This book is an in-depth examination of the much needed process of “self” study known as self observation. We live in an age where the “attention function” in the brain has been badly damaged by TV and computers-up to 90 percent of the public under age 35 suffers from attention-deficit disorder! This book offers the most direct, non-pharmaceutical means of healing attention dysfunction. The methods presented here are capable of restoring attention to a fully functional and powerful tool for success in life and relationships. This is also an age when humanity has lost its connection with conscience. When humanity has poisoned the Earth’s atmosphere, water, air and soil, when cancer is in epidemic proportions and is mainly an environmental illness, the author asks: What is the root cause? And he boldly answers: Failure to develop conscience! Selfobservation, he asserts, is the most ancient, scientific, and proven means to develop this crucial inner guide to awakening and a moral life. This book is for the lay-reader, both the beginner and the advanced student of self observation. No other book on the market examines this practice in such detail. There are hundreds of books on self-help and meditation, but almost none on self-study via self-observation, and none with the depth of analysis, wealth of explication, and richness of experience which this book offers. Red Hawk, author of 5 collections of poetry, was the Hodder Fellow at Princeton University (1992-93) and is currently a full professor at the University of Arkansas, Monticello. He has practiced self-observation for over 30 years, under the guidance of the Gurdjieff Society of Arkansas, meditation master Osho

Rajneesh, and spiritual teacher, Lee Lozowick.

Contextualizing the Renaissance

Presenting both the histories and the prevalent worldviews of the major world religions, Matthews's *WORLD RELIGIONS*, Seventh Edition, methodically introduces students to the richness and diversity of these traditions. The *Worldview* sections in particular make this the most helpful textbook for comparative analyses of the religions. In these sections, students can see how the different religions approach a common set of ten themes that are fundamental to all traditions, including the nature of the Absolute, the place of humans in the world, rituals and symbols, and the prospects for life after death. Furthermore, this text combines insightful, engaging prose with maps, photographs, timelines, excerpts from sacred texts, and other helpful pedagogical aids that provide a comprehensive yet accessible survey of world religions. Warren Matthews's thoughtful and balanced approach depicts the unique traditions and perspectives of diverse world religions with objectivity and respect. In Korea in the early 1800s, news from the countryside reached the king by means of signal fires. On one mountaintop after another, a fire was lit when all was well. If the king did not see a fire, that meant trouble, and he would send out his army. Linda Sue Park's first picture book for Clarion is about Sang-hee, son of the village firekeeper. When his father is unable to light the fire one night, young Sang-hee must take his place. Sang-hee knows how important it is for the fire to be lit-but he wishes that he could see soldiers . . . just once. Mountains, firelight and shadow, and Sunhee's struggle with a hard choice are rendered in radiant paintings, which tell their own story of a turning point in a child's life.

Samuel Beckett is unique in literature. Born and educated in Ireland, he lived most of his life in Paris. His literary output was rendered in either English or French, and he often translated one to the other, but there is disagreement about the contents of his bilingual corpus. A Beckett Canon by renowned theater scholar Ruby Cohn offers an invaluable guide to the entire corpus, commenting on Beckett's work in

its original language. Beginning in 1929 with Beckett's earliest work, the book examines the variety of genres in which he worked: poems, short stories, novels, plays, radio pieces, teleplays, reviews, and criticism. Cohn grapples with the difficulties in Beckett's work, including the opaque erudition of the early English verse and fiction, and the searching depths and syntactical ellipsis of the late works. Specialist and nonspecialist readers will find *A Beckett Canon* valuable for its remarkable inclusiveness. Cohn has examined the holdings of all of the major Beckett depositories, and is thus able to highlight neglected manuscripts and correct occasional errors in their listings. Intended as a resource to accompany the reading of Beckett's writing--in English or French, published or unpublished, in part or as a whole--the book offers context, information, and interpretation of the work of one of the last century's most important writers. Ruby Cohn is Professor Emerita of Comparative Drama, University of California, Davis. She is author or editor of many books, including *Anglo-American Interplay in Recent Drama*; *Retreats from Realism in Recent English Drama*; *From Desire to Godot*; and *Just Play: Beckett's Theater*.

