In emergencies, distributing cash in a targeted manner can often meet people's immediate needs more quickly and appropriately than the direct distribution of commodities such as food aid. Cash gives people choices and thereby preserves their dignity. Commodity distribution may pose logistical problems, takes time, and in the case of food aid, may disrupt local markets if food is actually available within the affected country or region. But among humanitarian agencies there are fears that cash

transfers will pose security risks, create inflation, and fail to be used to meet basic needs. In this guide, the first of its kind, Oxfam staff members present the rationale behind cash-transfer programs, considering the arguments for and against cash as an alternative to commodity distribution. They also give guidance on when cash is the most appropriate intervention and how to assess this. Different types of cash intervention are compared--cash grants, vouchers, and cash-for-work--and the guide uses checklists to explain the practical steps involved in implementing them. They draw on the experience of Oxfam and other agencies of operating such programs, including responses to the devastation caused by the Indian Ocean tsunami in December 2004. The guidelines are primarily intended for NGO personnel: humanitarian program managers, food-security specialists, public-health engineers, finance staff, and logisticians. Policymakers in donor organizations and international agencies will also find them relevant. The sixteen cards contain key elements from the book to explain how to assess whether cash is the most appropriate response to any particular emergency. The cards and the paperback are also available as a set.

"There has never been a book provoking more delirium, foolishness and irrational movements, without any relationship to Jesus Christ [than the Book of Revelation]." --Jacques Ellul, Introduction Known for his trenchant critique of modernity and of those Christians who celebrate their captivity to it, Ellul here cuts to the heart of the theological intention of the Book of Revelation, and thereby reveals the liberating gospel in all its offensiveness. Neither an exhaustive commentary nor a work of historical-exegetical analysis, Apocalypse is a provocative, independent interpretation. Ellul seeks to rescue Revelation from the reassuring and orthodox banality to which commentators often reduce it. The goal is to perceive the totality of the book in its movement and structure. "Architecture in movement" is the key to understanding Revelation's puzzling but simple message. This edition also comes with a new foreword by Jacob Marques Rollison who provides an essential aid for guiding readers through Ellul's thorough engagement with Revelation.

Presenting 58 Tastiest Ways to Cook Legumes and Lentils as Soups, Curries, Snacks, Full Meals, and hold your breath, Desserts! As only Indians can. ** Now in its Second comprehensively Revised Edition with full Instant Pot support, this is simply the ultimate vegetarian protein cookbook. ** We all know that as the cheapest and most versatile proteins available to mankind, legumes and lentils have been cultivated and consumed from time immemorial. Lentils are mentioned in religious books such as the Bible, Quran, and the Vedas. Lentils were so important for those long sea voyages that the Romans named their emperors after the most common legumes: Lentulus (lentil), Fabius (fava), Piso (pea), and Cicero (chickpea). And yet, legumes and lentils came to be almost forgotten in the modern post-20th century world with easy availability of red meat and the rise of fast food joints. Now thanks to scientists and expert bodies like the Mayo Clinic, we know that legumes and lentils are actually better than meat. Legumes and Lentils are the “Healthiest Food” in the World.

Legumes and lentils are good for a Healthy Heart: These contain significant amount of folate and magnesium, both doing wonders for your heart. Legumes and lentils replenish Iron Needed for Energy: These are rich in Iron, which is a vital component of energy production and metabolism in the body. Legumes and lentils are low in cholesterol: These, unlike red meat, are low in fat, calories, and cholesterol. They are also somewhat lower in oxalic acid and similar chemicals which cause stone formation in kidneys and result in gout, a painful affliction of joints caused by the deposition of oxalate crystals. Legumes and lentils are rich in fiber: If you are looking for ways to reduce constipation, try legumes and lentils as they contain a high amount of dietary fiber, both soluble and insoluble. The way Indians cook legumes and lentils is unmatched by any other cuisine on Planet Earth. This is because almost every Indian meal has to have a legume and lentil dish, as dal (soup), curry, snack, or dessert. So, they have centuries of expertise in turning legumes and lentils in whichever way you want. On the other hand, most western cook books would, at the most, recommend baking legumes and lentils with cheese, putting them in hamburgers, having them with sausages and casseroles, or making lentils stew. One is, of course, not counting the lentils sprouts salad or the famous students' dorm dish of baked beans (straight from the can) as well as the West Asian "sauce" hummus, without which no Lebanese meal can be termed complete. There is nothing wrong if you want to have your legumes and lentils this way. But if you want to experiment, and wish to embark upon a roller coaster culinary adventure, you must

It is said that without carrying Sattu or roasted chickpea flour with them, for sustenance on those long and arduous treks, Buddhist monks from India could NOT have spread Buddhism to such far off places from Afghanistan and Tibet to China, Korea, and Japan!
