supports a rationalizing principle for nations tilting in favor of either accountability or independence. Mary L. Volcansek, professor of political science at Florida International University, is the author or editor of several books, including *Judicial Impeachment: None Called for Justice* and *Judicial Politics in Europe: An Impact Analysis*, and has published articles in such journals as *Comparative Political Studies*, *West European Politics*, and *Judicature*. Maria Elisabetta de Franciscis, assistant professor of political science at Universita di Napoli, Federico, II, is the author of *Italy and the Vatican*. Jacqueline Lucienne Lafon, associate professor of law at Universite de Paris, XI, is the author of two books in French and, with Mary Volcansek, of *Judicial Selection: The Cross-Evolution of French and American Practices*.

### Judicial Misconduct

Katie was an innocent 13-year-old schoolgirl when she was targeted, raped and abused by a gang of sadistic men. But that was just the beginning. Bullied from an early age, Katie had low self-esteem which made her a prime target for the paedophile that followed her home from school. In the following months she was systematically groomed and raped by a group of predatory Asian men who separated her from her friends and passed her between them. But it was the ring

leader Zeb who lured her with drugs and alcohol before raping her at a secret house which he used to exploit young girls. Katie's abuse went on for two agonizing years until Zeb came up with an even more sickening plan. Stolen Girl is the shocking true story of a lost childhood innocence but it is also one of hope and how Katie found the strength and courage not only to escape her abusers but to bring them to justice.

It could be argued that it was mere chance that drew Barbara Kraft, a young aspiring writer, into friendship with each party of one of literature's most famous love affairs: Anais Nin, and then Henry Miller; yet, upon reflection, it seems it was meant to be. In 1974 Kraft signed up for a writing course with Nin only months before the discovery of the cancer that would end the famous diarist's life two years later, and Kraft would prove to be a faithful and dependable friend and companion until the end. During this time, Kraft kept a diary detailing the events of her relationship with Nin, which would become the heart of her acclaimed memoir *Anais Nin: The Last Days*. Only months after Nin's death, Kraft attended a "Q & A" talk by Henry Miller and, inspired by his dynamism, did a "crash" rereading of much of his work. This rediscovery led to Kraft writing and reading "An Open Letter to Henry Miller" on an NPR station, which Miller eventually heard and admired. Wanting to meet Kraft, Miller invited her to cook dinner for him, and, of course, to engage in a long and interesting talk with him, a habit Miller developed during his destitute days in 1930s Paris when he made sure he was invited for lunch and dinner in exchange for good conversation each day of the week. While no longer destitute, and in failing health, the ritual of dinner and conversation kept on until the very end. Kraft became one of Miller's sixteen regular cooks, and she developed not only a comradery with him, but a mutually nurturing friendship for the last two years of his life. This memoir is an inside look at the chaos that ruled the famous house on Ocampo Drive in Pacific Palisades, the long stream of people who lived or crashed there, the revolving door of seekers, celebrities, scholars and filmmakers, and how Miller maintained a fulfilling and creative life in the midst of all the commotion. We see the dynamics of Miller's relationships with his family, his young love interest and those who professed to care for him as his health declined. We discover how some sought to exploit him and how others rose to the occasion when he needed help. It is a highly personal story in which Kraft captures Miller's conversations so perfectly that one can imagine his voice uttering the words. *Henry Miller: The Last Days* is a celebration of Miller's indomitable spirit as his body failed him, his rebellion against old age, his refusal to give in, his never-ending submission to the creative urge, his battle to preserve his right to dinner, wine and talk even if it meant superhuman effort. It is the story of how one of America's most celebrated writers could have died alone in a house full of strangers. After absorbing Barbara Kraft's sensitive and yet bold narrative, one cannot help but have even more respect for Henry Miller's courage and humility, and rejoice in his final triumph."

## **The Babylonian Talmud**

How many a man has dated a new era in his life from the reading of a book, wrote Henry David Thoreau in Walden. Today that book continues to provoke, inspire, and change lives all over the world, and each rereading is fresh and challenging. Yet as Thoreau's countless admirers know, there is more to the man than Walden. An engineer, poet, teacher, naturalist, lecturer, and political activist, he truly had multiple lives to lead, and each one speaks forcefully to us today. Sponsored by the Thoreau Society, the brief, handsomely presented books in this series offer the thoughts of a great writer on a variety of topics, some that we readily associate with him, some that may be surprising. Each volume includes selections from his familiar published works as well as from less well known lectures, letters, and journal entries. The books have been designed by renowned illustrator and book artist Barry Moser. Ronald A. Bosco is Distinguished Service Professor of English and American Literature at the University at Albany, past-president of the Thoreau Society, and chair of The Friends of Walden Pond Committee. Wesley T. editor for the Thoreau Society. Steve Grant is a journalist who writes on natural history and New England heritage topics for the Hartford Courant.

An exploration of the connections between feminine consciousness and altered states from ancient times to present day • Explores the feminine qualities of the psychedelic self, ancient female roots of shamanism, and how altered states naturally tap into the female archetype • Discusses feminist psychedelic activism, female ecstasies, goddess consciousness, the dark feminine, and embodied paths to ecstasy • Includes contributions by Martina Hoffmann, Amanda Sage, Carl Ruck, and others Women have been shamans since time immemorial, not only because women have innate intuitive gifts, but also because the female body is wired to more easily experience altered states, such as during the process of birth. Whether female or male, the altered states produced by psychedelics and ecstatic trance expand our minds to tap into and enhance our feminine states of consciousness as well as reconnect us to the web of life. In this book, we discover the transformative powers of feminine consciousness and altered states as revealed by contributors both female and male, including revered scholars, visionary artists, anthropologists, modern shamans, witches, psychotherapists, and policy makers. The book begins with a deep look at the archetypal dimensions of the feminine principle and how entheogens give us open access to these ancient archetypes, including goddess consciousness and the dark feminine. The contributors examine the female roots of shamanism, including the role of women in the ancient rites of Dionysus, the Eleusinian Sacrament, and Norse witchcraft. They explore psychedelic and embodied paths to ecstasy, such as trance dance, holotropic breathwork, and the similarities of giving birth and taking mind-altering drugs. Looking at the healing potential of the feminine and altered states, they discuss the power of plant medicines, including ayahuasca, and the recasting of the medicine-woman archetype for the modern world. They explore the feminine in the creative process and discuss feminist psychedelic activism, sounding the call for more female voices in the psychedelic research community. Sharing the power of “femtheogenic” wisdom to help us move beyond a patriarchal society, this book reveals how feminine consciousness, when intermingled with psychedelic knowledge, carries and imparts the essence of inclusivity, interconnectedness, and balance our world needs to heal and consciously evolve.