The Mustang Breaker

The 28th Annual Conference of the Center for Medieval and Renaissance Studies, held on 21-22 October 1994 at Binghamton University, featured 33 panel sessions and approximately 150 presentations. The ten essays in this volume consist of the five plenary speakers - leaders in their field - and five panel essays, each of which was reviewed for this volume. The volume comprises a body of work organised around a governing theme - modes of historicisation. Each of the essays demonstrates the practice of or a commentary upon a distinctive historicised criticism. By 'historicised' as contrasted with 'historical' criticism, it is meant that these essays problematise, stretch or reconceive traditional historical practices. Challenging the notion that the production of paintings, dramatic texts or even conduct books can be read against a stable historical ground, they show that paintings, works of literature, and treatises not only participate in history but are exemplars of textual instability. The very content of these texts can be shown, in

various editions, to change over time - and yet each bears a single, determinate title. In such ways the contributions gathered here all show that they have been affected by 'the new history'.

Katherine Shaw—Kate— is happy with her life. She has supportive friends, a glamorous magazine career, and a love of all things Jane Austen. But when she loses her job, her beloved grandmother falls ill and a financial disaster forces a sale on the family home, Kate finds herself facing a crisis that would test even the most stalwart of Austen heroines. Friends rally round, connecting her to freelance gigs, and presenting her with a birthday gift— title to land in Scotland—that's about to come in very handy. Turns out that Kate's first freelance assignment is to test an Austen-inspired theory: in the toughest economic times is a wealthy man the only must-have accessory? What begins as an article turns into an opportunity as Kate—now Lady Kate—jet-sets to Palm Beach, St Moritz and London where, in

keeping company with the elite, she meets prospects who make Mr. Darcy look like an amateur. But will rubbing shoulders with men of good fortune ever actually lead her to love? And will Kate be able to choose between Mr. Rich and Mr. Right?

Per-Olov Löwdin's stature has been a symbol of the world of quantum theory during the past five decades, through his basic contributions to the development of the conceptual framework of Quantum Chemistry and introduction of the fundamental concepts; through a staggering number of regular summer schools, winter institutes, innumerable lectures at Uppsala, Gainesville and elsewhere, and Sanibel Symposia; by founding the International Journal of Quantum Chemistry and Advances in Quantum Chemistry; and through his vision of the possible and his optimism for the future, which has inspired generations of physicists, chemists, mathematicians, and biologists to devote their lives to molecular electronic theory and dynamics, solid state, and quantum biology. Fundamental World of Quantum Chemistry: Volumes I, II and III form a collection of papers dedicated to the memory of Per-Olov Löwdin. These volumes are of interest to a broad audience of quantum, theoretical, physical, biological, and computational chemists; atomic, molecular, and condensed matter physicists; biophysicists; mathematicians working in many-body theory; and historians and philosophers of natural science.

"Atoms First seems to be the flavor of the year in chemistry textbooks, but many of them seem to be little more than rearrangement of the chapters. It takes a master like McQuarrie to go back to the drawing board and create a logical development from smallest to largest that makes sense to students."---Hal Harris, University of Missouri-St. Louis "McQuarrie's book is extremely well written, the order of topics is

logical, and it does a great job with both introductory material and more advanced concepts. Students of all skill levels will be able to learn from this book."---Mark Kearley, Florida State University This new fourth edition of General Chemistry takes an atoms-first approach from beginning to end. In the tradition of McQuarrie's many previous works, it promises to be another ground-breaking text. This superb new book combines the clear writing and wonderful problems that have made McQuarrie famous among chemistry professors and students worldwide. Presented in an elegant design with all-new illustrations, it is available in a soft-cover edition to offer professors a fresh choice at an outstanding value. Student supplements include an online series of descriptive chemistry Interchapters, a Student Solutions Manual, and an optional state-of-the-art Online Homework program. Jiji's extensive understanding of how students think and learn, what they find difficult, and which elements need to be stressed is integrated in this work. He employs an organization and methodology derived from his experience and presents the material in an easy to follow form, using graphical illustrations and examples for maximum effect. The second, enlarged edition provides the reader with a thorough introduction to external turbulent flows, written by Glen Thorncraft. Additional highlights of note: Illustrative examples are used to demonstrate the application of principles and the construction of solutions, solutions follow an orderly approach used in all examples, systematic problem-solving methodology emphasizes logical thinking, assumptions, approximations, application of principles and verification of results. Chapter summaries help students review the material. Guidelines for solving each problem can be selectively given to students.
